Which configuration setting for FortiGate is part of a device-level database on FortiManager?

A. VIP and IP Pools
B. Firewall policies
C. Security profiles
D. Routing

Answer: D

Explanation:
The FortiManager stores the FortiGate configuration details in two distinct databases. You are using the Quick Install option to install configuration changes on the managed FortiGate.
Which two statements correctly describe the result? (Choose two.)

A. It will not create a new revision in the revision history

Explanation:
FortiManager_6.4_Study_Guide-Online – page 164

The Install Config option allows you to perform a quick installation of device-level settings without launching the Install Wizard. When you use this option, you cannot preview the changes prior to committing. Administrator should be certain of the changes before using this install option, because the install can't be cancelled after the process is initiated.

NEW QUESTION 5
- (Exam Topic 1)
View the following exhibit.

If both FortiManager and FortiGate are behind the NAT devices, what are the two expected results? (Choose two.)

A. FortiGate is discovered by FortiManager through the FortiGate NATed IP address.
B. FortiGate can announce itself to FortiManager only if the FortiManager IP address is configured on FortiGate under central management.
C. During discovery, the FortiManager NATed IP address is not set by default on FortiGate.
D. If the FCFM tunnel is torn down, FortiManager will try to re-establish the FGFM tunnel.

Answer: AC

Explanation:
Fortimanager can discover FortiGate through a NATed FortiGate IP address. If a FortiManager NATed IP address is configured on FortiGate, then FortiGate can announce itself to FortiManager. FortiManager will not attempt to re-establish the FGFM tunnel to the FortiGate NATed IP address, if the FGFM tunnel is interrupted. Just like it was in the NATed FortiManager scenario, the FortiManager NATed IP address in this scenario is not configured under FortiGate central management configuration.
