Exam Questions MD-102

Endpoint Administrator

About ExamBible

Your Partner of IT Exam

Found in 1998

ExamBible is a company specialized on providing high quality IT exam practice study materials, especially Cisco CCNA, CCDA, CCNP, CCIE, Checkpoint CCSE, CompTIA A+, Network+ certification practice exams and so on. We guarantee that the candidates will not only pass any IT exam at the first attempt but also get profound understanding about the certificates they have got. There are so many alike companies in this industry, however, ExamBible has its unique advantages that other companies could not achieve.

Our Advances

* 99.9% Uptime

All examinations will be up to date.

* 24/7 Quality Support

We will provide service round the clock.

* 100% Pass Rate

Our guarantee that you will pass the exam.

* Unique Gurantee

If you do not pass the exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

NEW QUESTION 1

- (Exam Topic 4)

You have an Azure subscription.

You have an on-premises Windows 11 device named Device 1. You plan to monitor Device1 by using Azure Monitor.

You create a data collection rule (DCR) named DCR1 in the subscription. To what should you associate DCR1 ?

- A. Azure Network Watcher
- B. Device1
- C. a Log Analytics workspace
- D. a Monitored Object

Answer: B

Explanation:

To monitor Device1 by using Azure Monitor, you should associate DCR1 with Device1. A data collection rule (DCR) defines the data collection process in Azure Monitor, such as what data to collect, how to transform it, and where to send it. A DCR can be associated with multiple virtual machines and specify different data sources, such as Azure Monitor Agent, custom logs, or Azure Event Hubs1. To associate a DCR with a virtual machine, you need to install the Azure Monitor Agent on the machine and then select the DCR from the list of available rules2. You can also use Azure Policy to automatically install the agent and associate a DCR with any virtual machines or virtual machine scale sets as they are created in your subscription3.

The other options are not correct for this scenario because:

> Azure Network Watcher is a service that provides network performance monitoring and diagnostics for Azure resources. It is not related to data collection rules or Azure Monitor4.

> A Log Analytics workspace is a destination where you can send the data collected by a data collection rule. It is not an entity that you can associate a DCR with5.

> A Monitored Object is not a valid term in the context of Azure Monitor or data collection rules. References: Data collection rules in Azure Monitor, Configure data collection for Azure Monitor Agent, U

Azure Policy to install Azure Monitor Agent and associate with a DCR, What is Azure Network Watcher?, Log Analytics workspaces in Azure Monitor

NEW QUESTION 2

- (Exam Topic 4)

You have a Microsoft 365 subscription that contains 100 devices enrolled in Microsoft Intune. You need to review the startup processes and how often each device restarts.

What should you use?

- A. Endpoint analytics
- B. Intune Data Warehouse
- C. Azure Monitor
- D. Device Management

Answer: B

NEW QUESTION 3

- (Exam Topic 4)

You have 100 computers that run Windows 10. You have no servers. All the computers are joined to Microsoft Azure Active Directory (Azure AD).

The computers have different update settings, and some computers are configured for manual updates. You need to configure Windows Update. The solution must meet the following requirements:

> The configuration must be managed from a central location.

> Internet traffic must be minimized.

> Costs must be minimized.

How should you configure Windows Update? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Windows Update technology to use:

- Windows Server Update Services (WSUS)
- Microsoft Endpoint Configuration Manager
- Windows Update for Business

Manage the configuration by using:

- A Group Policy object (GPO)
- Microsoft Endpoint Configuration Manager
- Microsoft Intune

Manage the traffic by using:

- Delivery Optimization
- BranchCache
- Peer cache

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Windows Server Update Services (WSUS)

Windows Server Update Services (WSUS) enables information technology administrators to deploy the latest Microsoft product updates. You can use WSUS to fully manage the distribution of updates that are released through Microsoft Update to computers on your network.

Windows Server Update Services is a built-in server role that includes the following enhancements: Can be added and removed by using the Server Manager Includes Windows PowerShell cmdlets to manage the most important administrative tasks in WSUS Etc.

Box 2: A Group Policy object

In an Active Directory environment, you can use Group Policy to define how computers and users can interact with Windows Update to obtain automatic updates from Windows Server Update Services (WSUS).

Box 3: BranchCache

BranchCache is a bandwidth-optimization feature that has been available since the Windows Server 2008 R2 and Windows 7 operating systems. Each client has a cache and acts as an alternate source for content that devices on its own network request. Windows Server Update Services (WSUS) and Microsoft Endpoint Manager can use BranchCache to optimize network bandwidth during update deployment, and it's easy to configure for either of them. BranchCache has two operating modes: Distributed Cache mode and Hosted Cache mode.

NEW QUESTION 4

- (Exam Topic 4)

Your network contains an Active Directory domain named contoso.com. The domain contains two computers named Computer1 and Computer2 that run Windows 10. On Computer1, you need to run the

Invoke-Command cmdlet to execute several PowerShell commands on Computer2. What should you do first?

- A. On Computer2, run the Enable-PSRemoting cmdlet.
- B. On Computer2, add Computer1 to the Remote Management Users group.
- C. From Active Directory, configure the Trusted for Delegation setting for the computer account of Computer2.
- D. On Computer1, run the Hck-PSSession cmdlet.

Answer: C

NEW QUESTION 5

- (Exam Topic 4)

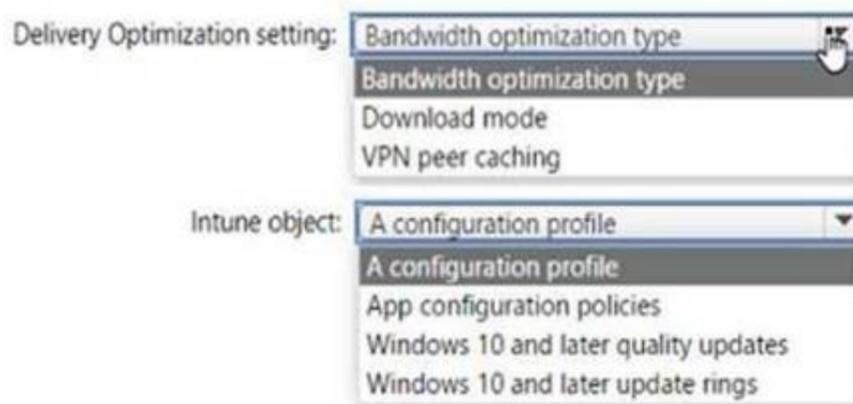

You have 100 Windows 10 devices enrolled in Microsoft Intune.

You need to configure the devices to retrieve Windows updates from the internet and from other computers on a local network.

Which Delivery Optimization setting should you configure, and which type of Intune object should you create? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Delivery Optimization setting: B. Download mode Intune object: A configuration profile

To configure the devices to retrieve Windows updates from the internet and from other computers on a local network, you need to configure the Download mode setting in a Delivery Optimization device configuration profile. This setting specifies how the devices use Delivery Optimization to download updates. You can choose from several options, such as HTTP only, LAN only, or Group. For example, you can set the Download mode to Group and specify a group ID for the devices to share updates among themselves and with other devices that have the same group ID. You can also set the Download mode to Internet to allow the devices to download updates from Microsoft or other devices on the internet that use Delivery Optimization. References: <https://docs.microsoft.com/en-us/mem/intune/configuration/delivery-optimization-windows>

NEW QUESTION 6

- (Exam Topic 4)

You create a Windows Autopilot deployment profile.

You need to configure the profile settings to meet the following requirements:

- Include the hardware serial number in the computer name.

Which two settings should you configure? To answer, select the appropriate settings in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Create profile ...

NEW QUESTION 7

- (Exam Topic 4)

You have a Microsoft 365 subscription that uses Microsoft Intune.

You plan to use Windows Autopilot to provision 25 Windows 11 devices. You need to meet the following requirements during device provisioning:

- Display the progress of app and profile deployments.
- Join the devices to Azure AD.

What should you configure to meet each requirement? To answer drag the appropriate settings to the correct requirements. Each setting may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Settings	Answer Area
CNAME Validation	Display the progress of app and profile deployments: <input type="text"/>
Co-management Settings	Join the devices to Azure AD: <input type="text"/>
Deployment Profiles

Answer Area

Display the progress of app and profile deployments:

Join the devices to Azure AD:

NEW QUESTION 8

- (Exam Topic 4)

You have a Microsoft Intune subscription that is configured to use a PFX certificate connector to an on-premises Enterprise certification authority (CA).

You need to use Intune to configure autoenrollment for Android devices by using public key pair (PKCS) certificates.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Answer Area

- Obtain the root certificate.
- From the Microsoft Endpoint Manager admin center, create a trusted certificate configuration profile.
- From the Enterprise CA, configure certificate managers.
- From the Microsoft Endpoint Manager admin center, configure enrollment restrictions.
- From the Microsoft Endpoint Manager admin center, create a PKCS certificate configuration profile.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, email Description automatically generated

Reference:

<https://docs.microsoft.com/en-us/mem/intune/protect/certificates-pfx-configure>

NEW QUESTION 9

- (Exam Topic 4)

You have a Windows 10 device named Device1 that is joined to Active Directory and enrolled in Microsoft Intune.

Device1 is managed by using Group Policy and Intune.

You need to ensure that the Intune settings override the Group Policy settings. What should you configure?

- A. a device configuration profile
- B. a device compliance policy
- C. an MDM Security Baseline profile
- D. a Group Policy Object (GPO)

Answer: A

Explanation:

A device configuration profile is a collection of settings that can be applied to devices enrolled in Microsoft Intune. You can use device configuration profiles to manage Windows 10 devices that are joined to Active Directory and enrolled in Intune. To ensure that the Intune settings override the Group Policy settings, you need to enable the policy CSP setting called MDMWinsOverGP in the device configuration profile. This setting will give precedence to the MDM policy over any conflicting Group Policy settings. References: [Us policy CSP settings to create custom device configuration profiles]

NEW QUESTION 10

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 11.

A user named User1 plans to use Remote Desktop to connect to Computer1. You need to ensure that the device of User1 is authenticated before the Remote Desktop connection is established and the sign in page appears. What should you do on Computer1?

- A. Turn on Reputation-based protection.
- B. Enable Network Level Authentication (NLA).
- C. Turn on Network Discovery.
- D. Configure the Remote Desktop Configuration service.

Answer: B

NEW QUESTION 10

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription that contains 100 iOS devices enrolled in Microsoft Intune. You need to deploy a custom line-of-business (LOB) app to the devices by using Intune.

Which extension should you select for the app package file?

- A. .intunemac
- B. apk
- C. .ipa
- D. .appx

Answer: C

Explanation:

iOS/iPadOS LOB apps: Select Line-of-business app as the app type, select the App package file, and then enter an iOS/iPadOS installation file with the extension .ipa.

Reference:

<https://docs.microsoft.com/en-us/mem/intune/apps/apps-add>

NEW QUESTION 11

- (Exam Topic 4)

You have the devices shown in the following table.

Name	Operating system	Description
Device1	32-bit version of Windows 10	Retired device
Device2	64-bit version of Windows 11	New device
Server1	Windows Server 2019	File server

You need to migrate app data from Device1 to Device2. The data must be encrypted and stored on Seryer1 during the migration.

Which command should you run on each device? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Device1: ▼

```
LoadState.exe \\server1\share1 /i:MigApp.xml /v:13 /decrypt /key:"mysecretKey"
LoadState.exe \\server1\share1 /i:MigApp.xml /v:8 /decrypt
LoadState.exe \\server1\share1 /i:MigDocs.xml /v:13 /decrypt/key:"mysecretKey"
ScanState.exe \\server1\share1 /i:MigApp.xml /config:Config.xml /v:13 /encrypt /key:"mysecretKey"
ScanState.exe \\server1\share1 /i:MigApp.xml /config:Config.xml /v:8 /encrypt
ScanState.exe \\server1\share1 /i:MigDocs.xml /v:13 /encrypt /key:"mysecretkey"
```

Device2: ▼

```
LoadState.exe \\server1\share1 /i:MigApp.xml /v:13 /decrypt /key:"mysecretKey"
LoadState.exe \\server1\share1 /i:MigApp.xml /v:8 /decrypt
LoadState.exe \\server1\share1 /i:MigDocs.xml /v:13 /decrypt/key:"mysecretKey"
ScanState.exe \\server1\share1 /i:MigApp.xml /config:Config.xml /v:13 /encrypt /key:"mysecretKey"
ScanState.exe \\server1\share1 /i:MigApp.xml /config:Config.xml /v:8 /encrypt

ScanState.exe \\server1\share1 /i:MigDocs.xml /v:13 /encrypt /key:"mysecretkey"
    
```

NEW QUESTION 12

- (Exam Topic 4)

You manage 1.000 devices by using Microsoft Intune. You review the Device compliance trends report. For how long will the report display trend data?

- A. 30 days
- B. 60 days
- C. 90 days
- D. 365 days

Answer: B

Explanation:

The Device compliance trends report shows the number of devices that are compliant, noncompliant, and not evaluated over time. The report displays trend data for the last 60 days by default, but you can change the time range to view data for the last 7, 14, or 30 days as well. The report does not show data for more than 60 days. References: [Device compliance trends report]

NEW QUESTION 13

- (Exam Topic 4)

You have a computer that runs Windows 10 and contains two local users named User1 and User2. You need to ensure that the users can perform the following actions:

- User 1 must be able to adjust the date and time.
- User2 must be able to clear Windows logs.

The solution must use the principle of least privilege.

To which group should you add each user? To answer, drag the appropriate groups to the correct users. Each group may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

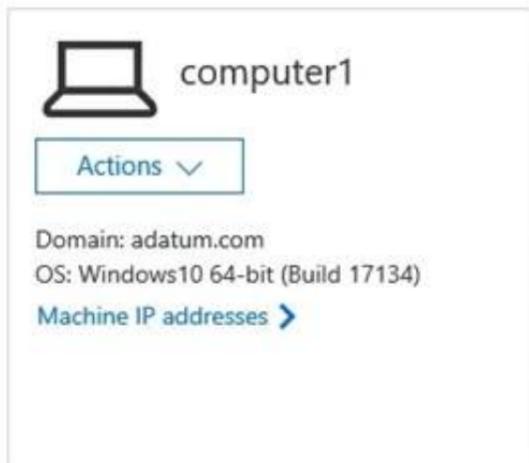

NEW QUESTION 17

- (Exam Topic 4)

Your company uses Microsoft Defender for Endpoint Microsoft Defender for Endpoint includes the device groups shown in the following table.

Rank	Name	Members
1	Group1	Tag Equals demo And OS In Windows 10
2	Group2	Tag Equals demo
3	Group3	Domain Equals adatum.com
4	Group4	Domain Equals adatum.com And OS In Windows 10
5	Group5	Name starts with COMP
Last	Ungrouped machines (default)	Not applicable

You onboard a computer to Microsoft Defender for Endpoint as shown in the following exhibit.

What is the effect of the Microsoft Defender for Endpoint configuration? To answer, select the appropriate options in the answer area.
 NOTE: Each correct selection is worth one point.

Answer Area

Computer1 will be a member of:

<input type="checkbox"/>	Group3 only
<input type="checkbox"/>	Group4 only
<input type="checkbox"/>	Group5 only
<input type="checkbox"/>	Group3, Group4, and Group5 only

If you add the tag demo to Computer1, Computer1 will be a member of:

<input type="checkbox"/>	Group1 only
<input type="checkbox"/>	Group2 only
<input type="checkbox"/>	Group1 and Group2 only
<input type="checkbox"/>	Group1, Group2, Group3, Group4, and Group5

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Computer1 will be a member of:

<input checked="" type="checkbox"/>	Group3 only
<input type="checkbox"/>	Group4 only
<input type="checkbox"/>	Group5 only
<input type="checkbox"/>	Group3, Group4, and Group5 only

If you add the tag demo to Computer1, Computer1 will be a member of:

<input checked="" type="checkbox"/>	Group1 only
<input type="checkbox"/>	Group2 only
<input type="checkbox"/>	Group1 and Group2 only
<input type="checkbox"/>	Group1, Group2, Group3, Group4, and Group5

NEW QUESTION 20

- (Exam Topic 4)

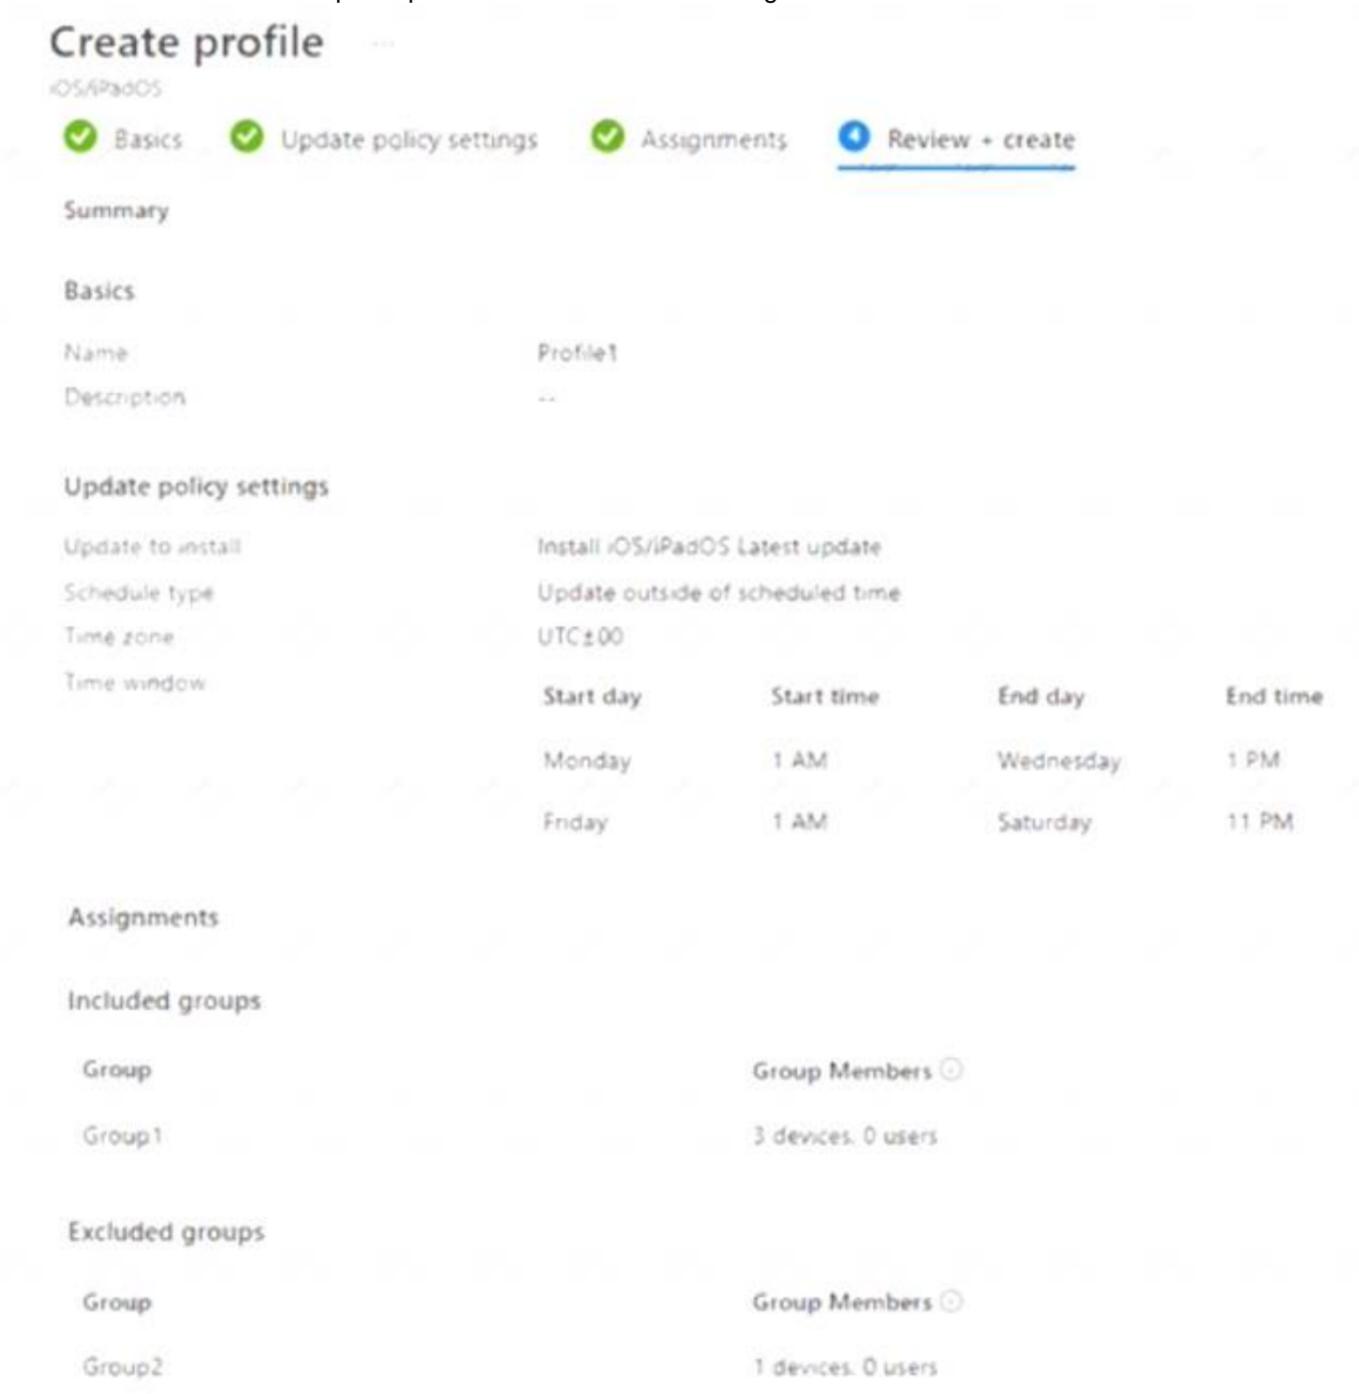

You have a Microsoft 365 ES subscription that uses Microsoft Intune. Devices are enrolled in Intune as shown in the following table.

Name	Platform	Enrolled by using
Device1	iOS	Apple Automated Device Enrollment (ADE)
Device2	iPadOS	Apple Automated Device Enrollment (ADE)
Device3	iPadOS	The Company Portal app

The devices are the members of groups as shown in the following table.

Name	Members
Group1	Device1, Device2, Device3
Group2	Device2

You create an JOS/iPadOS update profile as shown in the following exhibit.

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
If an iOS update becomes available on Tuesday at 5 AM, the update is installed on Device1 automatically on Wednesday.	<input type="radio"/>	<input type="radio"/>
If an iPadOS update becomes available on Thursday at 2 AM, the update is installed on Device2 automatically on Thursday.	<input type="radio"/>	<input type="radio"/>
If an iPadOS update becomes available on Friday at 10 PM, the update is installed on Device3 automatically on Sunday.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
If an iOS update becomes available on Tuesday at 5 AM, the update is installed on Device1 automatically on Wednesday.	<input type="checkbox"/>	<input type="checkbox"/>
If an iPadOS update becomes available on Thursday at 2 AM, the update is installed on Device2 automatically on Thursday.	<input type="checkbox"/>	<input type="checkbox"/>
If an iPadOS update becomes available on Friday at 10 PM, the update is installed on Device3 automatically on Sunday.	<input type="checkbox"/>	<input type="checkbox"/>

NEW QUESTION 25

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription.

You need to download a report that lists all the devices that are NOT enrolled in Microsoft Intune and are assigned an app protection policy.

What should you select in the Microsoft Endpoint Manager admin center?

- A. App
- B. and then App protection policies
- C. App
- D. and then Monitor
- E. Devices, and then Monitor
- F. Reports, and the Device compliance

Answer: A

Explanation:

App report: You can search by platform and app, and then this report will provide two different app protection statuses that you can select before generating the report. The statuses can be Protected or Unprotected.

Reference:

<https://docs.microsoft.com/en-us/mem/intune/apps/app-protection-policies-monitor>

NEW QUESTION 30

- (Exam Topic 4)

You have an Azure AD tenant named contoso.com that contains the devices shown in the following table.

Name	Deployed by using Windows Autopilot	Azure AD status	Enrolled in Microsoft Intune
Device1	No	Joined	No
Device2	No	Joined	Yes
Device3	Yes	Joined	Yes

The tenant contains the Azure AD groups shown in the following table.

Name	Member
Group1	Device1, Device2, Device3
Group2	Device2

You add an Autopilot deployment profile as shown in the following exhibit.

Create profile

Assignments

Included groups	Group1
Excluded groups	Group2

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

You have an Azure AD tenant named contoso.com that contains the devices shown in the following table.

Name	Deployed by using Windows Autopilot	Azure AD status	Enrolled in Microsoft Intune
Device1	No	Joined	No
Device2	No	Joined	Yes
Device3	Yes	Joined	Yes

The tenant contains the Azure AD groups shown in the following table.

Answer Area

Statements	Yes	No
If you reset Device1, the device will be deployed by using Autopilot	<input type="radio"/>	<input checked="" type="radio"/>
If you reset Device2, the device will be deployed by using Autopilot.	<input type="radio"/>	<input checked="" type="radio"/>
If you restart Device3, the device will be deployed by using Autopilot.	<input checked="" type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
If you reset Device1, the device will be deployed by using Autopilot	<input type="radio"/>	<input checked="" type="radio"/>
If you reset Device2, the device will be deployed by using Autopilot.	<input type="radio"/>	<input checked="" type="radio"/>
If you restart Device3, the device will be deployed by using Autopilot.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 35

- (Exam Topic 4)

You have an Azure Active Directory Premium Plan 2 subscription that contains the users shown in the following table.

Name	Member of	Assigned license
User1	Group1	Enterprise Mobility + Security E5
User2	Group2	Enterprise Mobility + Security E5

You purchase the devices shown in the following table.

Name	Type
Device1	Windows 10
Device2	Android

You configure automatic mobile device management (MDM) and mobile application management (MAM) enrollment by using the following settings:

- MDM user scope: Group1
- MAM user scope: Group2

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can enroll Device1 in Intune by using automatic enrollment.	<input type="radio"/>	<input type="radio"/>
User1 can enroll Device2 in Intune by using automatic enrollment.	<input type="radio"/>	<input type="radio"/>
User2 can enroll Device1 in Intune by using automatic enrollment.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Statements	Yes	No
User1 can enroll Device1 in Intune by using automatic enrollment.	<input checked="" type="radio"/>	<input type="radio"/>
User1 can enroll Device2 in Intune by using automatic enrollment.	<input type="radio"/>	<input checked="" type="radio"/>
User2 can enroll Device1 in Intune by using automatic enrollment.	<input type="radio"/>	<input checked="" type="radio"/>

NEW QUESTION 39

- (Exam Topic 4)

You are creating a device configuration profile in Microsoft Intune. You need to configure specific OMA-URI settings in the profile. Which profile type template should you use?

- A. Device restrictions (Windows 10 Team)
- B. Identity protection
- C. Custom
- D. Device restrictions

Answer: C

NEW QUESTION 41

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription and 100 computers that run Windows 10.

You need to deploy Microsoft Office Professional Plus 2019 to the computers by using Microsoft Office Deployment Tool (ODT).

What should you use to create a customization file for ODT?

- A. the Microsoft 365 admin center
- B. the Microsoft Intune admin center
- C. the Microsoft Purview compliance portal
- D. the Microsoft 365 Apps admin center

Answer: D

NEW QUESTION 43

- (Exam Topic 4)

You have a Microsoft Deployment Toolkit (MDT) deployment share named Share1. You add Windows 10 images to Share1 as shown in the following table.

Name	In WIM file	Description
Image1	Install1.wim	Default Windows 10 Pro image from the Windows 10 installation media
Image2	Install1.wim	Default Windows 10 Enterprise image from the Windows 10 installation media
Image3	Install2.wim	Default Windows 10 Pro for Workstations image from the Windows 10 installation media
Image4	Custom1.wim	Custom Windows 10 Enterprise image without any additional applications
Image5	Custom2.wim	Custom Windows 10 Enterprise image that includes custom applications

Which images can be used in the Standard Client Task Sequence, and which images can be used in the Standard Client Upgrade Task Sequence?
 NOTE: Each correct selection is worth one point.

Answer Area

Standard Client Task Sequence:

- Image3 only
- Image3, Image4, and Image5 only
- Image1, Image2, and Image3 only
- Image1, Image2, Image3, and Image4 only
- Image1, Image2, Image3, Image4, and Image5

Standard Client Upgrade Task Sequence:

- Image3 only
- Image3, Image4, and Image5 only
- Image1, Image2, and Image3 only
- Image1, Image2, Image3, and Image4 only
- Image1, Image2, Image3, Image4, and Image5

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Standard Client Task Sequence:

- Image3 only
- Image3, Image4, and Image5 only
- Image1, Image2, and Image3 only
- Image1, Image2, Image3, and Image4 only
- Image1, Image2, Image3, Image4, and Image5

Standard Client Upgrade Task Sequence:

- Image3 only
- Image3, Image4, and Image5 only
- Image1, Image2, and Image3 only
- Image1, Image2, Image3, and Image4 only
- Image1, Image2, Image3, Image4, and Image5

NEW QUESTION 46

- (Exam Topic 4)

Your company has devices enrolled in Microsoft Intune as shown in the following table.

Name	Platform
Device1	Windows 10
Device2	Android device administrator
Device3	iOS

In Microsoft Endpoint Manager, you define the company's network as a location named Location1. Which devices can use network location-based compliance policies?

- A. Device2 and Device3 only
- B. Device2 only
- C. Device1 and Device2 only
- D. Device1 only
- E. Device1, Device2, and Device3

Answer: E

Explanation:

Intune supported operating systems

Intune supports devices running the following operating systems (OS): iOS

Android Windows macOS

Note: View the device compliance settings for the different device platforms: Android device administrator

Android Enterprise iOS

macOS

Windows Holographic for Business Windows 8.1 and later

Windows 10/11

Reference: <https://docs.microsoft.com/en-us/mem/intune/fundamentals/supported-devices-browsers> <https://docs.microsoft.com/en-us/mem/intune/protect/device-compliance-get-started>

NEW QUESTION 49

- (Exam Topic 4)

You have 200 computers that run Windows 10. The computers are joined to Microsoft Azure Active Directory (Azure AD) and enrolled in Microsoft Intune.

You need to configure an Intune device configuration profile to meet the following requirements:

- > Prevent Microsoft Office applications from launching child processes.
- > Block users from transferring files over FTP.

Which two settings should you configure in Endpoint protection? To answer, select the appropriate settings in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Create Profile

<https://docs.microsoft.com/en-us/intune/endpoint-protection-windows-10>

NEW QUESTION 53

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription that contains 500 macOS devices enrolled in Microsoft Intune. You need to ensure that you can apply Microsoft Defender for Endpoint antivirus policies to the macOS

devices. The solution must minimize administrative effort.

What should you do?

- A. From the Microsoft Endpoint Manager admin center, create a configuration profile.
- B. From the Microsoft Endpoint Manager admin center, create a security baseline.
- C. Onboard the macOS devices to the Microsoft 365 compliance center.
- D. Install Defender for Endpoint on the macOS devices.

Answer: D

Explanation:

Just install, and use Defender for Endpoint on Mac. Reference:

<https://docs.microsoft.com/en-us/microsoft-365/security/defender-endpoint/microsoft-defender-endpoint-mac>

NEW QUESTION 58

- (Exam Topic 4)

You have a Microsoft 365 subscription that uses Microsoft Intune.

You need to ensure that you can deploy apps to Android Enterprise devices. What should you do first?

- A. Create a configuration profile.
- B. Add a certificate connector.
- C. Configure the Partner device management settings.
- D. Link your managed Google Play account to Intune.

Answer: D

NEW QUESTION 62

- (Exam Topic 4)

You have devices enrolled in Microsoft Intune as shown in the following table.

Name	Platform
Device1	Windows 10
Device2	Windows 11
Device3	Android
Device4	iOS

On which devices can you apply app configuration policies?

- A. Device2 only
- B. Device1 and Device2 only
- C. Device3 and Device4 only
- D. Device2, Device3, and Device4 only
- E. Device1, Device2, Device B, and Device4

Answer: D

Explanation:

The correct answer is D because app configuration policies can be applied to managed devices and managed apps¹. Managed devices are enrolled and managed by Intune, while managed apps are integrated with Intune App SDK or wrapped using the Intune Wrapping Tool¹. Device2, Device3, and Device4 are either enrolled in Intune or have managed apps installed, so they can receive app configuration policies². Device1 is not enrolled in any MDM solution and does not have any managed apps installed, so it cannot receive app configuration policies². References: 1: App configuration policies for Microsoft Intune | Microsoft Learn

<https://learn.microsoft.com/en-us/mem/intune/apps/app-configuration-policies-overview> 2: Policy sets - Microsoft Intune | Microsoft Learn

<https://learn.microsoft.com/en-us/mem/intune/fundamentals/policy-sets>

NEW QUESTION 65

- (Exam Topic 4)

You have a Microsoft 365 subscription that uses Microsoft Intune Suite. You use Microsoft Intune to manage devices.

You use Windows Autopilot to deploy Windows 11 to devices.

A support engineer reports that when a deployment fails, they cannot collect deployment logs from failed device.

You need to ensure that when a deployment fails, the deployment logs can be collected.

What should you configure?

- A. the automatic enrollment settings
- B. the Windows Autopilot deployment profile
- C. the enrollment status page (ESP) profile

D. the device configuration profile

Answer: B

NEW QUESTION 68

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains a computer named Computer1 that runs Windows 8.1.

Computer1 has apps that are compatible with Windows 10.

You need to perform a Windows 10 in-place upgrade on Computer1.

Solution: You copy the Windows 10 installation media to a network share. You start Computer1 from Windows PE (WinPE), and then you run setup.exe from the network share.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 69

- (Exam Topic 4)

Your company uses Microsoft Intune to manage devices.

You need to ensure that only Android devices that use Android work profiles can enroll in Intune. Which two configurations should you perform in the device enrollment restrictions? Each correct answer presents part of the solution.

NOTE Each correct selection is worth one point.

- A. From Platform Settings, set Android device administrator Personally Owned to Block.
- B. From Platform Settings, set Android Enterprise (work profile) to Allow.
- C. From Platform Settings, set Android device administrator Personally Owned to Allow
- D. From Platform Settings, set Android device administrator to Block.

Answer: AB

Explanation:

To ensure that only Android devices that use Android work profiles can enroll in Intune, you need to perform two configurations in the device enrollment restrictions. First, you need to set Android device administrator Personally Owned to Block. This prevents users from enrolling personal Android devices that use device administrator mode. Second, you need to set Android Enterprise (work profile) to Allow. This allows users to enroll corporate-owned or personal Android devices that use work profiles. References: <https://docs.microsoft.com/en-us/mem/intune/enrollment/enrollment-restrictions-set>

NEW QUESTION 73

- (Exam Topic 4)

You have a Microsoft Intune deployment that contains the resources shown in the following table.

Name	Type	Platform
Comply1	Device compliance policy	Windows 10 and later
Comply2	Device compliance policy	iOS/iPadOS
CA1	Conditional Access policy	Not applicable
Conf1	Device configuration profile	Windows 10 and later
Office1	Office app policy	Not applicable

You create a policy set named Set1 and add Comply1 to Set1. Which additional resources can you add to Set1?

- A. Conf1 only
- B. Comply2 only
- C. Comply2 and Conf1 only
- D. CA1, Conf1, and Office 1 only
- E. Comply2, CA1, Conf1, and Office1

Answer: B

NEW QUESTION 78

- (Exam Topic 4)

You have the Microsoft Deployment Toolkit (MDT) installed in three sites as shown in the following table.

MDT instance name	Site	Default gateway
MDT1	New York	10.1.1.0/24
MDT2	London	10.5.5.0/24
MDT3	Dallas	10.4.4.0/24

You use Distributed File System (DFS) Replication to replicate images in a share named Production. You configure the following settings in the Bootstrap.ini file.

[Settings]

Priority=DefaultGateway, Default

[DefaultGateway]

10.1.1.1=NewYork

10.5.5.1=London

[NewYork]

DeployRoot=\\MDT1\Production\$

[London]

DeployRoot=\\MDT2\Production\$

KeyboardLocale=en-gb -

[Default]

DeployRoot=\\MDT3\Production\$

KeyboardLocale=en-us -

You plan to deploy Windows 10 to the computers shown in the following table.

Name	IP address
LT1	10.1.1.240
DT1	10.5.5.115
TB1	10.2.2.193

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements

Yes

No

TB1 will download the image from MDT3.

DT1 will have a KeyboardLocale of en-gb.

LT1 will download the image from MDT1.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Statements

Yes

No

TB1 will download the image from MDT3.

DT1 will have a KeyboardLocale of en-gb.

LT1 will download the image from MDT1.

NEW QUESTION 80

- (Exam Topic 3)

To which devices do Policy1 and Policy2 apply? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Policy1:

	M
Device1 only	
Device2 only	
Device3 only	
Device4 only	
Device2 and Device3 only	
Device1 and Device3 only	
Device1, Device2, and Device 3	

Policy2:

	M
Device1 only	
Device2 only	
Device3 only	
Device4 only	
Device2 and Device3 only	
Device1 and Device3 only	
Device1, Device2, and Device 3	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:
<https://docs.microsoft.com/en-us/intune/device-profile-assign>

NEW QUESTION 85

- (Exam Topic 3)

You need to meet the technical requirements for the IT department. What should you do first?

- A. From the Azure Active Directory blade in the Azure portal, enable Seamless single sign-on.
- B. From the Configuration Manager console, add an Intune subscription.
- C. From the Azure Active Directory blade in the Azure portal, configure the Mobility (MDM and MAM) settings.
- D. From the Microsoft Intune blade in the Azure portal, configure the Windows enrollment settings.

Answer: C

Explanation:

Reference:
<https://docs.microsoft.com/en-us/sccm/comanage/tutorial-co-manage-clients>

NEW QUESTION 87

- (Exam Topic 3)

You need to meet the technical requirements for the iOS devices. Which object should you create in Intune?

- A. A compliance policy
- B. An app protection policy
- C. A Deployment profile
- D. A device configuration profile

Answer: D

Explanation:

References:
<https://docs.microsoft.com/en-us/intune/device-restrictions-configure> <https://docs.microsoft.com/en-us/intune/device-restrictions-ios>

NEW QUESTION 90

- (Exam Topic 2)

You need to capture the required information for the sales department computers to meet the technical requirements. Which Windows PowerShell command should you run first?

- A. Install-Module WindowsAutoPilotIntune
- B. Install-Script Get-WindowsAutoPilotInfo
- C. Import-AutoPilotCSV
- D. Get-WindowsAutoPilotInfo

Answer: B

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/existing-devices>

"This topic describes how to convert Windows 7 or Windows 8.1 domain-joined computers to Windows 10 devices joined to either Azure Active Directory or Active Directory (Hybrid Azure AD Join) by using Windows Autopilot"

NEW QUESTION 91

- (Exam Topic 2)

What should you use to meet the technical requirements for Azure DevOps?

- A. An app protection policy
- B. Windows Information Protection (WIP)
- C. Conditional access
- D. A device configuration profile

Answer: C

Explanation:

References:

<https://docs.microsoft.com/en-us/azure/devops/organizations/accounts/manage-conditional-access?view=azure-devops>

NEW QUESTION 93

- (Exam Topic 1)

User1 and User2 plan to use Sync your settings.

On which devices can the users use Sync your settings? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

User1:	<input type="checkbox"/> No devices <input type="checkbox"/> Device4 and Device5 only <input type="checkbox"/> Device1, Device2 and Device3 only <input type="checkbox"/> Device1, Device2, Device3, Device4, and Device5
User2:	<input type="checkbox"/> No devices <input type="checkbox"/> Device4 and Device5 only <input type="checkbox"/> Device1, Device2 and Device3 only <input type="checkbox"/> Device1, Device2, Device3, Device4, and Device5

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, email Description automatically generated

Reference:

<https://www.jeffgilb.com/managing-local-administrators-with-azure-ad-and-intune/>

NEW QUESTION 95

- (Exam Topic 1)

Which devices are registered by using the Windows Autopilot deployment service?

- A. Device1 only
- B. Device3 only
- C. Device1 and Device3 only
- D. Device1, Device2, and Device3

Answer: C

Explanation:

Scenario: Windows Autopilot Configuration Assignments

Included groups: Group1

Excluded groups: Group2 Device1 is member of Group1.

Device2 is member of Group1 and member of Group2. Device3 is member of Group1.

Group1 and Group2 have a Membership type of Assigned.

Exclusion takes precedence over inclusion in the following same group type scenarios. Reference: <https://learn.microsoft.com/en-us/mem/intune/apps/apps-inc-exl-assignments>

NEW QUESTION 97

- (Exam Topic 1)

Which users can purchase and assign App1?

- A. User3 only
- B. User1 and User3 only
- C. User1, User2, User3, and User4
- D. User1, User3, and User4 only

E. User3 and User4 only

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/microsoft-store/acquire-apps-microsoft-store-for-business> <https://docs.microsoft.com/en-us/microsoft-store/assign-apps-to-employees>

NEW QUESTION 100

- (Exam Topic 1)

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
If User1 adds a shortcut to the desktop of Device1, when User1 signs in to Device3, the same shortcut will appear on the desktop.	<input type="radio"/>	<input type="radio"/>
If User1 sets the desktop background to blue on Device2, when User1 signs in to Device4, the desktop background will be blue.	<input type="radio"/>	<input type="radio"/>
If User2 increases the size of the font in the command prompt of Device2, when User2 signs in to Device3, the command prompt will show the increased font size.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Text, letter Description automatically generated

NEW QUESTION 103

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription that contains 100 iOS devices enrolled in Microsoft Intune. You need to ensure that notifications of iOS updates are deferred for 30 days after the updates are released. What should you create?

- A. a device configuration profile based on the Device features template
- B. a device configuration profile based on the Device restrictions template
- C. an update policy for iOS/iPadOS
- D. an iOS app provisioning profile

Answer: C

Explanation:

Manage iOS/iPadOS software update policies in Intune, delay visibility of software updates.

When you use update policies for iOS, you might have need to delay visibility of an iOS software update. Reasons to delay visibility include:

Prevent users from updating the OS manually

To deploy an older update while preventing users from installing a more recent one

To delay visibility, deploy a device restriction template that configures the following settings: Defer software updates = Yes

This doesn't affect any scheduled updates. It represents days before software updates are visible to end users after release.

Delay default visibility of software updates = 1 to 90 90 days is the maximum delay that Apple supports.

Reference: <https://docs.microsoft.com/en-us/mem/intune/protect/software-updates-ios>

NEW QUESTION 107

- (Exam Topic 4)

You have computer that run Windows 10 and connect to an Azure Log Analytics workspace. The workspace is configured to collect all available events from Windows event logs. The computers have the logged events shown in the following table.

Event ID	Log	Type	Computer
1	Application	Success	Computer1
2	System	Information	Computer1
3	Security	Audit Success	Computer2
4	System	Error	Computer2

Which events are collected in the Log Analytics workspace?

- A. 1 only
- B. 2 and 3 only
- C. 1 and 3 only
- D. 1, 2, and 4 on
- E. 1, 2, 3, and 4

Answer: E

Explanation:

All events from Windows event logs are collected in the Log Analytics workspace, regardless of the event level or source. Therefore, events 1, 2, 3, and 4 are all collected in the workspace. References: <https://docs.microsoft.com/en-us/azure/azure-monitor/agents/data-sources-windows-events>

NEW QUESTION 112

- (Exam Topic 4)

You have an Azure Active Directory (Azure AD) tenant named contoso.com that contains a user named User1. User1 has a user principal name (UPN) of user1@contoso.com.

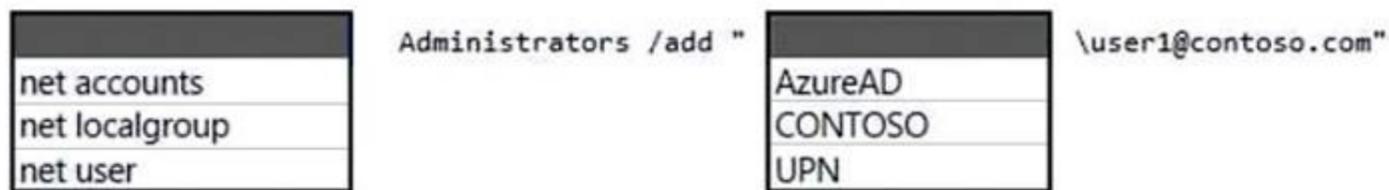

You join a Windows 10 device named Client1 to contoso.com.

You need to add User1 to the local Administrators group of Client1.

How should you complete the command? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

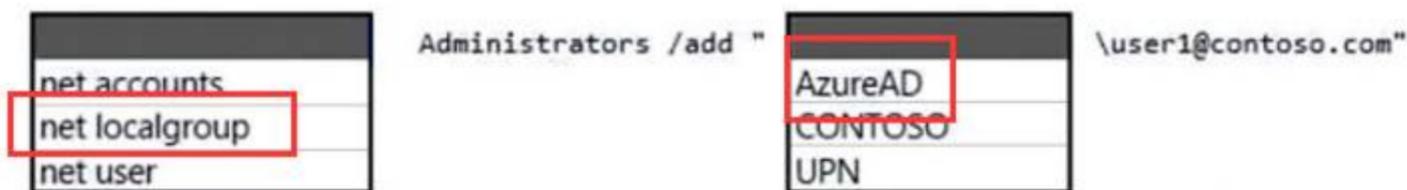

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

NEW QUESTION 114

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription that contains a user named User1 and a web app named App1. App1 must only accept modern authentication requests. You plan to create a Conditional Access policy named CAPolicy1 that will have the following settings:

- Assignments
 - Users or workload identities: User1
 - Cloud apps or actions: App1
- Access controls
 - Grant: Block access

You need to block only legacy authentication requests to App1. Which condition should you add to CAPolicy1?

- A. Filter for devices
- B. Device platforms
- C. User risk
- D. Sign-in risk
- E. Client apps

Answer: E

Explanation:

you can use the client apps condition to block legacy authentication requests to App1. Legacy authentication is a term that refers to authentication protocols that do not support modern authentication features such as multi-factor authentication or conditional access. Examples of legacy authentication protocols include Basic Authentication, Digest Authentication, NTLM, and Kerberos. To block legacy authentication requests, you need to configure the client apps condition to include Other clients, which covers any client that uses legacy authentication protocols. References: 1: Conditional Access: Block legacy authentication | Microsoft Learn <https://learn.microsoft.com/en-us/mem/identity-protection/conditional-access/block-legacy-authentication> 2:

What is legacy authentication? | Microsoft Learn

<https://learn.microsoft.com/en-us/mem/identity-protection/conditional-access/legacy-authentication> 3: Client apps condition in Azure Active Directory Conditional Access | Microsoft Learn <https://learn.microsoft.com/en-us/mem/identity-protection/conditional-access/client-apps-condition>

NEW QUESTION 117

- (Exam Topic 4)

You have two computers named Computer1 and Computer2 that run Windows 10. Computer2 has Remote Desktop enabled. From Computer1, you connect to Computer2 by using Remote Desktop Connection. You need to ensure that you can access the local drives on Computer1 from within the Remote Desktop session. What should you do?

- A. From Computer 2, configure the Remote Desktop settings.
- B. From Windows Defender Firewall on Computer 1, allow Remote Desktop.
- C. From Windows Defender Firewall on Computer 2, allow File and Printer Sharing.
- D. From Computer1, configure the Remote Desktop Connection settings.

Answer: D

NEW QUESTION 122

- (Exam Topic 4)

You have a Microsoft 365 tenant that uses Microsoft Intune to manage personal and corporate devices. The tenant contains three Windows 10 devices as shown in the following exhibit.

Name	Enabled	OS	Version	Join Type	Owner	MDM	Compliant
LON-CL2	Yes	Windows	10.0.17763.615	Azure AD registered	User2	Microsoft Intune	Yes
LON-CL4	Yes	Windows	10.0.17763.107	Azure AD joined	User1	Microsoft Intune	Yes

How will Intune classify each device after the devices are enrolled in Intune automatically? To answer, select the appropriate options in the answer area.
 NOTE: Each correct selection is worth one point.

Answer Area

Identified by Intune as a personal device:

▼

LON-CL2 only

LON-CL4 only

Both LON-CL2 and LON-CL4

Neither LON-CL2 or LON-CL4

Identified by Intune as a corporate device:

▼

LON-CL2 only

LON-CL4 only

Both LON-CL2 and LON-CL4

Neither LON-CL2 or LON-CL4

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Table Description automatically generated

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/devices/concept-azure-ad-join> <https://docs.microsoft.com/en-us/azure/active-directory/devices/concept-azure-ad-register>

NEW QUESTION 123

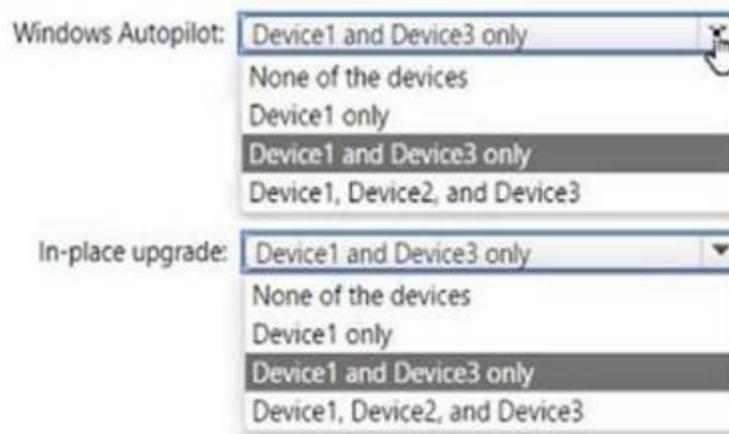

- (Exam Topic 4)

You have a Microsoft 365 subscription that uses Microsoft Intune Suite. You use Microsoft Intune to manage devices. Azure AD joined Windows devices enroll automatically in Intune. You have the devices shown in the following table.

Name	Operating system	Azure AD joined	Line-of-business (LOB) apps installed
Device1	64-bit version of Windows 10 Pro	Yes	No
Device2	32-bit version of Windows 10 Pro	No	Yes
Device3	64-bit version of Windows 10 Pro	No	Yes

You are preparing to upgrade the devices to Windows 11. All the devices are compatible with Windows 11. You need to evaluate Windows Autopilot and in-place upgrade as deployment methods to implement Windows 11 Pro on the devices, while retaining all user settings and applications. Which devices can be upgraded by using each method? To answer, select the appropriate options in the answer area.
 NOTE: Each correct selection is worth one point.

Answer Area

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

NEW QUESTION 128

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription that contains 150 hybrid Azure AD joined Windows devices. All the devices are enrolled in Microsoft Intune. You need to configure Delivery Optimization on the devices to meet the following requirements:

- Allow downloads from the internet and from other computers on the local network.
- Limit the percentage of used bandwidth to 50. What should you use?

- A. a configuration profile
- B. a Windows Update for Business Group Policy setting
- C. a Microsoft Peer-to-Peer Networking Services Group Policy setting
- D. an Update ring for Windows 10 and later profile

Answer: A

Explanation:

A configuration profile is the correct answer because it allows you to configure Delivery Optimization settings for Windows devices in Intune. You can specify the download mode, bandwidth limit, caching options, and more. A configuration profile is a template that contains one or more settings that you can apply to groups of devices. References:

- > [Windows 10 Delivery Optimization settings for Intune - Microsoft Intune | Microsoft Learn](#)
- > [Delivery Optimization settings in Microsoft Intune](#)

NEW QUESTION 130

- (Exam Topic 4)

You have 1,000 computers that run Windows 10 and are members of an Active Directory domain. You need to capture the event logs from the computers to Azure.

What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Azure service to provision:

<input type="checkbox"/>	An Azure Storage account
<input type="checkbox"/>	Azure Cosmos DB
<input type="checkbox"/>	Azure SQL Database
<input type="checkbox"/>	Log Analytics

Action to perform on the computers:

<input type="checkbox"/>	Create a collector-initiated subscription
<input type="checkbox"/>	Install the Microsoft Monitoring Agent
<input type="checkbox"/>	Enroll in Microsoft Intune
<input type="checkbox"/>	Register to Azure Active Directory (Azure AD)

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Azure service to provision:

<input type="checkbox"/>	An Azure Storage account
<input type="checkbox"/>	Azure Cosmos DB
<input type="checkbox"/>	Azure SQL Database
<input checked="" type="checkbox"/>	Log Analytics

Action to perform on the computers:

<input type="checkbox"/>	Create a collector-initiated subscription
<input checked="" type="checkbox"/>	Install the Microsoft Monitoring Agent
<input type="checkbox"/>	Enroll in Microsoft Intune
<input type="checkbox"/>	Register to Azure Active Directory (Azure AD)

NEW QUESTION 133

- (Exam Topic 4)

You have a Microsoft 365 subscription that uses Microsoft Intune and contains the users shown in the following table.

Name	Member of	License
User1	Group1	None
User2	Group1	Microsoft 365 E3
User3	Group2	Microsoft 365 E5

Group2 has been assigned in the Enrollment Status Page. You have the devices shown in the following table.

Name	Operating system	Department
Device1	Windows 10 Pro	Marketing
Device2	Windows 11 Home	Research
Device3	Windows 10 Pro	Marketing

You capture and upload the hardware IDs of the devices in the marketing department. You configure Windows Autopilot. For each of the following statements, select Yes if the statement is true. Otherwise select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
User1 can complete the Autopilot process on Device1.	<input type="checkbox"/>	<input type="checkbox"/>
User2 can complete the Autopilot process on Device1.	<input type="checkbox"/>	<input type="checkbox"/>
User3 can view device setup information during the enrollment phase of Device1.	<input type="checkbox"/>	<input type="checkbox"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
User1 can complete the Autopilot process on Device1.	<input type="checkbox"/>	<input checked="" type="checkbox"/>
User2 can complete the Autopilot process on Device1.	<input checked="" type="checkbox"/>	<input type="checkbox"/>
User3 can view device setup information during the enrollment phase of Device1.	<input type="checkbox"/>	<input checked="" type="checkbox"/>

NEW QUESTION 135

- (Exam Topic 4)

You have groups that use the Dynamic Device membership type as shown in the following table.

Name	Syntax
Group1	(device.deviceOwnership -eq "Company")
Group2	(device.deviceOwnership -eq "Personal")

You are deploying Microsoft 365 apps.

You have devices enrolled in Microsoft Intune as shown in the following table.

Name	Ownership	Platform
LT1	Company	Windows 10 Enterprise x64
LT2	Personal	Windows 10 Enterprise x64
LT3	Company	MacOS Big Sur

In the Microsoft Endpoint Manager admin center, you create a Microsoft 365 Apps app as shown in the exhibit. (Click the Exhibit tab.)

App Information [Edit](#)

Name	Microsoft 365 Apps for Windows 10
Description	Microsoft 365 Apps for Windows 10
Publisher	Microsoft
Category	Productivity
Show this as a featured app in the Company Portal	No
Information URL	https://products.office.com/en-us/explore-office-for-home
Privacy URL	https://privacy.microsoft.com/en-US/privacystatement
Developer	Microsoft
Owner	Microsoft
Notes	...
Logo	
Architecture	Teams, Word
Update channel	64-bit
Remove other versions	Current Channel
Version to install	Yes
Use shared computer activation	Latest
Accept the Microsoft Software License	No
Teams on behalf of users	No
Install background service for Microsoft Search in Bing	No
Apps to be installed as part of the suite	1 language(s) selected

Assignments [Edit](#)

Group mode	Group
<input type="checkbox"/> Required <input checked="" type="checkbox"/> Included	Group1
Available for enrolled devices	

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
 NOTE: Each correct selection is worth one point.

Statements	Yes	No
LT1 will have Microsoft Office 365 installed	<input type="radio"/>	<input type="radio"/>
LT2 will have Microsoft Office 365 installed	<input type="radio"/>	<input type="radio"/>
LT3 will have Microsoft Office 365 installed	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

Reference:

<https://docs.microsoft.com/en-us/mem/intune/apps/apps-add-office365>

<https://docs.microsoft.com/en-us/mem/intune/apps/apps-deploy> <https://docs.microsoft.com/en-us/mem/intune/apps/apps-add>

NEW QUESTION 137

- (Exam Topic 4)

You have an Azure AD tenant and 100 Windows 10 devices that are Azure AD joined and managed by using Microsoft Intune. You need to configure Microsoft Defender Firewall and Microsoft Defender Antivirus on the devices. The solution must minimize administrative effort. Which two actions should you perform? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. To configure Microsoft Defender Antivirus, create a Group Policy Object (GPO) and configure the Windows Defender Antivirus settings.
- B. To configure Microsoft Defender Firewall, create a device configuration profile and configure the Device restrictions settings.
- C. To configure Microsoft Defender Antivirus, create a device configuration profile and configure the Endpoint protection settings.
- D. To configure Microsoft Defender Antivirus, create a device configuration profile and configure the Device restrictions settings.
- E. To configure Microsoft Defender Firewall, create a device configuration profile and configure the Endpoint protection settings.
- F. To configure Microsoft Defender Firewall, create a Group Policy Object (GPO) and configure Windows Defender Firewall with Advanced Security.

Answer: CE

Explanation:

To configure Microsoft Defender Firewall and Microsoft Defender Antivirus on Azure AD joined devices that are managed by Intune, you need to create a device configuration profile and configure the Endpoint protection settings. You can use this profile to configure various settings for firewall and antivirus protection on the devices. References:

<https://docs.microsoft.com/en-us/mem/intune/protect/endpoint-protection-windows-10>

NEW QUESTION 142

- (Exam Topic 4)

You have a Microsoft 365 subscription that uses Microsoft Intune Suite. You use Microsoft Intune to manage devices. You need to review the startup times and restart frequencies of the devices. What should you use?

- A. Azure Monitor
- B. intune Data Warehouse
- C. Microsoft Defender for Endpoint
- D. Endpoint analytics

Answer: D

Explanation:

Endpoint analytics is a feature of Microsoft Intune that provides insights into the performance and health of devices. You can use endpoint analytics to review the startup times and restart frequencies of the devices, as well as other metrics such as sign-in times, battery life, app reliability, and software inventory. References: <https://docs.microsoft.com/en-us/mem/analytics/overview>

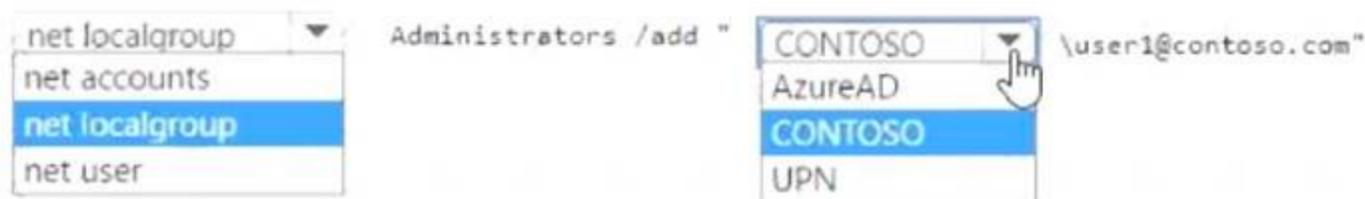

NEW QUESTION 147

- (Exam Topic 4)

You have an Azure AD tenant named contoso.com that contains a user named User1. User1 has a user principal name (UPN) of user1@contoso.com. You join a Windows 11 device named Client 1 to contoso.com. You need to add User1 to the local Administrators group of Client1.

How should you complete the command? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

`net localgroup Administrators /add "AzureAD\user1@contoso.com"`

This command will add the Azure AD user with the UPN of user1@contoso.com to the local Administrators group of the device1. You need to use the AzureAD prefix and double backslashes to specify the user's domain2. You also need to enclose the user's name in quotation marks if it contains special characters like @1.

You can run this command from an elevated command prompt on Client1, or remotely by using PowerShell or other tools1. You can also use the Intune Role Administrator role or the Additional local administrators on all Azure AD joined devices setting to manage the local administrators group on Azure AD joined devices34.

NEW QUESTION 152

- (Exam Topic 4)

You have a Microsoft 365 subscription that contains 1,000 iOS devices and includes Microsoft Intune. You need to prevent the printing of corporate data from managed apps on the devices, should you configure?

- A. an app configuration policy
- B. a security baseline
- C. an app protection policy
- D. an iOS app provisioning profile

Answer: C

Explanation:

An app protection policy is a set of rules that controls how data is accessed and handled by managed apps on mobile devices. App protection policies can prevent the printing of corporate data from managed apps on iOS devices by using the Restrict cut, copy, and paste with other apps setting. This setting can be configured to block printing from the iOS share menu. An app configuration policy is used to customize the behavior of a managed app, such as specifying a VPN profile or a web link. A security baseline is a collection of recommended security settings for Windows 10 devices that are managed by Intune. An iOS app provisioning profile is a file that contains information about the app's identity, entitlements, and distribution method

NEW QUESTION 153

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription that contains 500 macOS devices enrolled in Microsoft Intune. You need to ensure that you can apply Microsoft Defender for Endpoint antivirus policies to the macOS

devices. The solution must minimize administrative effort.
 What should you do?

- A. Onboard the macOS devices to the Microsoft Purview compliance portal.
- B. From the Microsoft Intune admin center, create a security baseline.
- C. Install Defender for Endpoint on the macOS devices.
- D. From the Microsoft Intune admin center, create a configuration profile.

Answer: C

Explanation:

To apply Microsoft Defender for Endpoint antivirus policies to the macOS devices, you need to install Defender for Endpoint on the devices. You can use Intune to deploy a script that installs Defender for Endpoint on macOS devices. After installation, you can use Intune to create and assign antivirus policies to the devices.

References:

<https://docs.microsoft.com/en-us/windows/security/threat-protection/microsoft-defender-atp/mac-install-with-int>

NEW QUESTION 155

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription.

You create a new update rings policy named Policy1 as shown in the following exhibit.

Update ring settings [Edit](#)

Update settings

Microsoft product updates	Allow
Windows drivers	Allow
Quality update deferral period (days)	0
Feature update deferral period (days)	30
Upgrade Windows 10 devices to Latest Windows 11 release	No
Set feature update uninstall period (2 - 60 days)	10
Servicing channel	General Availability channel
User experience settings	
Automatic update behavior	Auto install at maintenance time
Active hours start	8 AM
Active hours end	5 PM
Restart checks	Allow
Option to pause Windows updates	Enable
Option to check for Windows updates	Enable
Change notification update level	Use the default Windows Update notifications
Use deadline settings	Allow
Deadline for feature updates	30
Deadline for quality updates	0
Grace period	0
Auto reboot before deadline	No

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point,

Answer Area

Updates that contain fixes and improvements to existing Windows functionality **[answer choice]**.

Updates that contain new Windows functionality will be installed within **[answer choice]** of release.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

*Updates that contain fixes and improvements to existing Windows functionality can be deferred for 30 days. This is because the update rings policy named Policy1 has the “Quality updates deferral period (days)” setting set to 30. This means that quality updates, which include fixes and improvements to existing Windows functionality, can be deferred for up to 30 days from the date they are released by Microsoft. After 30 days, the devices will automatically install the quality updates. References:

<https://docs.microsoft.com/en-us/mem/intune/protect/windows-update-for-business-configure>

*Updates that contain new Windows functionality will be installed within 60 days of release.

This is because the update rings policy named Policy1 has the “Feature updates deferral period (days)” setting set to 60. This means that feature updates, which include new Windows functionality, can be deferred for up to 60 days from the date they are released by Microsoft. After 60 days, the devices will automatically install the feature updates. References:

<https://docs.microsoft.com/en-us/mem/intune/protect/windows-update-for-business-configure>

NEW QUESTION 158

- (Exam Topic 4)

You have an on-premises server named Server1 that hosts a Microsoft Deployment Toolkit (MDT) deployment share named MDT1. You need to ensure that MDT1 supports multicast deployments. What should you install on Server1?

- A. Multipath I/O (MPIO)
- B. Multipoint Connector
- C. Windows Deployment Services (WDS)
- D. Windows Server Update Services (WSUS)

Answer: C

NEW QUESTION 162

- (Exam Topic 4)

You have a Microsoft 365 subscription that contains 1,000 Windows 11 devices enrolled in Microsoft Intune. You plan to use Intune to deploy an application named App1 that contains multiple installation files. What should you do first?

- A. Prepare the contents of App1 by using the Microsoft Win32 Content Prep Tool.
- B. Create an Android application package (APK).
- C. Upload the contents of App1 to Intune.
- D. Install the Microsoft Deployment Toolkit (MDT).

Answer: A

NEW QUESTION 165

- (Exam Topic 4)

Your company has computers that run Windows 10 and are Microsoft Azure Active Directory (Azure AD)-joined.

The company purchases an Azure subscription.

You need to collect Windows events from the Windows 10 computers in Azure. The solution must enable you to create alerts based on the collected events.

What should you create in Azure and what should you configure on the computers? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Resource to create in Azure:

▼
An Azure event hub
An Azure Log Analytics workspace
An Azure SQL database
An Azure Storage account

Configuration to perform on the computers:

▼
Configure the Event Collector service
Create an event subscription
Install the Microsoft Monitoring Agent

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

A screenshot of a computer Description automatically generated

<https://docs.microsoft.com/en-us/azure/azure-monitor/platform/log-analytics-agent>

NEW QUESTION 169

- (Exam Topic 4)

You have a Microsoft 365 subscription that contains 1,000 Android devices enrolled in Microsoft Intune. You create an app configuration policy that contains the following settings:

- Device enrollment type: Managed devices
- Profile Type: All Profile Types
- Platform: Android Enterprise

Which two types of apps can be associated with the policy? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. Built-in Android app
- B. Managed Google Play store app
- C. Web link
- D. Android Enterprise system app
- E. Android store app

Answer: BD

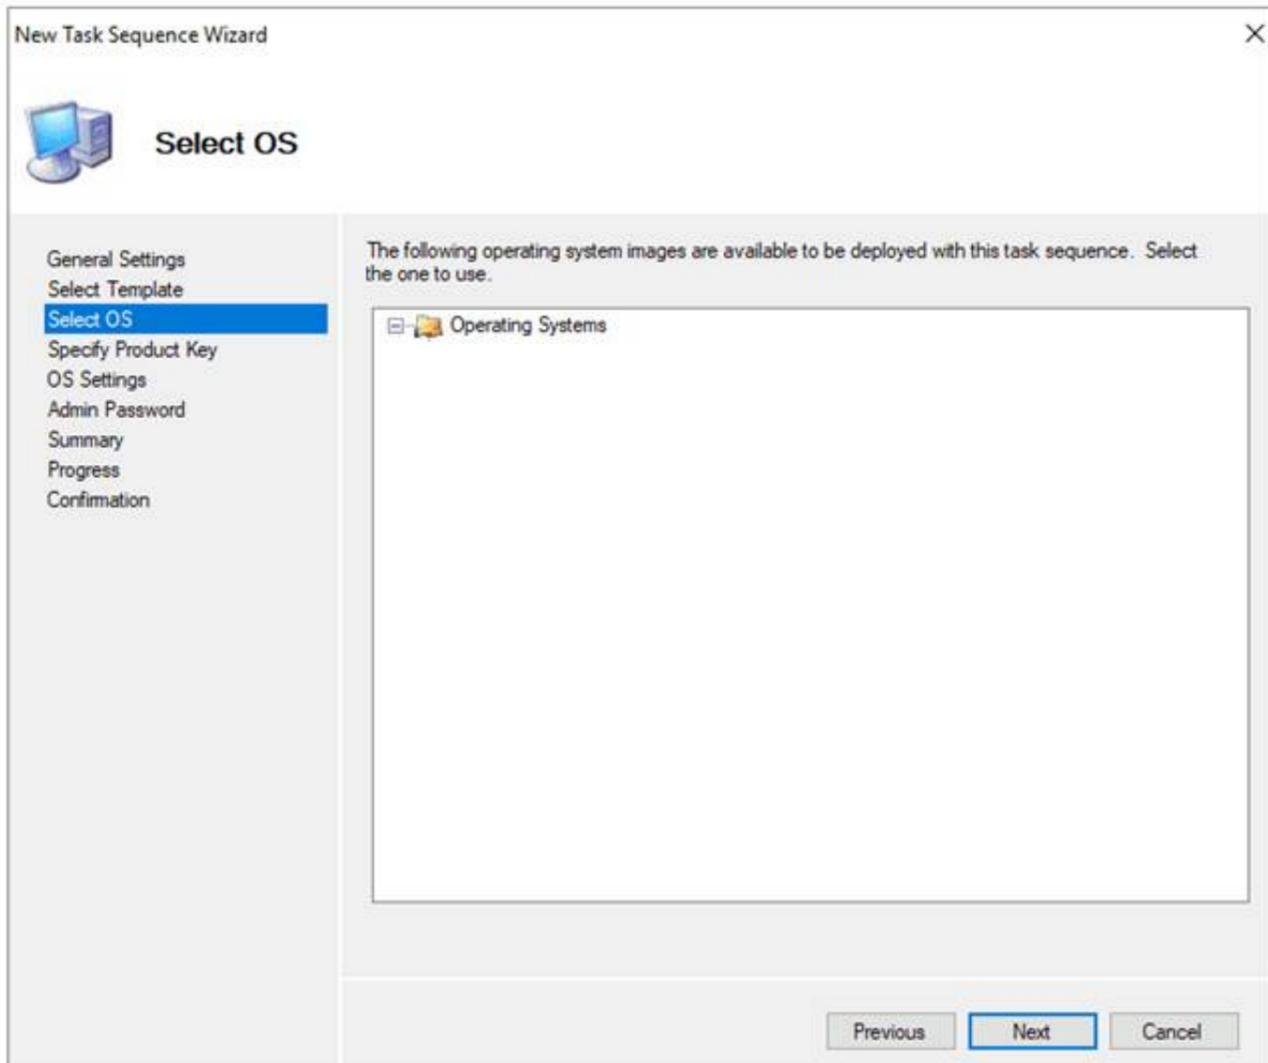

NEW QUESTION 172

- (Exam Topic 4)

You have a Microsoft Deployment Toolkit (MDT) deployment share.

From the Deployment Workbench, you open the New Task Sequence Wizard and select the Standard Client Upgrade Task Sequence task sequence template.

You discover that there are no operating system images listed on the Select OS page as shown in the following exhibit.

You need to be able to select an operating system image to perform a Windows 11 in-place upgrade. What should you do?

- A. Enable monitoring for the deployment share.
- B. Import a full set of source files.
- C. Import a custom image file.
- D. Run the Update Deployment Share Wizard

Answer: D

NEW QUESTION 174

- (Exam Topic 4)

You have a Microsoft 365 ES subscription that uses Microsoft Intune. You have the apps shown in the following exhibit.

Apps | All apps

Search (Ctrl+/)

+ Add Refresh Filter Export Columns

- Overview
- All apps
- Monitor
- By platform
 - Windows
 - iOS/iPadOS
 - macOS
 - Android
- Policy
 - App protection policies
 - App configuration policies

Name	Type	Assigned
App1	Android line-of-business app	Yes
App2	iOS line-of-business app	Yes
App3	iOS line-of-business app	No
Excel	Android store app	Yes
Excel	iOS store app	Yes
Managed Home Screen	Managed Google Play store app	Yes
Microsoft Authenticator	Managed Google Play store app	No
OneDrive	Android store app	No
OneDrive	iOS store app	No

Use the drop-down menus to select the answer choice that completes each statement based upon the information presented in the graphic.

NOTE: Each correct selection is worth one point.

You can create configuration policies for [answer choice] iOS-supported apps.

- 1
- 2
- 3

- 4
- 5

You can create configuration policies for [answer choice] Android-supported apps.

- 1
- 2
- 3
- 4
- 5

NEW QUESTION 175

- (Exam Topic 4)

You have a Microsoft 365 subscription that uses Microsoft Intune Suite.

You use Microsoft Intune to manage devices. All devices are in the same time zone. You create an update rings policy and assign the policy to all Windows devices.

On the November 1, you pause the update rings policy. All devices remain online.

Without further modification to the policy, on which date will the devices next attempt to update?

- A. December 1
- B. December 6
- C. November 15
- D. November 22

Answer: C

NEW QUESTION 180

- (Exam Topic 4)

You have a Microsoft 365 subscription that uses Microsoft Intune. You have five new Windows 11 Pro devices.

You need to prepare the devices for corporate use. The solution must meet the following requirements:

- Install Windows 11 Enterprise on each device.
- Install a Windows Installer (MSI) package named App1 on each device.
- Add a certificate named Certificate1 that is required by App1.
- Join each device to Azure AD.

Which three provisioning options can you use? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. subscription activation
- B. a custom Windows image
- C. an in-place upgrade
- D. Windows Autopilot
- E. provisioning packages

Answer: BDE

NEW QUESTION 182

- (Exam Topic 4)

You have a Microsoft 365 subscription that includes Microsoft Intune.

You have an update ring named UpdateRing1 that contains the following settings:

- Automatic update behavior: Auto install and restart at a scheduled time
- Automatic behavior frequency: First week of the month
- Scheduled install day: Tuesday
- Scheduled install time: 3 AM

From the Microsoft Intune admin center, you select Uninstall for the feature updates of UpdateRing1. When will devices start to remove the feature updates?

- A. when a user approves the uninstall
- B. as soon as the policy is received
- C. next Tuesday
- D. the first Tuesday of the next month

Answer: C

NEW QUESTION 184

- (Exam Topic 4)

You have 200 computers that run Windows 10. The computers are joined to Azure AD and enrolled in Microsoft Intune. You need to set a custom image as the wallpaper and sign-in screen.

Which two settings should you configure in the Device restrictions configuration profile? To answer, select the appropriate settings in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Device restrictions

Windows 10 and later

- ✓ Basics
- 2 Configuration settings**
- 3 Assignments
- 4 Applicability Rules
- 5 Review + create

- App Store
- Cellular and connectivity
- Cloud and Storage
- Cloud Printer
- Control Panel and Settings

NEW QUESTION 187

- (Exam Topic 4)

You have a Microsoft Intune subscription that has the following device compliance policy settings: Mark devices with no compliance policy assigned as: Compliant
 Compliance status validity period (days): 14

On January 1, you enroll Windows 10 devices in Intune as shown in the following table.

Name	BitLocker Drive Encryption (BitLocker)	Firewall	Scope (Tags)	Member of
Device1	Enabled	Off	Tag1	Group1
Device2	Disabled	On	Tag2	Group2

On January 4, you create the following two device compliance policies:

- Name: Policy1
- Platform: Windows 10 and later
- Require BitLocker: Require
- Mark device noncompliant: 5 days after noncompliance
- Scope (Tags): Tag1
- Name: Policy2
- Platform: Windows 10 and later
- Firewall: Require
- Mark device noncompliant: Immediately
- Scope (Tags): Tag2

On January 5, you assign Policy1 and Policy2 to Group1.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
On January 7, Device1 is marked as compliant.	<input type="radio"/>	<input type="radio"/>
On January 8, Device1 is marked as compliant.	<input type="radio"/>	<input type="radio"/>
On January 8, Device2 is marked as compliant.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: No.
 Policy1 and Policy2 apply to Group1 which Device1 is a member of. Device1 does not meet the firewall requirement in Policy2 so the device will immediately be marked as non-compliant.
 Box 2: No
 For the same reason as Box1. Box 3: Yes
 Policy1 and Policy2 apply to Group1. Device2 is not a member of Group1 so the policies don't apply.
 The Scope (tags) have nothing to do with whether the policy is applied or not. The tags are used in RBAC.

NEW QUESTION 190

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription and a computer that runs Windows 11. You need to create a customized installation of Microsoft 365 Apps for enterprise.

Which four actions should you perform in sequence? To answer, move the appropriate cmdlets from the list of cmdlets to the answer area and arrange them in the correct order.

Actions	Answer Area
Run setup.exe and specify the /packager switch.	
Download the Microsoft Office Deployment Tool (ODT) and run the self-extracting executable (.exe) file.	
Edit the XML configuration file.	
Run setup.exe and specify the /download switch.	
Run setup.exe and specify the /configure switch.	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

- * 1. Download ODT application
 - * 2. Create a configuration file (XML)
 - * 3. setup.exe /download to download the installation files
 - * 4. setup.exe /configure to deploy the application
- <https://learn.microsoft.com/en-us/deployoffice/deploy-microsoft-365-apps-local-source>

NEW QUESTION 194

- (Exam Topic 4)

You have 100 computers that run Windows 10.

You plan to deploy Windows 11 to the computers by performing a wipe and load installation. You need to recommend a method to retain the user settings and the user data.

Which three actions should you recommend be performed in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
Configure known folder redirection in Microsoft OneDrive.	
Run scanstate.exe.	
Run loadstate.exe.	
Enable Enterprise State Roaming.	
Create a system image backup.	
Deploy Windows 11.	
Restore a system image backup.	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Actions	Answer Area
Configure known folder redirection in Microsoft OneDrive.	
Run scanstate.exe.	
Run loadstate.exe.	
Enable Enterprise State Roaming.	
Create a system image backup.	Create a system image backup.
Deploy Windows 11.	Deploy Windows 11.
Restore a system image backup.	Restore a system image backup.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic. NOTE: Each correct selection is worth one point.

Answer Area

Users	<div style="background-color: #333; color: white; padding: 2px;">can access any URL.</div> <div style="background-color: #333; color: white; padding: 2px;">cannot view the address bar in Microsoft Edge.</div> <div style="background-color: #333; color: white; padding: 2px;">can only access URLs that include contoso.com.</div> <div style="background-color: #333; color: white; padding: 2px;">can only access URLs that start with https://contoso.com/ .</div>
Windows 10 devices can have	<div style="background-color: #333; color: white; padding: 2px;">a single Microsoft Edge instance that has a single tab.</div> <div style="background-color: #333; color: white; padding: 2px;">a single Microsoft Edge instance that has multiple tabs.</div> <div style="background-color: #333; color: white; padding: 2px;">multiple Microsoft Edge instances that have multiple tabs.</div> <div style="background-color: #333; color: white; padding: 2px;">multiple Microsoft Edge instances that each has a single tab.</div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Users can only access URLs that start with https://contoso.com/ Windows 10 and later devices can have multiple Microsoft Edge instances that each has a single tab

The device configuration profile shown in the exhibit is a kiosk browser profile that configures Microsoft Edge to run in kiosk mode. The profile has the following settings:

- Kiosk mode: Enabled

- > Kiosk type: Multi-app
- > Allowed URLs: https://contoso.com/*
- > Address bar: Disabled

These settings mean that users can only access URLs that start with https://contoso.com/ and cannot view the address bar in Microsoft Edge. The kiosk type of Multi-app allows users to open multiple instances of Microsoft Edge, but each instance can only have a single tab. Therefore, users cannot access any URL, cannot view the address bar in Microsoft Edge, and can have multiple Microsoft Edge instances that each has a single tab. References: <https://docs.microsoft.com/en-us/mem/intune/configuration/kiosk-settings#kiosk-browser-settings>

NEW QUESTION 199

- (Exam Topic 4)

You use Microsoft Defender for Endpoint to protect computers that run Windows 10.

You need to assess the differences between the configuration of Microsoft Defender for Endpoint and the Microsoft-recommended configuration baseline.

Which tool should you use?

- A. Microsoft Defender for Endpoint Power 81 app
- B. Microsoft Secure Score
- C. Endpoint Analytics
- D. Microsoft 365 Defender portal

Answer: B

NEW QUESTION 200

- (Exam Topic 4)

You use Microsoft Endpoint Manager to manage Windows 10 devices.

You are designing a reporting solution that will provide reports on the following:

- > Compliance policy trends
- > Trends in device and user enrolment
- > App and operating system version breakdowns of mobile devices

You need to recommend a data source and a data visualization tool for the design.

What should you recommend? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Data source: ▼

Audit logs in Azure Active Directory (Azure AD)
Audit logs in Microsoft Intune
Azure Synapse Analytics
The Microsoft Intune Data Warehouse

Data visualization tool: ▼

Azure Data Studio
Microsoft Power BI
The Azure portal

NEW QUESTION 205

- (Exam Topic 4)

You have a Microsoft 365 subscription.

Users have iOS devices that are not enrolled in Microsoft 365 Device Management.

You create an app protection policy for the Microsoft Outlook app as shown in the exhibit. (Click the Exhibit tab.)

You need to configure the policy to meet the following requirements:

- > Prevent the users from using the Outlook app if the operating system version is less than 12.0.0.
- > Require the users to use an alphanumeric passcode to access the Outlook app.

What should you configure in an app protection policy for each requirement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Prevent the users from using Outlook if the operating system version is less than 12.0.0:

▼
Access requirements
Conditional launch
Data protection
Scope

Require the users to use an alphanumeric passcode to access Outlook:

▼
Access requirements
Conditional launch
Data protection
Scope

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 210

- (Exam Topic 4)

You have a Microsoft Deployment Toolkit (MDT) deployment share named DS1.

in the Out-of-Box Drivers node, you create folders that contain drivers for different hardware models.

You need to configure the Inject Drivers MDT task to use PnP detection to install the drivers for one of the hardware models.

What should you do first?

- A. Import an OS package.
- B. Create a selection profile.

- C. Add a Gather task to the task sequence.
- D. Add a Validate task to the task sequence.

Answer: B

NEW QUESTION 213

- (Exam Topic 4)

You have a Microsoft 365 subscription that contains 500 computers that run Windows 11. The computers are Azure AD joined and are enrolled in Microsoft Intune. You plan to manage Microsoft Defender Antivirus on the computers. You need to prevent users from disabling Microsoft Defender Antivirus, What should you do?

- A. From the Microsoft Intune admin center, create a security baseline.
- B. From the Microsoft 365 Defender portal, enable tamper protection.
- C. From the Microsoft Intune admin center, create an account protection policy.
- D. From the Microsoft Intune admin center, create an endpoint detection and response (EDR) policy.

Answer: B

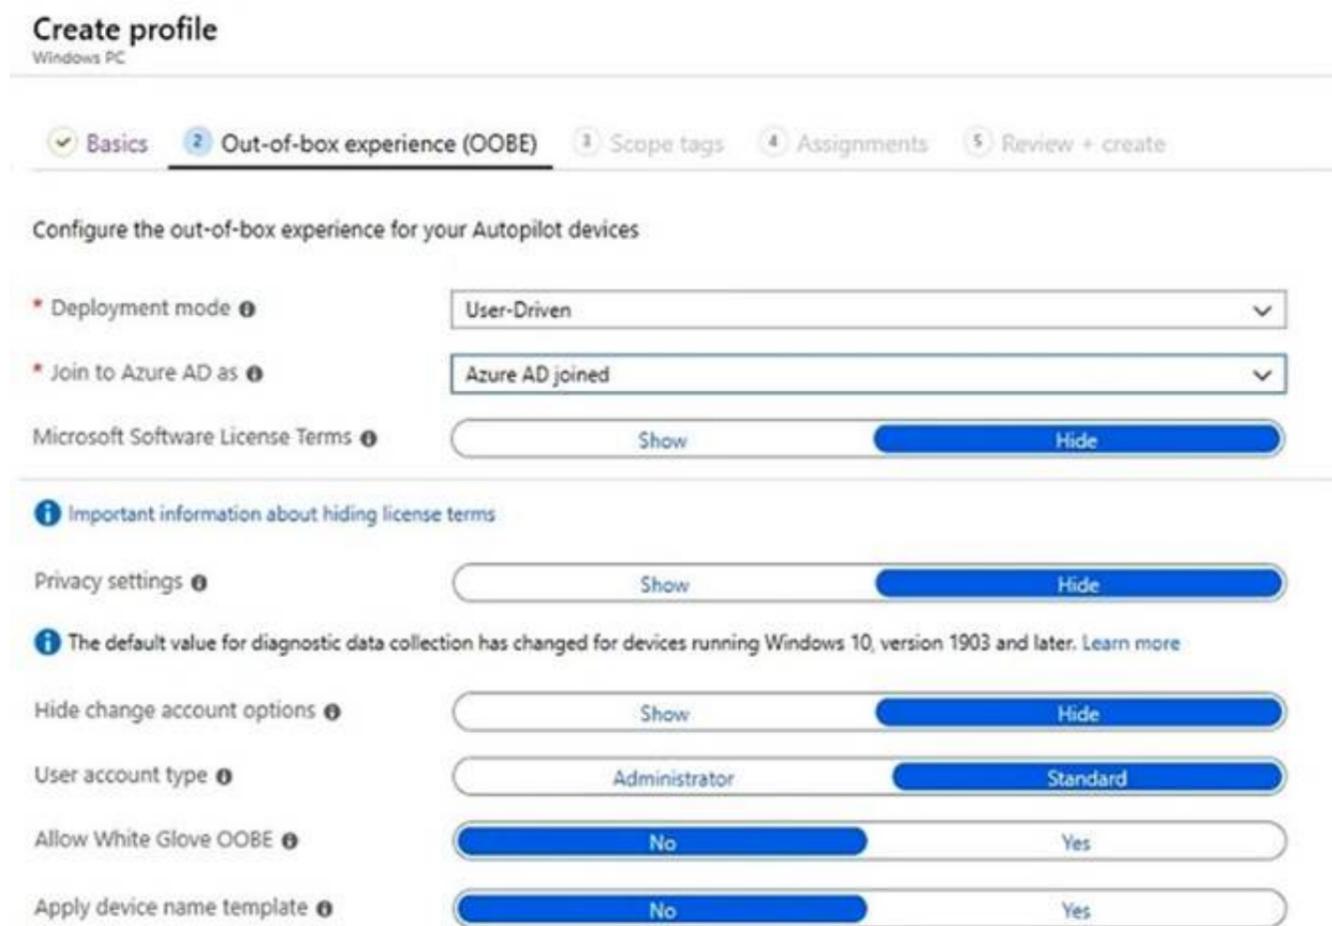

Explanation:

Tamper protection is a feature of Microsoft Defender Antivirus that prevents users or malicious software from disabling or modifying the antivirus settings. Tamper protection can be enabled from the Microsoft 365 Defender portal for devices that are Azure AD joined and enrolled in Microsoft Intune. This will prevent users from turning off Microsoft Defender Antivirus or changing its configuration through Windows Security, PowerShell, Registry, or Group Policy. References: [Enable tamper protection]

NEW QUESTION 214

- (Exam Topic 4)

You have a hybrid Azure AD tenant. You configure a Windows Autopilot deployment profile as shown in the following exhibit.

Create profile
Windows PC

Basics **2** Out-of-box experience (OOBE) 3 Scope tags 4 Assignments 5 Review + create

Configure the out-of-box experience for your Autopilot devices

- * Deployment mode
- * Join to Azure AD as
- Microsoft Software License Terms
- i** Important information about hiding license terms
- Privacy settings
- i** The default value for diagnostic data collection has changed for devices running Windows 10, version 1903 and later. [Learn more](#)
- Hide change account options
- User account type
- Allow White Glove OOBE
- Apply device name template

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic. NOTE: Each correct selection is worth one point.

Answer Area

To apply the profile to a new computer, you must first

▼

- join the device to Azure AD
- enroll the device in Microsoft Intune
- import a CSV file into Windows Autopilot

When the Windows Autopilot profile is applied to a computer, the computer will be

▼

- joined to Azure AD only
- registered in Azure AD only
- joined to Active Directory only
- joined to Active Directory and registered in Azure AD

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

To apply the profile to a new computer, you must first

<ul style="list-style-type: none"> join the device to Azure AD enroll the device in Microsoft Intune import a CSV file into Windows Autopilot

When the Windows Autopilot profile is applied to a computer, the computer will be

<ul style="list-style-type: none"> joined to Azure AD only registered in Azure AD only joined to Active Directory only joined to Active Directory and registered in Azure AD

NEW QUESTION 217

- (Exam Topic 4)

Your network contains an on-premises Active Directory Domain Services (AD DS) domain that syncs with an Azure AD tenant. The tenant contains the users shown in the following table.

Name	Member of	On-premises sync
User1	Group1	Disabled
User2	Group2	Enabled

You assign Windows 10/11 Enterprise E5 licenses to Gtoup1 and Uset2. You deploy the devices shown in the following table.

Name	Operating system	Joined to
Device1	Windows 11 Pro	Azure AD
Device2	Windows 11 Pro	AD DS
Device3	Windows 10 Pro	Azure AD

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
If User1 signs in to Device1, Device1 is upgraded to Windows 11 Enterprise automatically.	<input type="radio"/>	<input type="radio"/>
If User2 signs in to Device2, Device2 is upgraded to Windows 11 Enterprise automatically.	<input type="radio"/>	<input type="radio"/>
If User2 signs in to Device3, Device3 is upgraded to Windows 11 Enterprise automatically.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
If User1 signs in to Device1, Device1 is upgraded to Windows 11 Enterprise automatically.	<input type="radio"/>	<input checked="" type="checkbox"/>
If User2 signs in to Device2, Device2 is upgraded to Windows 11 Enterprise automatically.	<input checked="" type="checkbox"/>	<input type="radio"/>
If User2 signs in to Device3, Device3 is upgraded to Windows 11 Enterprise automatically.	<input type="radio"/>	<input checked="" type="checkbox"/>

NEW QUESTION 220

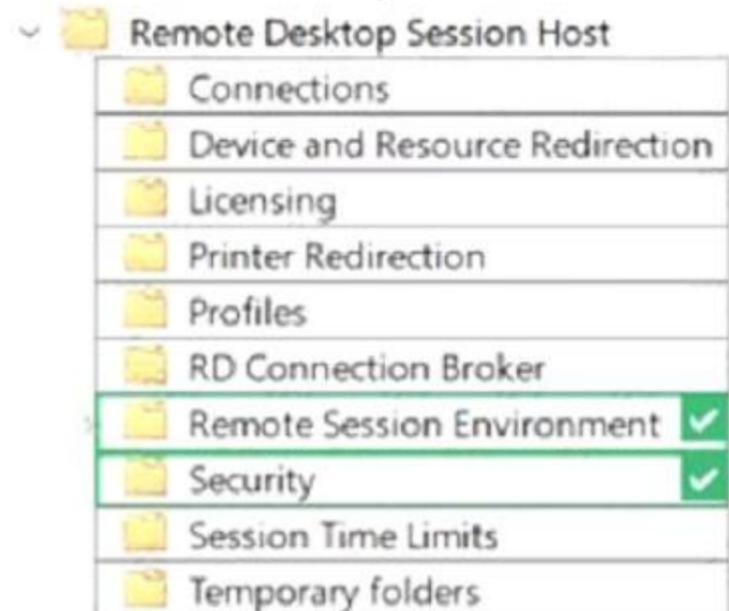

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains 1.000 computers that run Windows 11.

You need to configure the Remote Desktop settings of all the computers. The solution must meet the following requirements:

- Prevent the sharing of clipboard contents.
- Ensure that users authenticate by using Network Level Authentication (NLA).

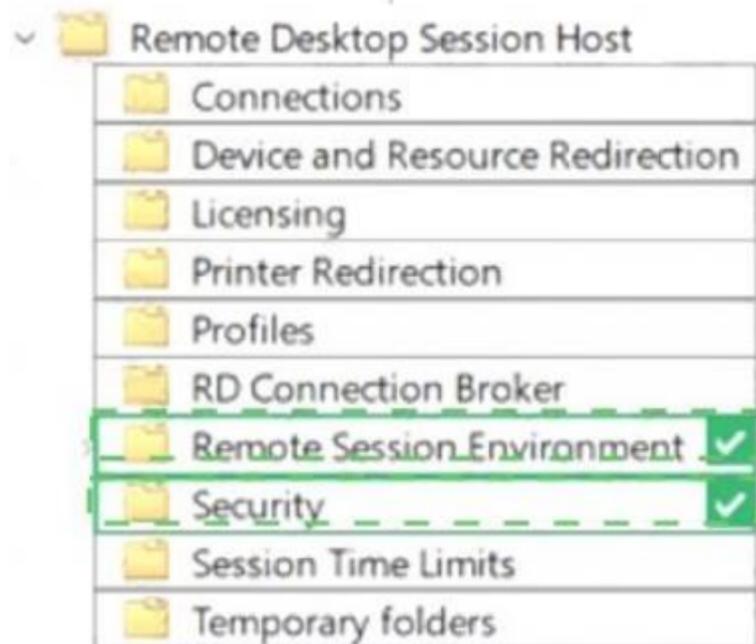

Which two nodes of the Group Policy Management Editor should you use? To answer, select the appropriate nodes in the answer area. NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 224

- (Exam Topic 4)

You have a Microsoft 365 subscription.

You need provide a user the ability to disable Security defaults and principle of least privilege. Which role should you assign to the user?

- A. Global Administrator
- B. Conditional Access Administrator
- C. Security Administrator
- D. Intune Administrator

Answer: B

Explanation:

To enable or disable security defaults in your directory, sign in to the Azure portal as a security administrator, Conditional Access administrator, or global administrator.

Note: Conditional Access Administrator

Users with this role have the ability to manage Azure Active Directory Conditional Access settings.
