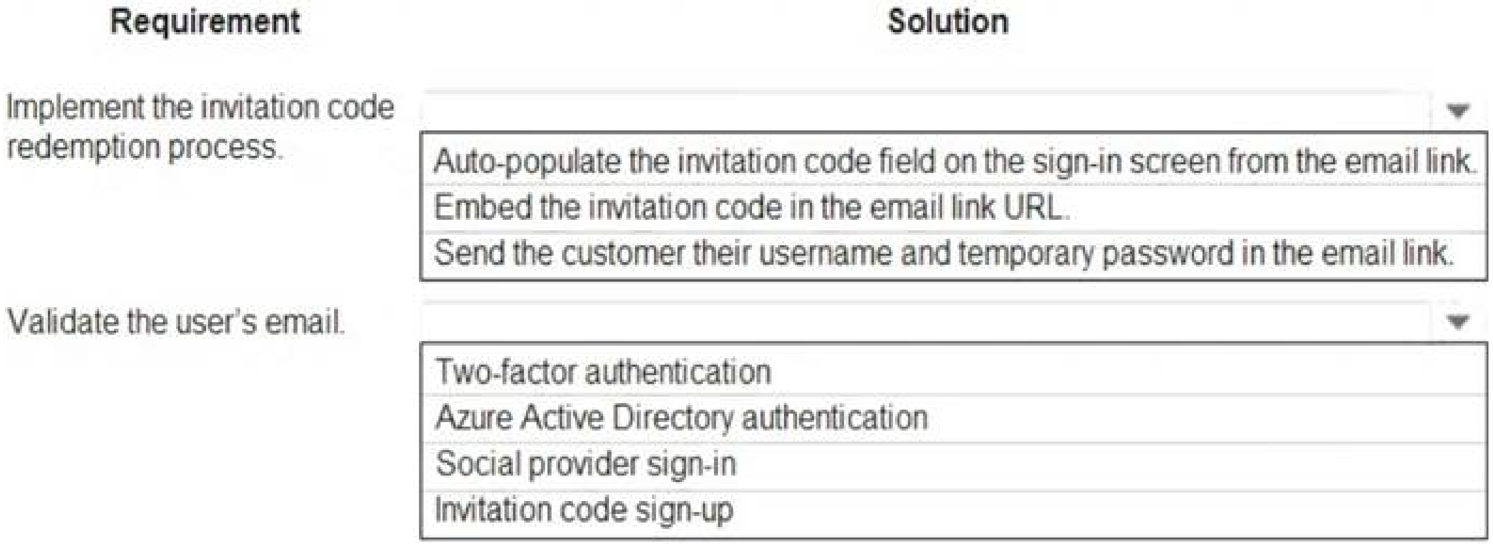
Microsoft

Exam Questions PL-200

Microsoft Power Platform Functional Consultant

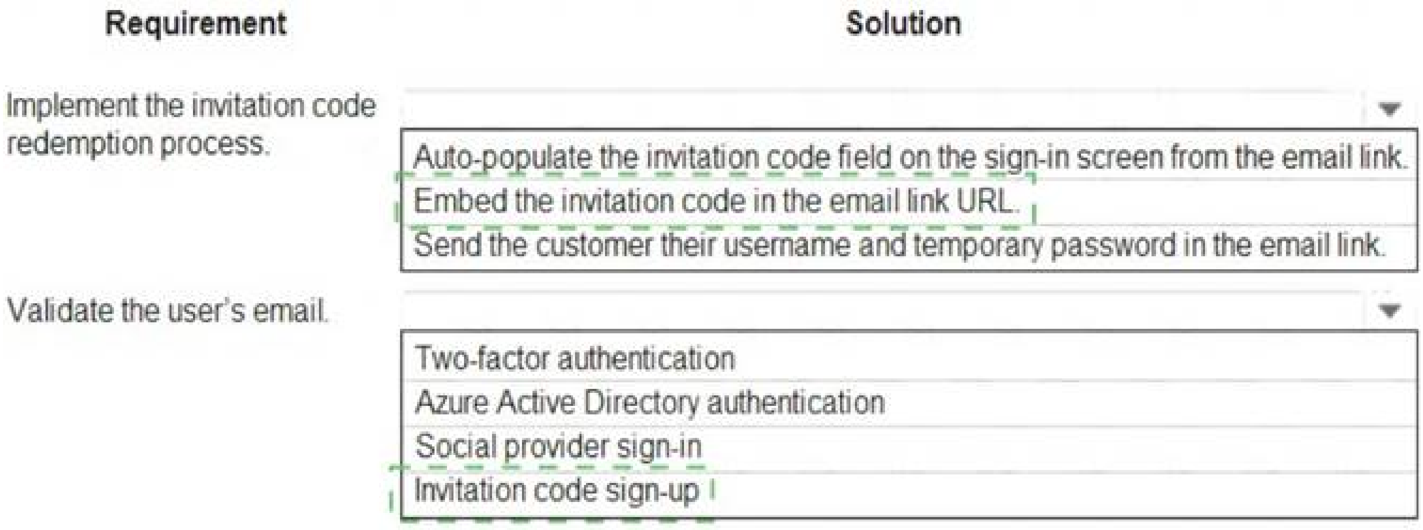
NEW QUESTION 1
- (Exam Topic 1)
You need to design the resort portal's email registration process.
Which solutions should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.



A. Mastered
B. Not Mastered

Answer: A

Explanation:



NEW QUESTION 2
- (Exam Topic 1)
You need to add controls to the check-in solution for the health and wellness questions. Which form control should you use?

A. Drop down
B. Check box
C. Text input

Answer: A

NEW QUESTION 3
- (Exam Topic 1)
You need to design the resort portal to meet the business requirements. Which data source should you use?

A. Microsoft Excel
B. Azure SQL Database
C. SQL Server
D. Common Data Service

Answer: A

NEW QUESTION 4
- (Exam Topic 2)
You need to capture the Date Completed value from the website using a desktop flow. Which method should you use?

A. Use optical character recognition (OCR) on the screen to locate and extract the value.
B. Display an input dialog and prompt the user to enter the value.
C. Extract the value from the window the browser is using.
D. Retrieve the value from the HTML element in the webpage.

Answer: C

Explanation:

Record the name of the QV team member who performed the work and the date completed.

NEW QUESTION 5
- (Exam Topic 2)
You need to set up the new service request completion process.
Which two components should you include in the solution? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.

A. connection reference
B. business process flow
C. Power Automate flow
D. connection

Answer: AC

Explanation:
Reference: https://docs.microsoft.com/en-us/power-apps/maker/data-platform/create-connection-reference

NEW QUESTION 6
- (Exam Topic 2)
You need to coordinate updates and deployment for managed solutions containing completed work without disrupting the system.
What should you do? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Deployment option for changes to an unrelated table

Deploy a patch with the changes made from the current solution.
Deploy a full copy of the new solution with the changes using the upgrade option.
Deploy a full copy of the current solution with the changes using the upgrade option.

Deployment option for automation enhancements

Deploy the new solution and then deploy a full copy of the original solution. Use the upgrade option for both deployments.
Deploy a full copy of the original solution and then deploy the new solution. Use the upgrade option for both deployments.
Deploy a full copy of the original solution using the upgrade option. Then, deploy the new solution by using the update option.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Deploy a patch with the changes made from the current solution. Scenario:
The Onsite Visit managed solution has a table that is not in the Verification Process Automation managed solution. This table must be upgraded prior to the go-live date without the other shared components.
Box 2: Deploy a full copy of the original solution using the upgrade option. Then, deploy the new solution by using the update option.
Scenario: All components required for the verification process must be included in a new solution. Corporate security requires that deployments to non-development environments must be automated using
service accounts.
Managed solutions are used to move customizations from the development environment to other higher-level environments. These solutions are created and maintained by the power users and provided to internal IT for deployment when they are ready.
Note:
Upgrade This is the default option and upgrades your solution to the latest version and rolls up all previous patches in one step. Any components associated to the previous solution version that are not in the newer solution version will be deleted. This is the recommended option as it will ensure that your resulting configuration state is consistent with the importing solution including removal of components that are no longer part of the solution.
Update This option replaces your solution with this version. Components that are not in the newer solution won't be deleted and will remain in the system. This option is not recommended as your destination environment will differ in configuration from your source environment and could cause issues that are difficult to reproduce and diagnose.
Reference: https://docs.microsoft.com/en-us/power-apps/maker/data-platform/update-solutions

NEW QUESTION 7
- (Exam Topic 2)
You need to resolve the issue reported by substitute employees after they are assigned service requests. How should you configure the system? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Aspect	Configuration
Relationship	Service Request 1:N Qualification Service Request N:N Qualification Service Request N:1 Qualification
Cascading rule	Restrict Cascade All Cascade None

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Service Request 1:N Qualification
When users go on vacation, all their outstanding Service Request records are assigned to a substitute employee. The substitute employees are unable to see all the qualifications related to their service requests.
Box 2: Cascade All
Cascade All - Perform the action on all referencing table records associated with the referenced table record. Reference:
https://docs.microsoft.com/en-us/power-apps/developer/data-platform/configure-entity-relationship-cascading-b

NEW QUESTION 8
- (Exam Topic 3)
A company uses a model-driven Power Apps app in a new environment. The base language is English. You need to configure French and Spanish.
Which configuration component should you use? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Requirement	Configuration component
Allow a language to be used within an organization.	Default language Language collation Language packs LCID
Enable the languages.	Browser Environment Power Apps app Tenant

A. Mastered
B. Not Mastered

Answer: A

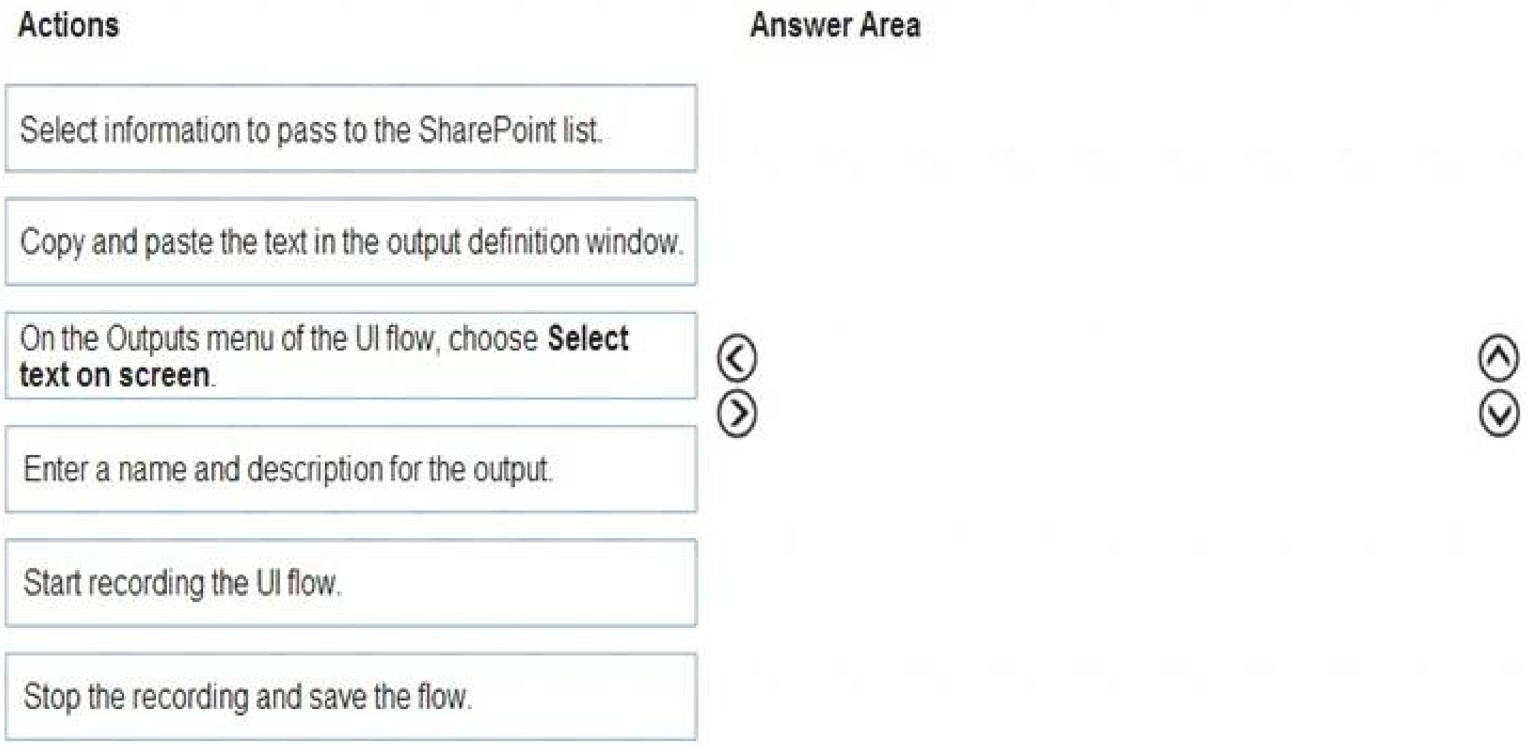
Explanation:
Box 1: Language packs
Before users can start using a Language Pack to display a language, the Language Pack must be enabled in your organization.
Box 2: Environment Enable the language
These settings can be found in the Microsoft Power Platform admin center by going to Environments > [select an environment] > Settings > Product > Languages.
Reference: https://docs.microsoft.com/en-us/power-platform/admin/enable-languages

NEW QUESTION 9
- (Exam Topic 3)
You create a Power Apps app.
The app must be able to display a list of records that are sorted by category. The app must also expand or hide the list by subtopics.
You need to configure the app. Which tool should you use?

A. card
B. expression
C. Power BI dashboard
D. gallery

Answer: C

NEW QUESTION 10
- (Exam Topic 3)
You are designing a desktop user interface (UI) flow. The UI flow automates legacy software.
You need to prepare data for transfer to a Microsoft SharePoint list.
Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.



A. Mastered
B. Not Mastered

Answer: A

Explanation:
Reference:
https://docs.microsoft.com/en-us/power-automate/ui-flows/inputs-outputs-desktop#use-outputs-to-extract-inform

NEW QUESTION 10
- (Exam Topic 3)
A company uses Power Apps with Microsoft Dataverse.
The company enables auditing on the Dataverse database. The company tenant reaches the maximum storage capacity.
You need to delete some auditing data.
Which three deletion options should you use? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

A. by table
B. by record
C. between two specified dates
D. by column
E. older than a specified date

Answer: BCE

NEW QUESTION 12
- (Exam Topic 3)
You are creating a canvas app.
A user will click a button on each screen of a Power Apps app to proceed to the next screen. You need to implement an action that selects the next screen that the user sees.
Which event should you handle?

A. OnLoad
B. OnCheck
C. ScreenTransition
D. OnSelect

Answer: D

Explanation:
Add navigation
* 1. With the Source screen selected, open the Insert tab, select Icons, and then select Next arrow.
* 2. With the arrow still selected, select the Action tab, and then select Navigate.

* 3. The OnSelect property for the arrow is automatically set to a Navigate function.

OnSelect = fx Navigate(Target, Fade)

* 4. When a user selects the arrow, the Target screen fades in.
* 5. On the Target screen, add a Back arrow, and set its OnSelect property to this formula:
* 6. Navigate(Source, ScreenTransition.Fade)
* 7. While holding down the Alt key, toggle between screens by selecting the arrow on each screen. Reference:
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/add-screen-context-variables

NEW QUESTION 13
- (Exam Topic 3)
You create and publish a Power BI report that contains an embedded canvas app. The report will be used by multiple people.
The canvas app has an issue that must be corrected. You update the canvas app.
You need to ensure that the updated canvas app is available in the published Power BI report. What should you do?

A. Publish the Power BI report from Power BI Desktop.
B. Manually refresh the data source on the published Power BI report.
C. Publish the Power BI report from Power BI Desktop and reshare to any users.
D. Publish the canvas app.

Answer: B

Explanation:
If you change the data fields associated with the visual, you must edit the app from within the Power BI service by selecting the ellipsis (...) and then selecting Edit. Otherwise, the changes won't be propagated
to Power Apps, and the app will behave in unexpected ways.
The Power Apps visual can't trigger a refresh of Power BI reports and Power BI data sources from within Power BI Desktop. If you write back data from the app to the same data source as the report, your changes won't be reflected immediately in Power BI Desktop. Changes are reflected on the next scheduled refresh.
Reference:
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/powerapps-custom-visual#limitations-of-the-po

NEW QUESTION 15
- (Exam Topic 3)
A company that manufactures medical devices uses Power Apps to manage their sales and device maintenance.
A Table named Devices in Microsoft Dataverse has a column named Status. The Status column must have a new status value of Review added to the existing Choice values of Active and Inactive.
The table must be added to a solution to be promoted once the change is made.
Only this change must be promoted to the test environment. The changes must not be able to be changed once promoted.

Options
- Add column
- Add existing
- Add required components
- Add subcomponent

Answer Area

Action	Option
Add the Devices table to the solution.	
Add the status column changes only to the solution.	

A. Mastered
B. Not Mastered

Answer: A

Explanation:

Options
- Add column
- Add existing
- Add required components
- Add subcomponent

Answer Area

Action	Option
Add the Devices table to the solution.	Add existing
Add the status column changes only to the solution.	Add required components

NEW QUESTION 20
- (Exam Topic 3)
You are modifying a model-driven app. You set up a customer table in Microsoft Power Platform to retrieve
user data. You set up a form with the following columns for users to enter their data. The form includes the following columns:

Column	Data type
Country/region	Choices (multi-select)
Passport ownership	Choice (yes /no)
Passport expiration date	Text

The form must do the following:
• The Country/region column must automatically populate with US when English is chosen as a language. If the user selects Other for this column, the column must remain blank so that user can enter a value.
• The Passport expiration date column must appear only if the user selects Yes in the Passport ownership column.
You need to configure the app with the least amount of effort.
What should you configure? To answer, drag the appropriate solution component to the correct requirements. Each solution component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Graphical user interface Description automatically generated with low confidence

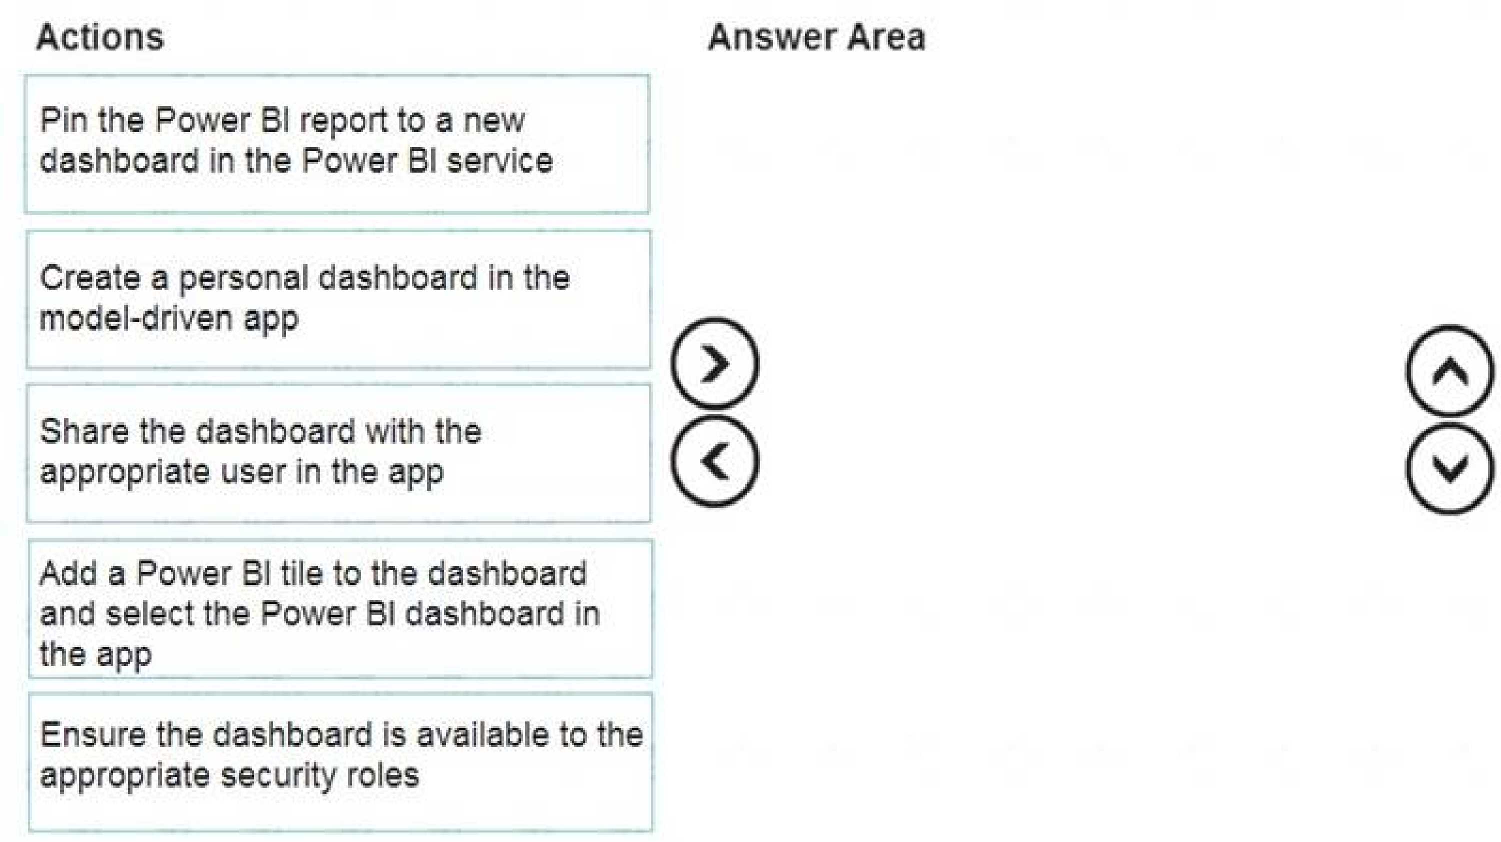
NEW QUESTION 24
- (Exam Topic 3)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You are creating Power Virtual Agents chatbot that captures demographic information about customers. The chatbot must determine the group a customer belongs to based on their age. The age groups are:
- 0 - 17
- 18 - 25
- 26 - 35
- 36 - 55
- 55 - 100

You need to configure the chatbot to ask a question that can be used to determine the correct age group. Solution: Create a custom Age group entity and synonyms for each individual age in the corresponding item.
Use Age group for Identify in the question.
Does this meet the goal?

A. Yes
B. No

Answer: A

NEW QUESTION 27
- (Exam Topic 3)
You create a report by using Power Bl Desktop and publish the report to the Power Bl service. You enable Power Bl visualization embedding in a model-driven app.
You need to configure the model-driven app to display a Power Bi tile
Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

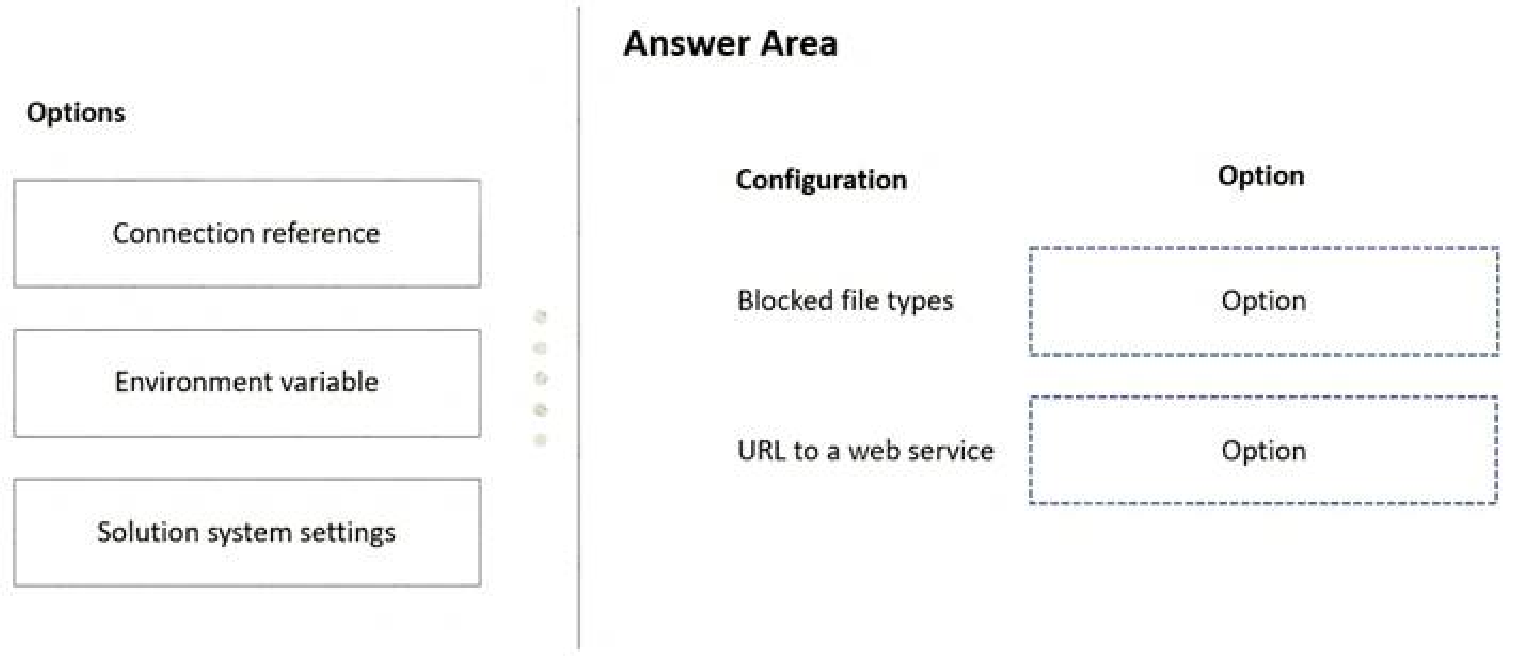


A. Mastered
B. Not Mastered

Answer: A

Explanation:
* 1.- Add a Power BI tile to the dashboard and select the power BI dashboard in the app 2.- Create a new Power BI personal dashboard in the model-driven app
* 3.- Ensure the dashboard is available to the appropriate security roles 4.- Pin the power BI report to a new dashboard in the Power BI service

NEW QUESTION 30
- (Exam Topic 3)
You create a new solution for a business process.
The business process includes uploading specific file types to a web service.
You need to ensure that the business process works the same way anywhere the solution is deployed. Which option should you use? To answer, drag the appropriate options to the correct configurations. Each
option may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.



A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Solution system settings
For Power Apps in Settings > Customizations > Customize the System you can configure email and document management, activate or deactivate processes, and more.
Box 2: Environment variable
When should Environment variables be used? Some examples include:
When an input parameter needs to change across environments and should not be hard-coded. For example, a URL that points to a different resource in development and production environments.
If you're building a solution where your customer is required to provide an input value. Application setup pages.
Incorrect:
A connection reference is a solution component that contains information about a connector. Reference:
https://docs.microsoft.com/en-us/powerapps/maker/model-driven-apps/advanced-navigation https://powerapps.microsoft.com/en-us/blog/environment-variables-

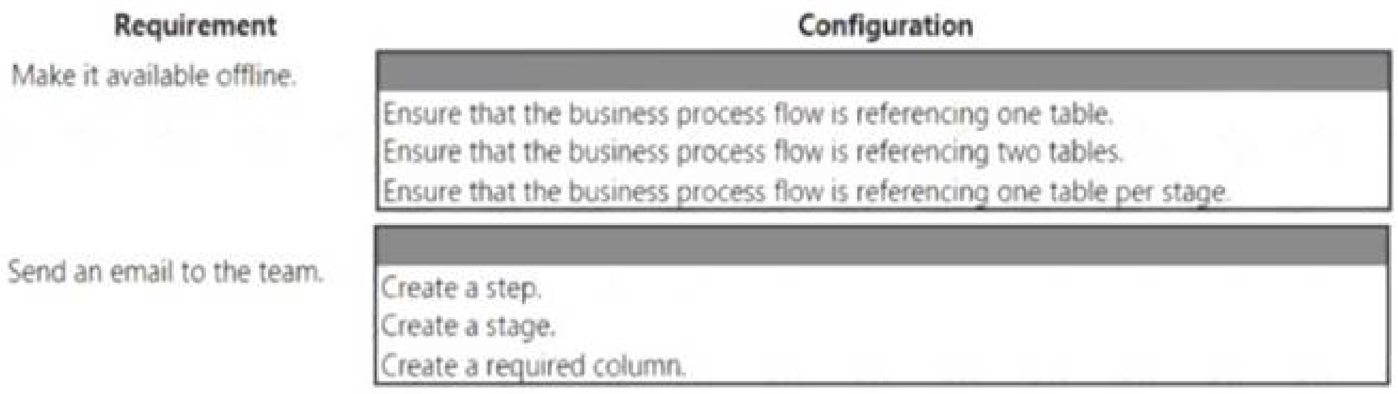
available-in-preview/

NEW QUESTION 34
- (Exam Topic 3)
A company uses model-driven apps.
Users in the sales department enter the first name, last name, and phone number of customers in the app. The users request a single screen in the app to enter the customer data.
You need to configure the app. What should you do?

A. Create a canvas app.
B. Modify the site map.
C. Create a Power Automate flow.
D. Use a Power Virtual Agents app.

Answer: A

NEW QUESTION 39
- (Exam Topic 3)
You are creating a business process flow for a Power Apps app. The business process flow must meet the following requirements:
• Must be available offline.
• Send an email to the team when a record is created. You need to set up business process flow.
What should you do? To answer, select the appropriate options in the answer area. Each correct selection is worth one point



A. Mastered
B. Not Mastered

Answer: A

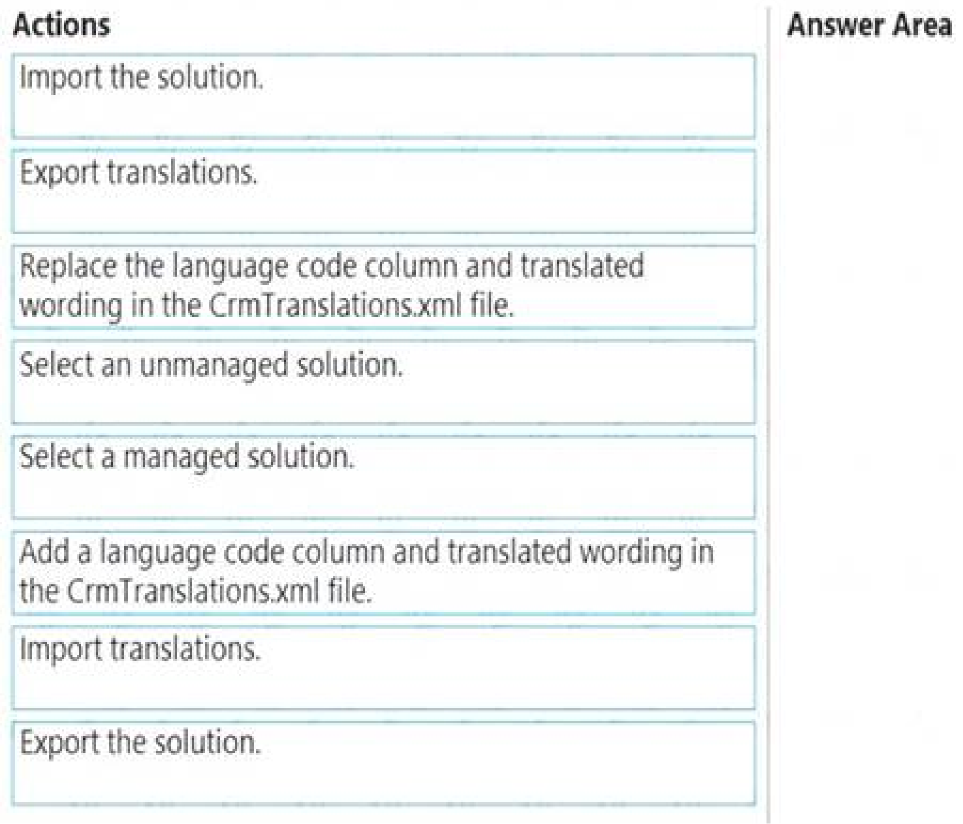
Explanation:
Graphical user interface, text, application Description automatically generated

NEW QUESTION 42
- (Exam Topic 3)
A veterinary office plans to use Microsoft Power Platform to streamline customer experiences. The customer creates a canvas apps to manage appointments.
On the client appointment form, there is a dropdown field for clients to select their type of pet. If a client selects the option Other, a text field must appear so that staff members can add details about the pet.
You need to create a dynamically visible field. What should you configure?

A. business rule
B. business process flow
C. workflow

Answer: A

NEW QUESTION 45
- (Exam Topic 3)
A company has employees in France, Mexico, and the United States. You are creating a Power Apps app to allow users to add client records to Microsoft Dataverse. The default language for the company is English.
The company wants the app to display each local language. You need to add the Spanish and French languages.
Which four actions should you perform in sequence for each language? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.



A. Mastered
B. Not Mastered

Answer: A

Explanation:
Step 1: Select an unmanaged solution. Export the localizable text
The scope of the localizable text that will be exported is the unmanaged solution that contains the localizable text.
- From Power Apps, select Solutions.
- In the All Solutions list, select the unmanaged solution that contains the localizable text you want.
- On the command bar, select Translations > Export Translations.

Step 2: Export translations.
Step 3: Add a language code column and a translated wording in the CrmTranslations.xml file. Get the localizable text translated
You can send this file to a linguistic expert, translation agency, or localization firm.
If you have the knowledge to translate the text, or if you just want to see the format, you can extract the zip file that you exported you will see that it contains two XML files.
[Content_Types].xml CrmTranslations.xml
You can open the CrmTranslations.xml file with Microsoft Office Excel. When you view the data in Excel, look at the Localized Labels tab.
Graphical user interface, text, application, table, Excel Description automatically generated

657	cr2b3_car	1da1f788-3f64-e811-a957-000d3af3b3af	DisplayName	Active		

Information | Display Strings | Localized Labels

Any custom tables or columns will have empty cells for the localizable text. Add the localized values for those items.
Step 4: Import translations. Import the localized text
Importing the text requires compressing the files and importing them into the system. Import the files
From the same unmanaged solution that you exported the translations from, in the menu choose Translations > Import Translations.
Note: If you have customized table or column text, such as column labels or drop-down list values, you can provide the users in your environment who are not working with the base language version of your environment with this customized text in their preferred languages.
The process has the following steps:
- Enable other languages for your environment
- Export the localizable text
- Get the localizable text translated
- Import the localized text

Reference: https://docs.microsoft.com/en-us/power-apps/maker/model-driven-apps/translate-localizable-text

NEW QUESTION 47

- (Exam Topic 3)
A company uses Power Apps.
You create a custom table and configure a child table relationship with the contact table. You need to configure the cascading rules for each action.
Which behavior should you use? To answer, drag the appropriate behaviors to the correct actions. Each behavior may be used once, more than once, or not at all.
You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:

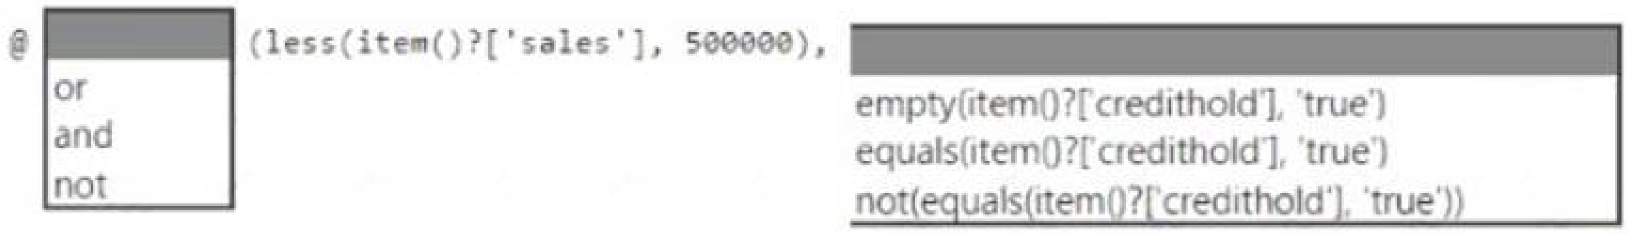
NEW QUESTION 49
- (Exam Topic 3)
You are creating a Power Virtual Agents chatbot for a Microsoft Power Platform power apps portal app. The job title of users must be stored automatically when users log in. The job title must always appear in the
chatbot.
You need to configure the job title functionality. Which mechanism should you use?

A. artificial intelligence
B. variable
C. entity
D. topic

Answer: B

Explanation:
After enabling the Authentication, you will now have access to Two variables, bot.UserDisplayName
bot.UserId
Reference:
https://powerusers.microsoft.com/t5/Power-Virtual-Agents-Community/Getting-User-Details-To-Use-In-Power

NEW QUESTION 52
- (Exam Topic 3)
You are using power Automate to create a list of customers from a Microsoft Excel file, The list must contain customers who meet one of the following criteria:
- Sales of less than $500,000.
- Customers who are on credit hold.
You need to create a condition to filter the list Of customers.
How should you complete the filter condition? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point



A. Mastered
B. Not Mastered

Answer: A

Explanation:
Graphical user interface, application, Word Description automatically generated
Box 1: or
Or: Takes two arguments and returns true if either argument is true. Box 2: equals(item()?['credithold'],'true')
Equals: Returns true if two values are equal.
For example, if parameter1 is someValue, this expression returns true: equals(parameters('parameter1'), 'someValue')
Reference:
https://docs.microsoft.com/en-us/power-automate/use-expressions-in-conditions

NEW QUESTION 54
- (Exam Topic 3)
A Company plans to send escalation emails to all customers with overdue invoices. You are creating a Microsoft Power Automate flow to determine whether to send an escalation email.
The system must send an alert for all invoices that are seven days or more overdue. You need to configure the flow.
Which expression should you use?

A.
```
TriggerEmail() = 'OverdueDate' >= 7;
```

B.
```
'OverdueDate' >= '7'?'TriggerEmail()':false
```

C.
```
@GreaterOrEquals(TriggerEmail()?['OverdueDate']: '7')
```

A. Option A
B. Option B
C. Option C

Answer: C

Explanation:
Example: equals(triggerOutputs()?['body/PDFStatus/Value'],'Ready to Generate') Reference:
https://evolvous.com/microsoft-power-automate-trigger-condition/

NEW QUESTION 58
- (Exam Topic 3)
A company is developing several Power Virtual Agents chatbots. The company manufactures more than 1,000 different products.
The chatbots must prompt users to enter or select a product.
You need to store the model information so that it can be reused across all chatbots. Where should you store the model data?

A. Global variables
B. Custom entities
C. Topics
D. Multiple choice options

Answer: A

NEW QUESTION 61
- (Exam Topic 3)
You are a Dynamics 365 Customer Services administrator. You have a Production instance and Sandbox instance.
Users record Production instance data in the Sandbox instance.
You need to ensure that the users only record data in the Production instance.
Which security function needs to be edited to prevent access to the Sandbox? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

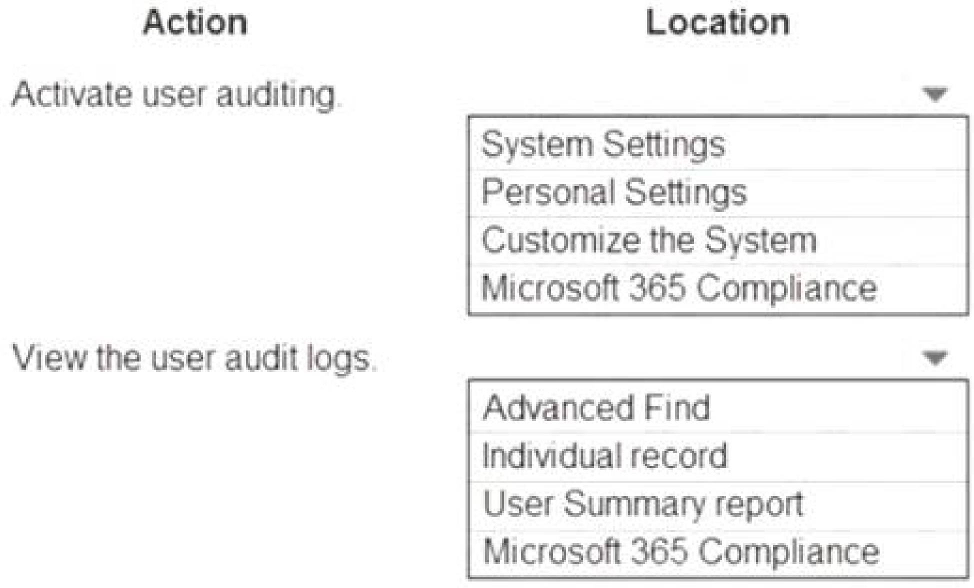
Application area	Security function
Microsoft 365 admin center	Roles Groups Licenses Access rights
Dynamics 365 Sandbox instance	Roles Groups Access rights

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Reference:
https://docs.microsoft.com/en-us/power-platform/admin/control-user-access

NEW QUESTION 65
- (Exam Topic 3)
The owner of a company needs to know who signs into the system. You need to ensure that the owner can view the user audit logs.
Where does each action need to be performed? To answer, select the appropriate options in the answer area. NOTE Each correct selection is worth one point.

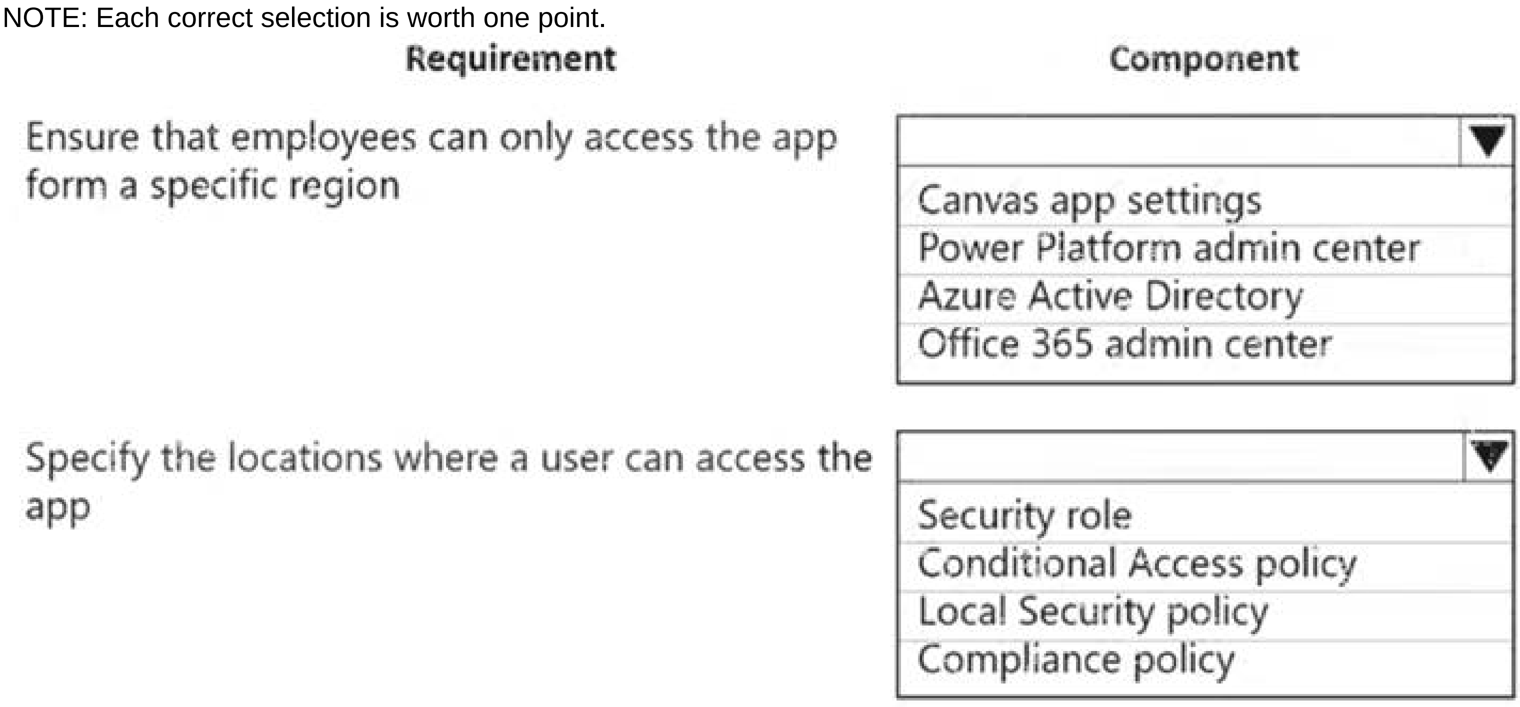


A. Mastered
B. Not Mastered

Answer: A

Explanation:
Reference:
https://docs.microsoft.com/en-us/power-platform/admin/audit-data-user-activity

NEW QUESTION 67
- (Exam Topic 3)
A company uses a canvas app to manage production resources in a specific region. Employees must be at company locations to use the app.
Due to a sudden requirement for employees to work remotely, employees no longer commute to a specific location to conduct their work and cannot access the canvas app.
You must reconfigure the app to ensure that employees only access the app from a limited number of locations.
You need to restrict access to the app.
Which components should you configure? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.



A. Mastered
B. Not Mastered

Answer: A

Explanation:
Graphical user interface, text, application, email Description automatically generated
Reference:
https://docs.microsoft.com/en-us/power-platform/admin/restrict-access-online-trusted-ip-rules

NEW QUESTION 72
- (Exam Topic 3)
You create a canvas app for a sales team. The app has an embedded Power BI tile that shows year-to-date sales. Sales users do not have access to the data source that the tile uses.
Sales team users must be able to see data in the Power BI tile. You must minimize the level of permissions that you grant and minimize administrative overhead.
You need to share another Power BI component to make the data visible. What should you share?

A. The Power BI dataset the tile uses as a data source.
B. The Power BI workspace that includes the tile.
C. The Power BI dashboard that includes the tile.

Answer: C

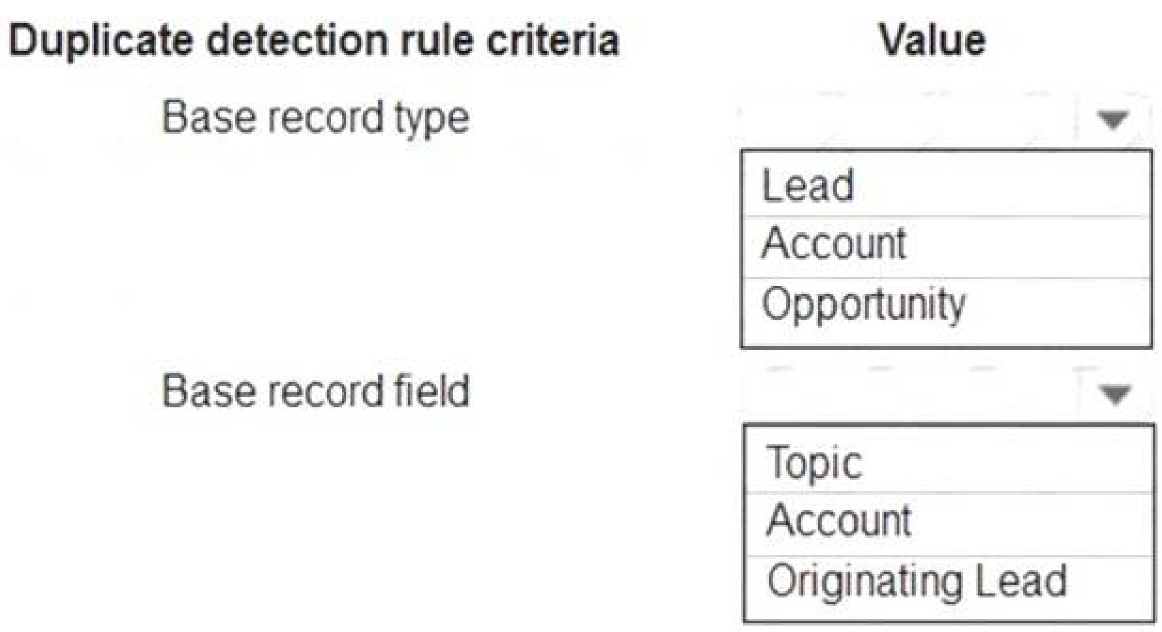
Explanation:
Once shared, the PowerApps app will be accessible by all users who have permissions to access the app. However, in order to make the Power BI content visible to those users, the dashboard where the tile comes from needs to be shared with the user on Power BI. This ensures that Power BI sharing permissions are respected when Power BI content is accessed in an app.
Reference:
https://powerapps.microsoft.com/en-us/blog/power-bi-tile-in-powerapps/

NEW QUESTION 73
- (Exam Topic 3)
You are a Dynamics 365 Sales administrator for a software company. The sales team wants to attach a large number of supporting documents to customer records, but management does not want to incur the cost of additional storage.
The company does not have any Office 365 application integrations enabled. You need to recommend a storage solution that keeps storage costs low. Solution: Enable OneNote integration.
Does the solution meet the goal?

A. Yes
B. No

Answer: B

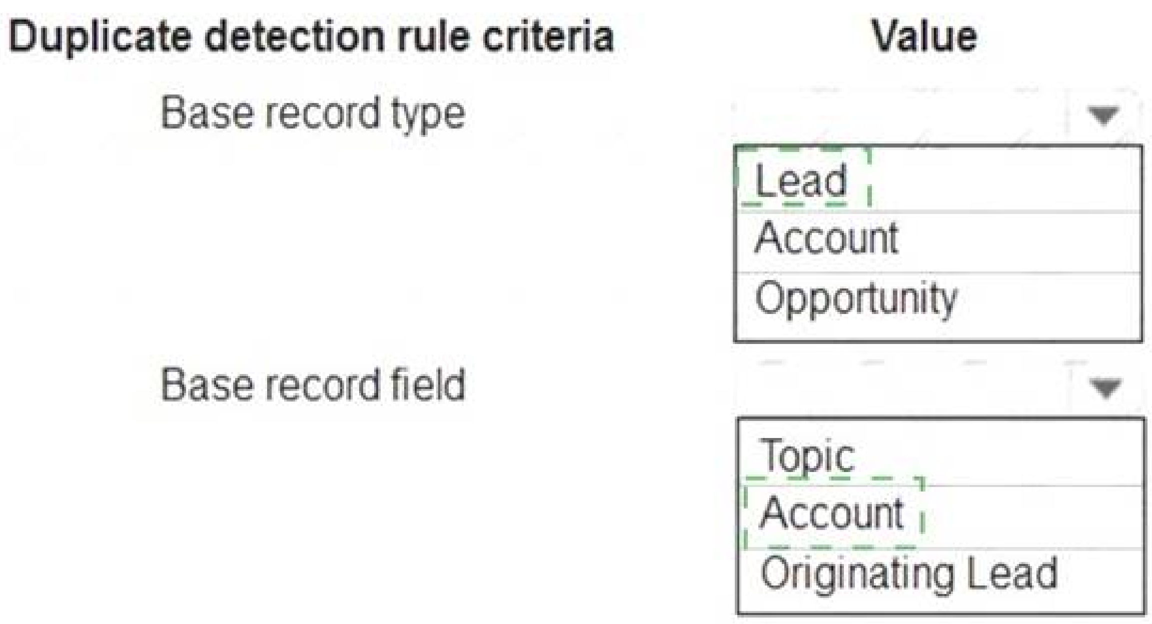
NEW QUESTION 77
- (Exam Topic 3)
You manage the Dynamics 365 environment for a company.
You need to ensure that there are no leads for a customer before you create a new opportunity for the customer.
How can you use duplicate detection rules to achieve this goal? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.



A. Mastered
B. Not Mastered

Answer: A

Explanation:



NEW QUESTION 79
- (Exam Topic 3)
You are a Dynamics 365 Customer Service system administrator. You create an app for the sales team. Members of the sales team cannot access the app.
You need to ensure that sales team members can access the app. Where should you configure app permissions?

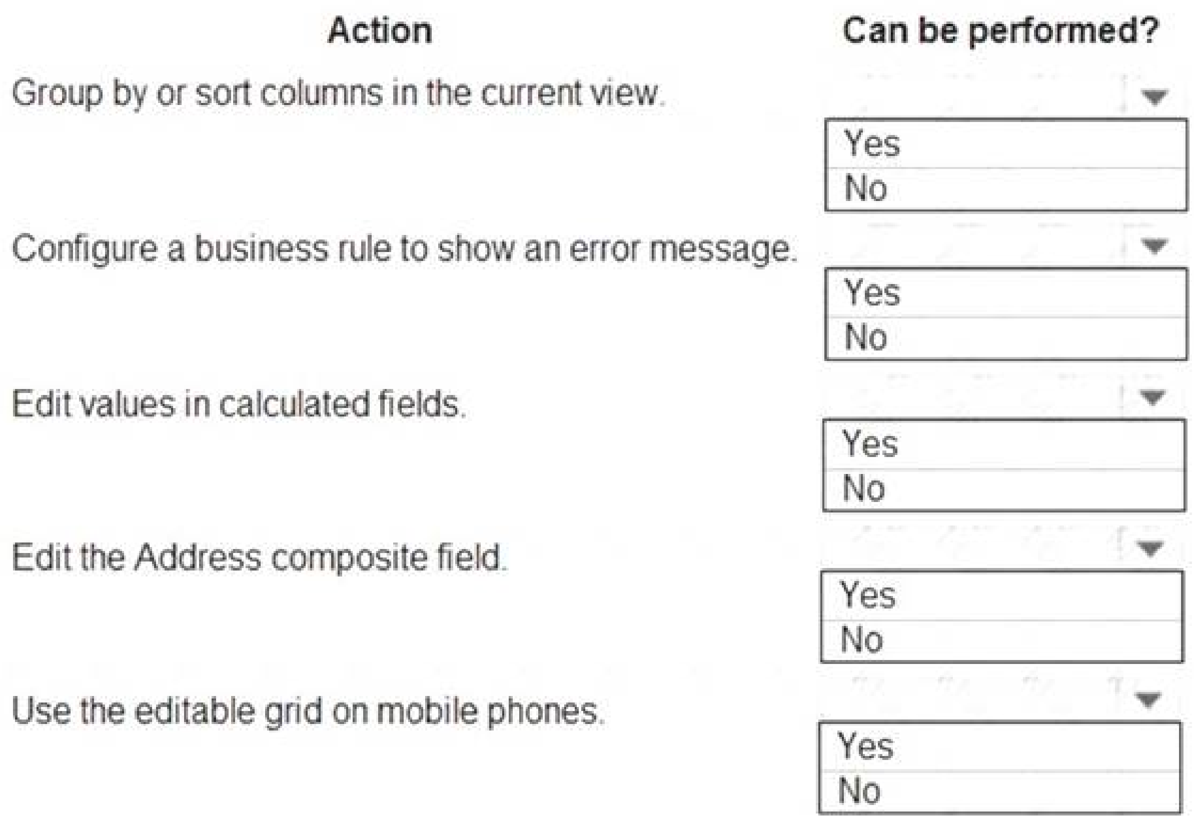
A. Security Roles
B. Manage Roles
C. Dynamics administration center
D. Dynamics 365 home

Answer: B

Explanation:
References:
https://docs.microsoft.com/en-us/dynamics365/customer-engagement/customize/manage-access-apps-security-r Manage access to apps by using security roles.
You can choose what users see and access from the My Apps page or the Customer Engagement home page by giving app access to specific security roles.
Users will have access to apps based on the security roles they're assigned to.
* 1. Go to Settings > My Apps.
* 2. In the lower-right corner of the app tile you want to manage access for, select More options (...), and then select Manage Roles.
* 3. Enter the following in the Manage Roles dialog box:
a) App URL Suffix
b) Roles
c) Select Save.
* 4. Refresh the My Apps page.
* 5. Go to the Apps Being Edited view, and publish the app again. Reference:
https://docs.microsoft.com/en-us/dynamics365/customerengagement/on-premises/customize/manage-access-app

NEW QUESTION 83
- (Exam Topic 3)
You implement an editable grid for the Account entity.
The business team provides the following list of features that they would like you to implement:
- Group by or sort columns in the current view.
- Configure a business rule to show an error message.
- Edit values in calculated fields.
- Edit the Address composite field.
- Use the editable grid on mobile phones.

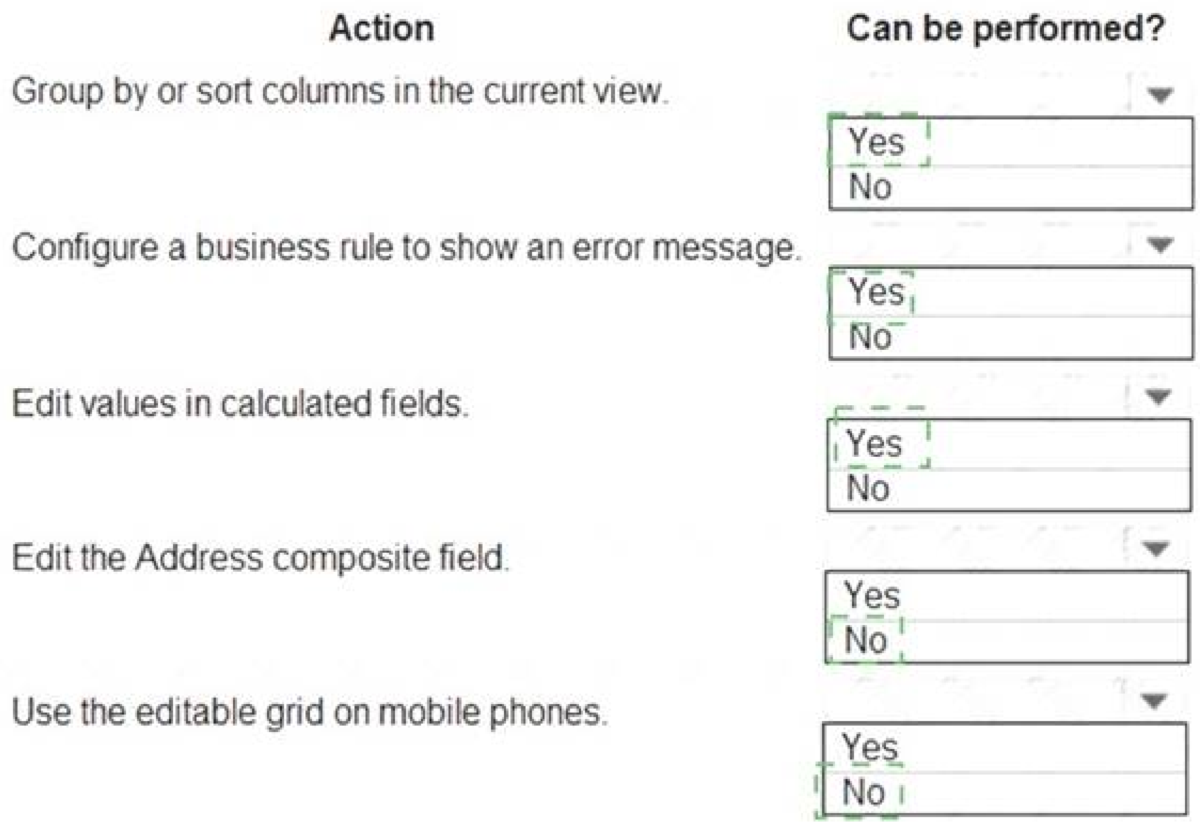
Which actions can you perform? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.



A. Mastered
B. Not Mastered

Answer: A

Explanation:



NEW QUESTION 85
- (Exam Topic 3)
A company creates a Microsoft Power Apps app through the Power Apps designer portal for use in Microsoft Teams.
This app needs to be promoted to the user acceptance testing environment.
You reed to complete the Microsoft recommended actions before you export the solution. Which two actions should you complete? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

A. Write validation tests.
B. Set the Optimized embedding appearance field to true.
C. Publish all changes.
D. Run the solution checker.
E. Clone a solution.

Answer: DE

Explanation:
The Power Apps solution checker performs a rich static analysis check on your solutions against a set of best practice rules to quickly identify problematic patterns. After the check completes, you receive a detailed report that lists the issues identified, the components and code affected, and links to documentation that describes how to resolve each issue.
The solution checker analyzes these solution components: Common Data Service plug-ins
Common Data Service custom workflow activities
Common Data Service web resources (HTML and JavaScript) Common Data Service configurations, such as SDK message steps Reference:
https://www.eimagine.com/ui/

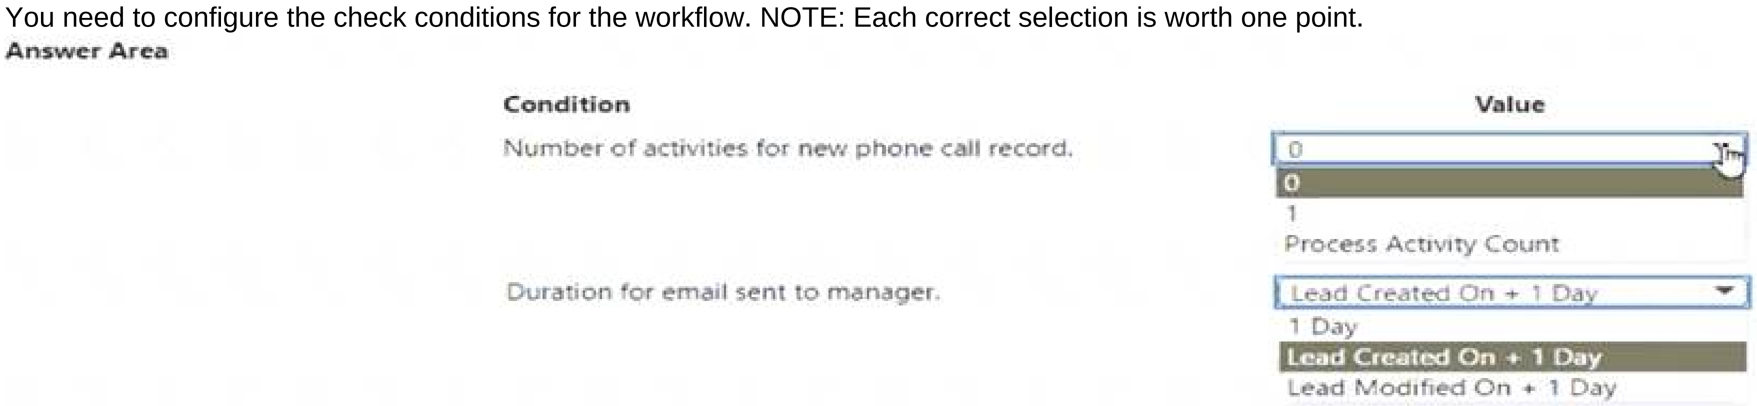
NEW QUESTION 87
- (Exam Topic 3)
You plan on implementing complex business logic in Microsoft Dataverse tables by using Power Automate flows.
You realize that the functionality required to implement the business logic is not available in a Power Automate flow.
The new business logic must work in multiple Dataverse tables. In addition, the operation must return a value after it finishes and must be able to run from an existing Dataverse action.
You need to recommend the method to implement the missing logic. What should you recommend?

A. Scheduled workflow
B. Bound action
C. Custom API
D. Unbound action

Answer: D

Explanation:
https://docs.microsoft.com/en-us/power-automate/dataverse/bound-unbound
https://docs.microsoft.com/en-us/power-apps/developer/data-platform/custom-api

NEW QUESTION 91
- (Exam Topic 3)
A company has a Power Apps app.
The app must meet the following requirements:
• Managers assign lead records to the sales department. A new phone call record must be created if a lead record has no activities.
• An email must be sent to the manager if the phone call record created is not completed after one day. A classic workflow must run when a lead record is assigned.
You need to configure the check conditions for the workflow. NOTE: Each correct selection is worth one point.

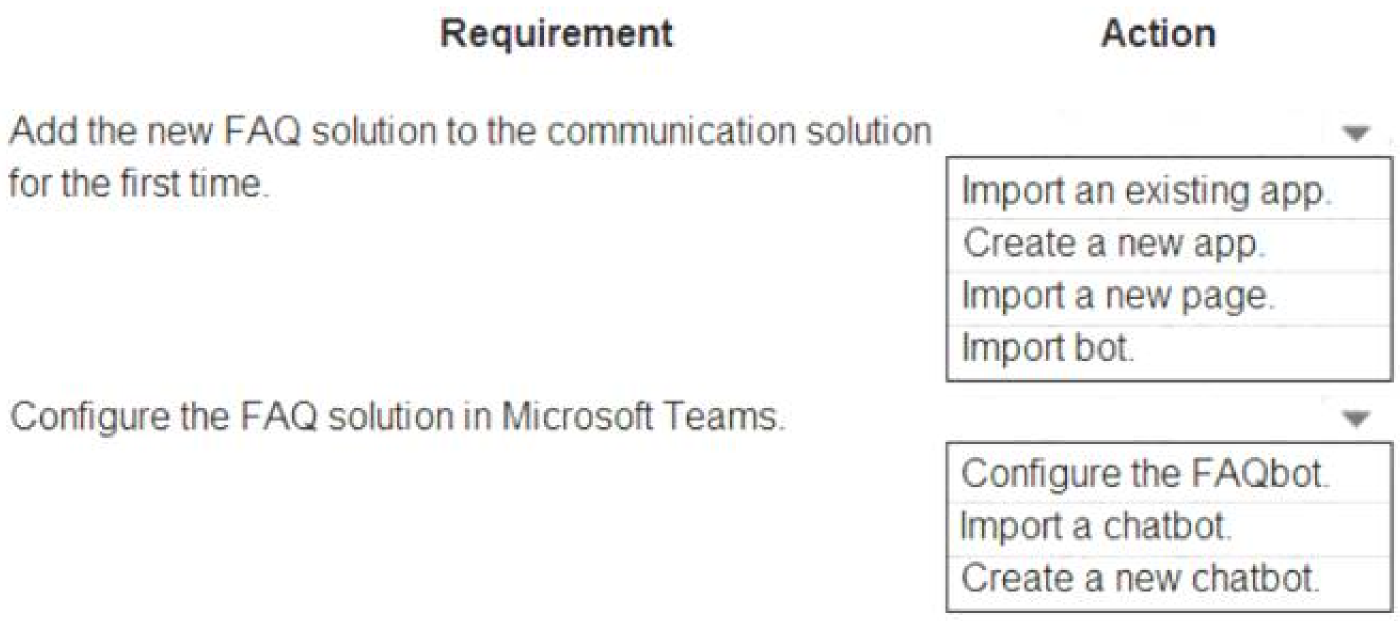


A. Mastered
B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 93
- (Exam Topic 3)
You need to embed the FAQbot into the communication solution.
Which actions should you perform? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.



A. Mastered
B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 97
- (Exam Topic 3)
A company creates a Power Automate cloud flow for a Power Apps app.
The cloud flow must send a daily email that contains a list of year-to-date (VTD) totals. You need to configure the flow.
Which feature should you use?

A. Parallel branch
B. Loop
C. Condition
D. Wait

Answer: C

NEW QUESTION 100
- (Exam Topic 3)
You are a Dynamics 365 Customer Service developer. A salesperson creates a chart.
You need to ensure that the chart is available to all users on the team. What should you do?

A. Share the chart with the team.
B. Assign the chart to each person on the team.
C. Export the user chart to Power B
D. Import the chart as a Power BE visualization.
E. Export the user chart for import as a user chart.

Answer: A

NEW QUESTION 103
- (Exam Topic 3)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You are creating Power Virtual Agents chatbot that captures demographic information about customers. The chatbot must determine the group a customer belongs to based on their age. The age groups are:
- 0 - 17

- 18 - 25
- 26 - 35
- 36 - 55
- 55 - 100

You need to configure the chatbot to ask a question that can be used to determine the correct age group. Solution: Use Date and time for Identify in the question and then add branches that use conditional logic to
determine the age group.
Does this meet the goal?

A. Yes
B. No

Answer: B

NEW QUESTION 107
- (Exam Topic 3)
You configure and test a user interface (Ul) flow. You plan to run the flow as a scheduled flow.
The Ul flow must run on a Windows 10 device. As part of process automation, the Ul flow must sign into the Windows 10 device with the credentials for a user account named User1.
You need to ensure that the flow runs during non-peak hours and requires no physical user intervention. What should you do?

A. Ensure that all user sessions are signed out except for locked user sessions.
B. Ensure that the User1 account has an active user session on the device.
C. Ensure that all user sessions are signed out.
D. Ensure that there are no active user sessions on the device.

Answer: D

Explanation:
Reference:
https://docs.microsoft.com/en-us/power-automate/ui-flows/run-ui-flow

NEW QUESTION 110
- (Exam Topic 3)
A company uses Power Apps and Power Automate.
There is an issue with the existing flow in the test environment. Development changes are allowed in the test environment.
You need to troubleshoot the issue with the flow.
Which command should you use? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Action	Command
Enable changes to the flow.	Add existing Remove Edit Turn off
Enable changes to the object.	Edit Publish Turn off

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Graphical user interface, text, application Description automatically generated

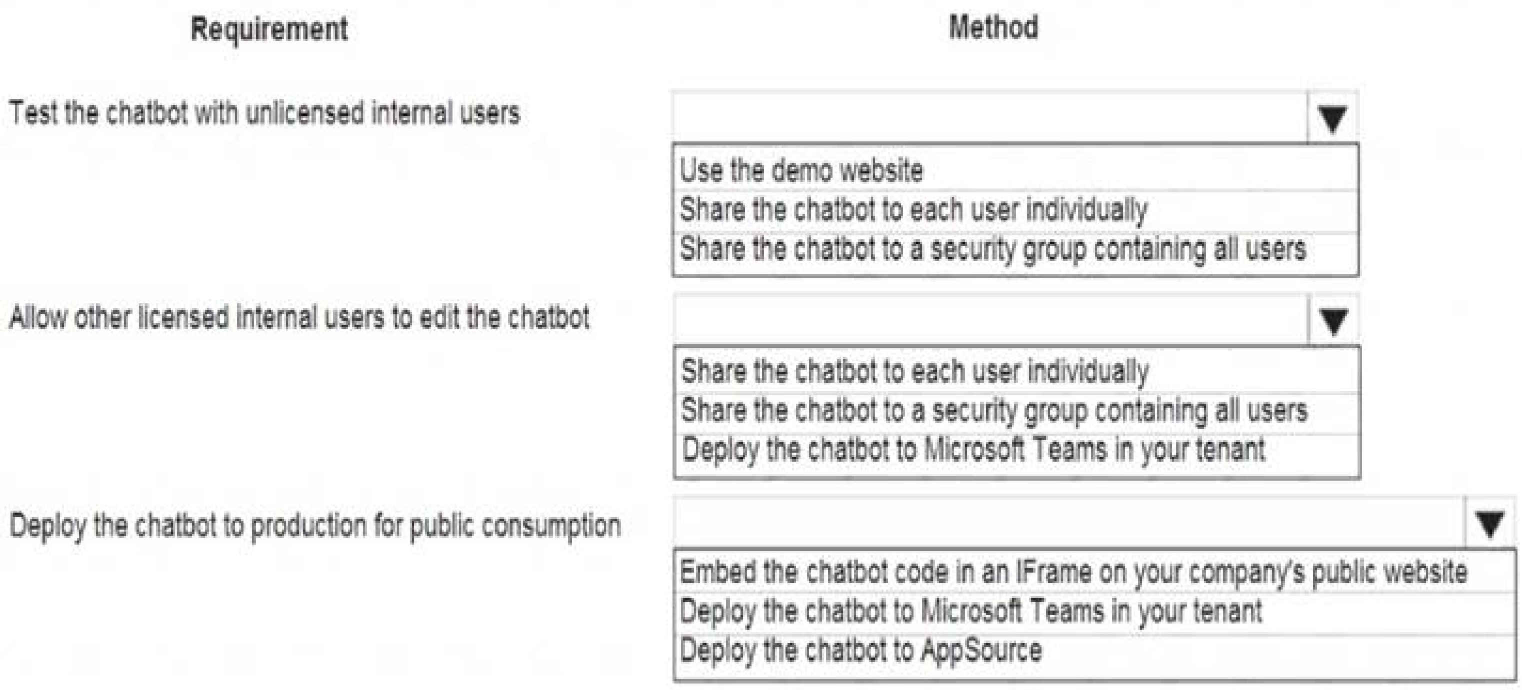
NEW QUESTION 114
- (Exam Topic 3)
You need to build a Power Bl dashboard for sales managers to track opportunities.
When a new sale closes that is greater than S1 million, a notification must pop up and an email must be sent to the leadership team.
You need to ensure the email is sent without editing the Microsoft Dataverse.
Which two elements should you configure? Each correct answer is part of the solution. NOTE: Each correct selection is worth one point.

A. alerts in Power Bl
B. a calculated column in the Dataverse
C. a custom connector
D. a paginated report to save to Microsoft OneDrive

E. a Power Automate flow

Answer: AE

NEW QUESTION 118
- (Exam Topic 3)
You create a new Power Virtual Agents chatbot for an organization.
Testing and production deployment of the chatbot are not complete. You need to ensure that appropriate users can access the chatbot.
Which methods should you use? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.



A. Mastered
B. Not Mastered

Answer: A

Explanation:
Graphical user interface, application Description automatically generated
Box 1: Use the demo website
When publishing the bot to the web, you can publish to a prebuilt demo website (which you can use to share the bot with your teammates and stakeholders) and to your own live website.
Box 2: Share the chatbot to a security group containing all users.
A license for each user, also known as a "per user license" (or "Power Virtual Agent User License" as referred to on the Microsoft 365 admin center), should be assigned to individual users who need access to create and manage chatbots.
To simplify user license management, you can assign licenses to an Azure Active Directory (Azure AD) security group.
Box 3: Embed the chatbot code in an IFRame on your copany's public website
You can add your bot to a live website as an IFrame. Your live website can be a customer-facing external website or an internal site, like a SharePoint or Yammer site.
Reference:
https://docs.microsoft.com/en-us/power-virtual-agents/publication-connect-bot-to-web-channels https://docs.microsoft.com/en-us/power-virtual-agents/requirements-licensing

NEW QUESTION 119
- (Exam Topic 3)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You administer the Microsoft 365 and Power Platform environments for Contoso, Ltd. The company has a model-driven app that is used to track customer interactions with employees. The app uses standard table types for customers. A user named Elisabeth Rice signs in to the app by using the following sign in name: Elisabeth.Rice@contoso.com.
After marriage, Elisabeth changes her legal name to Elisabeth Mueller.
You need to update the sign in name for the user without losing any application history. Solution: Change Elizabeth's username in the user record for the app.
Does the solution meet the goal?

A. Yes
B. No

Answer: A

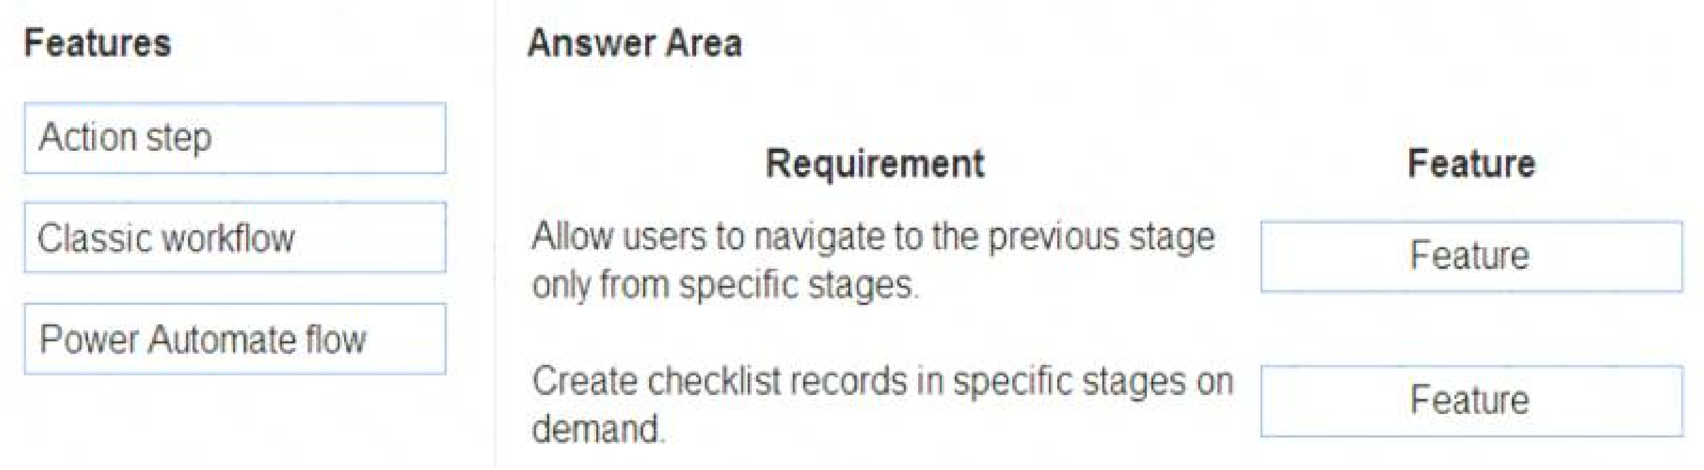
NEW QUESTION 120
- (Exam Topic 3)
Your organization does not permit the use of custom code for solutions. You need to create a view that can be viewed by all users in an organization. Where should you create the view?

A. List view of the entity
B. Microsoft Visual Studio
C. Templates area
D. Maker portal

Answer: A

Explanation:
Edit a public or system view in app designer
You can change the way a public or system view is displayed by adding, configuring, or removing columns.
> In the Views list for a table, select the Show list of references down arrow Drop Down. Edit View.Graphical user interface, application Description automatically generated
> Next to the view you want to edit, select Open the View Designer Open view Designer. The view opens in the view designer.
When you edit a public or system view, you must save and publish your changes before they will be visible in the application.
Reference:
https://docs.microsoft.com/en-us/powerapps/maker/model-driven-apps/create-edit-views-app-designer

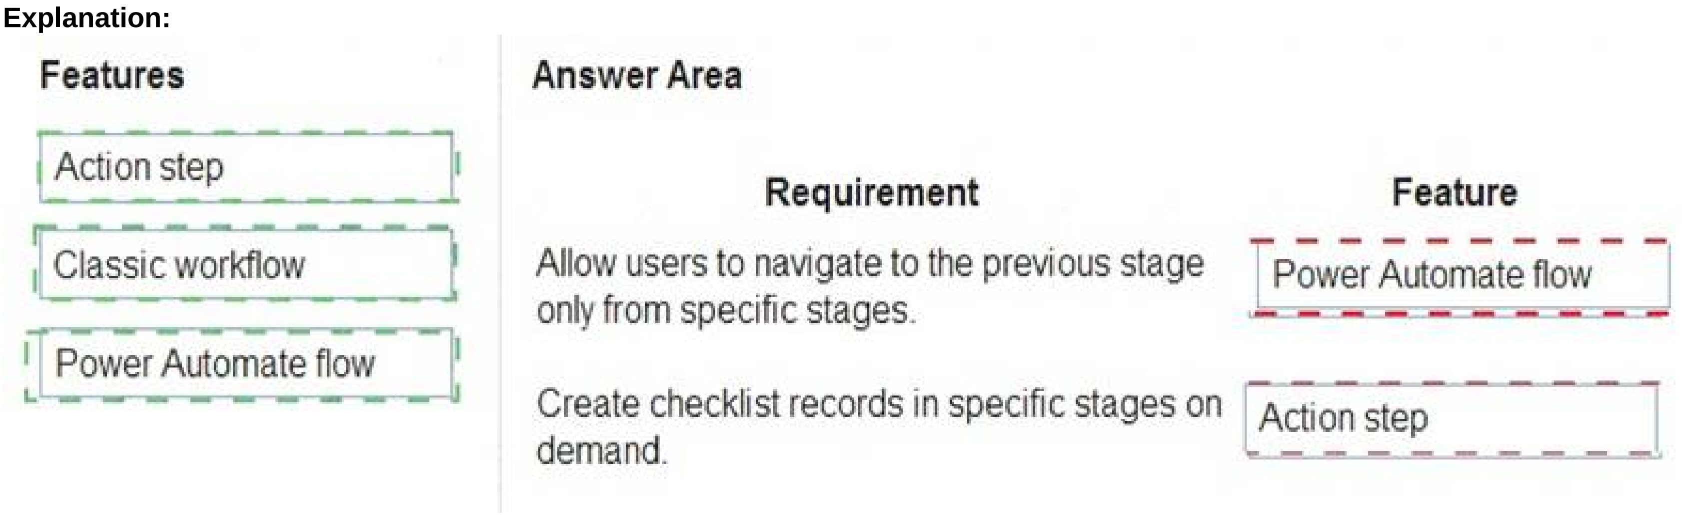
NEW QUESTION 121
- (Exam Topic 3)
You have a business process flow.
You need to update the business process flow while minimizing administrative and maintenance efforts. What should you implement? To answer, drag the appropriate features to the correct requirements. Each
feature may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.



A. Mastered
B. Not Mastered

Answer: A

Explanation:



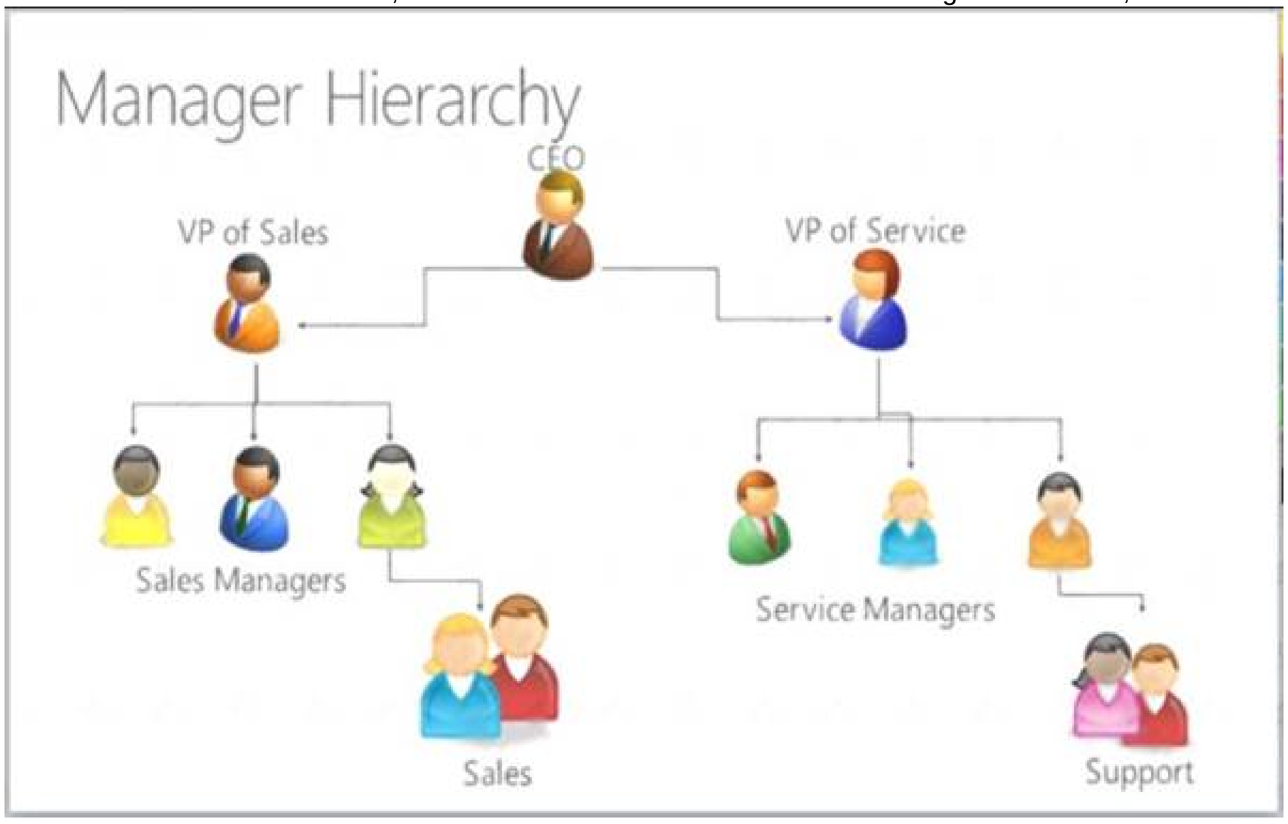
NEW QUESTION 122
- (Exam Topic 3)
You are setting up Power Apps security for a company. The company has a CEO, two vice presidents, and 10 managers. Five support representatives report to each manager.
You set up Manager Hierarchy so managers are able to view data only for the representatives who report to them. The CEO must be able to view all data for everyone. All support representatives must be able to view customer information in each other's data across all managers.
You need to resolve issues that arise during testing.
What should you do? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Issue	Action
Managers are unable to view all their report data.	Add the manager's name to the representative's user record. Change the Manager Hierarchy depth to 2. Move the manager and reports to a separate business unit. Set up a position in hierarchy.
The CEO is unable to view representative data but can view manager data.	Add the CEO to the representative user record as a manager. Change Manager Hierarchy depth to 3. Create team security.
Five support representatives can view only their own data.	Add the manager's name to the representative's user record. Add users to field security. Set up a position hierarchy.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Move the manager and reports to a separate business unit.
Keep the Manager hierarchy, and put the reports to the appropriate business unit.
Note: Two security models can be used for hierarchies, the Manager hierarchy and the Position hierarchy. With the Manager hierarchy, a manager must be within the same business unit as the report, or in the parent business unit of the report's business unit, to have access to the report's data. The Position hierarchy allows data access across business units. If you are a financial organization, you may prefer the Manager hierarchy model, to prevent managers' accessing data outside of their business units. However, if you are a part of a customer service organization and want the managers to access service cases handled in different business units, the Position hierarchy may work better for you.
Box 2: Add the CEO to the representative user record as a manager. Set up Manager and Position hierarchies
The Manager hierarchy is easily created by using the manager relationship on the system user record. You use the Manager (ParentsystemuserID) lookup field to specify the manager of the user.
Note: Depth is used to limit how many levels deep a manager has Read-only access to the data of their reports. For example, if the depth is set to 2, the CEO can see the data of the VP of Sales, VP of Service and Sales and Service Managers. However, the CEO doesn't see the Sales data or the Support data.



Box 3: Add users to field security
Power Platform's field-level security lets you set which fields users can see or edit. Reference: https://docs.microsoft.com/en-us/power-platform/admin/hierarchy-security https://docs.microsoft.com/en-us/power-platform/admin/field-level-security

NEW QUESTION 124
- (Exam Topic 3)
A bank uses Power BI visualizations to help determine whether they should loan money to a customer. The bank has three different visuals that are part of a Power BI report. The bank uses a set of four risk variables that indicate whether the customer is creditworthy.
You must create a mechanism so that bank employees can change the values of the four risk variables. Changes to the value of any variable must cause the three visualizations to update.
You need to create the solution.
Which action should you perform? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Requirement	Action
Update the visualizations when users change the values of the risk variables.	Embed a canvas app in a Power BI report. Embed a Power BI report in a model-driven app. Embed a model-driven app in a Power BI report.
Ensure that users can adjust the values of the four risk variables that contribute to a customer's credit risk.	Use Power BI tiles. Use Power Apps visuals. Use the Power BI service.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Embed a Power BI report in a model-driven app
You can embed a Power BI report in a model-driven app main form. Box 2: Use the Power BI service.
The Power BI cloud service works with Microsoft Dataverse apps to provide a self-service analytics solution. Power BI automatically refreshes the app's data displayed. With Power BI Desktop or Microsoft Excel, Power Query for authoring reports and Power BI for sharing dashboards and refreshing data from model-driven apps, your users have a powerful way to work with your app's data.
Reference:
https://docs.microsoft.com/en-us/power-apps/maker/model-driven-apps/embed-powerbi-report-in-system-form
https://docs.microsoft.com/en-us/power-apps/maker/model-driven-apps/use-power-bi

NEW QUESTION 128
- (Exam Topic 3)
You have a business process flow (BPF) that interacts with the Account entity. You configure a new version for the BPF and add a new stage at the beginning.
You need to identify the impact of the new version on the existing account records.
What is the outcome in each scenario? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Scenario	Action
What happens to existing accounts?	Existing accounts show the old BPF. Existing accounts show the new BPF. Existing accounts only show the new stage.
What happens to new accounts?	No BPF is linked to a new account. The new BPF shows only the new stage for a new account. The new BPF is showing in a new account.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Graphical user interface, text Description automatically generated
Box 1: Existing accounts show the new BPF.
When an entity record is being created and if there are multiple BPFs defined on that entity. The system would do the following:
If the ProcessId field is set to Guid.Empty. The system will skip defaulting the BPF on that instance.
If the ProcessId field is set to specific BPF entity reference. The system will default to the specified BPF. If the ProcessId field on the record is not set. The system will default the BPF.
Box 2: No BPF is linked to a new account.
Note: A business process flow definition is represented as a custom entity and an instance of a process is stored as a record within that entity. Each record is associated with a data record (such as an Account, Contact, Lead, or Opportunity) and in case of cross-entity processes, with a data record for each participating entity.
Reference:
https://docs.microsoft.com/en-us/dynamics365/customerengagement/on-premises/customize/business-process-fl

NEW QUESTION 131
- (Exam Topic 3)
You are configuring a new Power Apps portal. You have two web roles, one for authenticated users and one for anonymous users. You grant the Anonymous

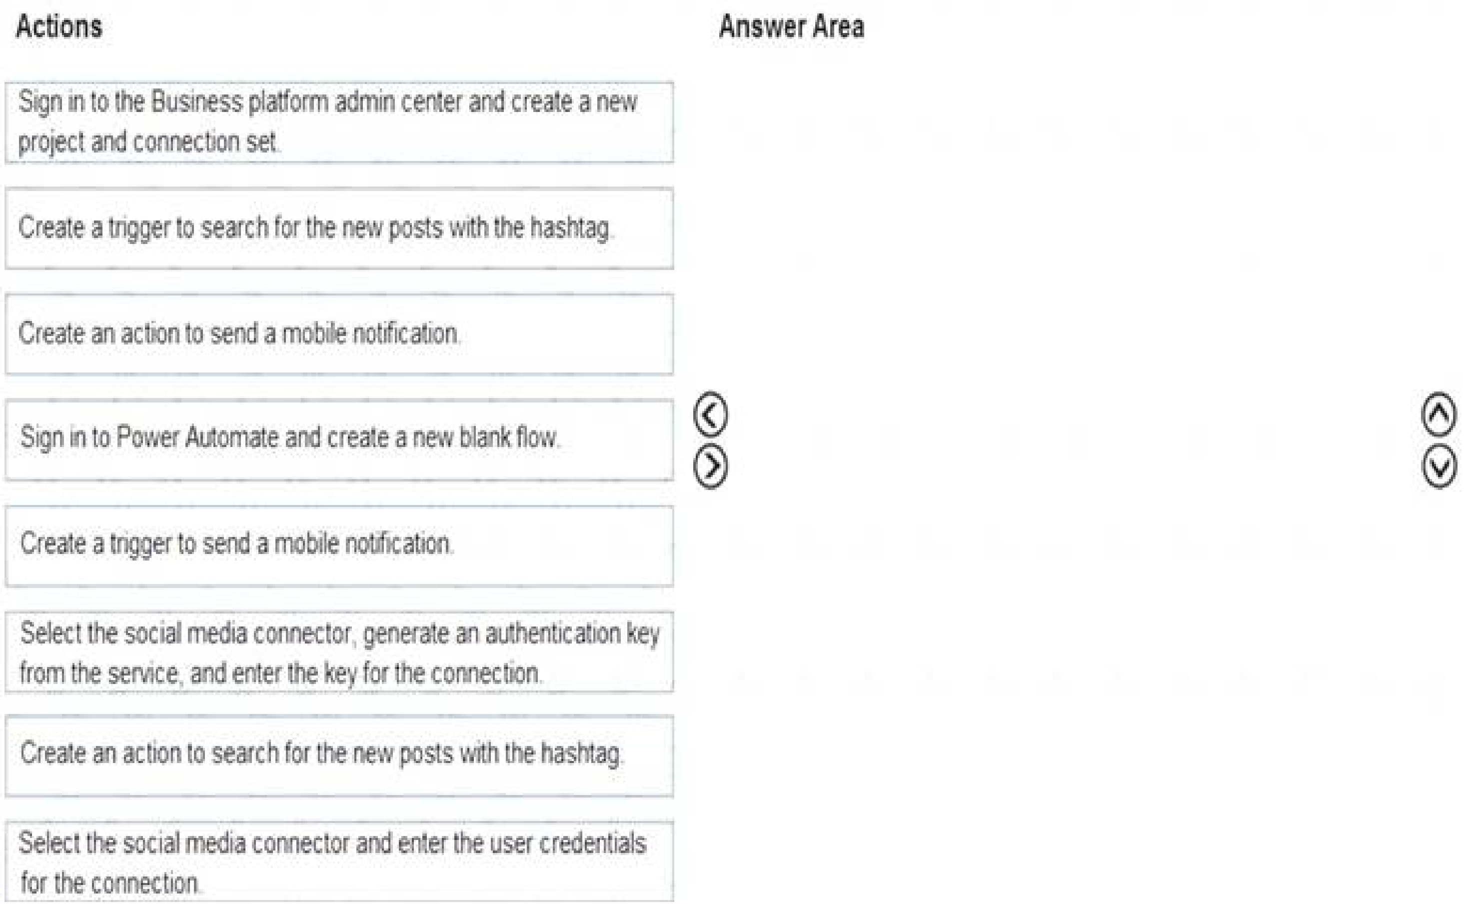
Users role to users.
A test user reports that they can access the home page but cannot view a page linked from the home page. You need to determine why the test user cannot view the portal page.
What is the cause of the issue?

A. Maintenance mode is enabled on the portal.
B. The setting to make the page available to everyone is disabled.
C. The Authenticated Users Web role does not have permission to view the page.
D. Inherited permissions are not enabled for the linked page.

Answer: D

Explanation:
https://docs.microsoft.com/en-us/powerapps/maker/portals/configure/webpage-access-control

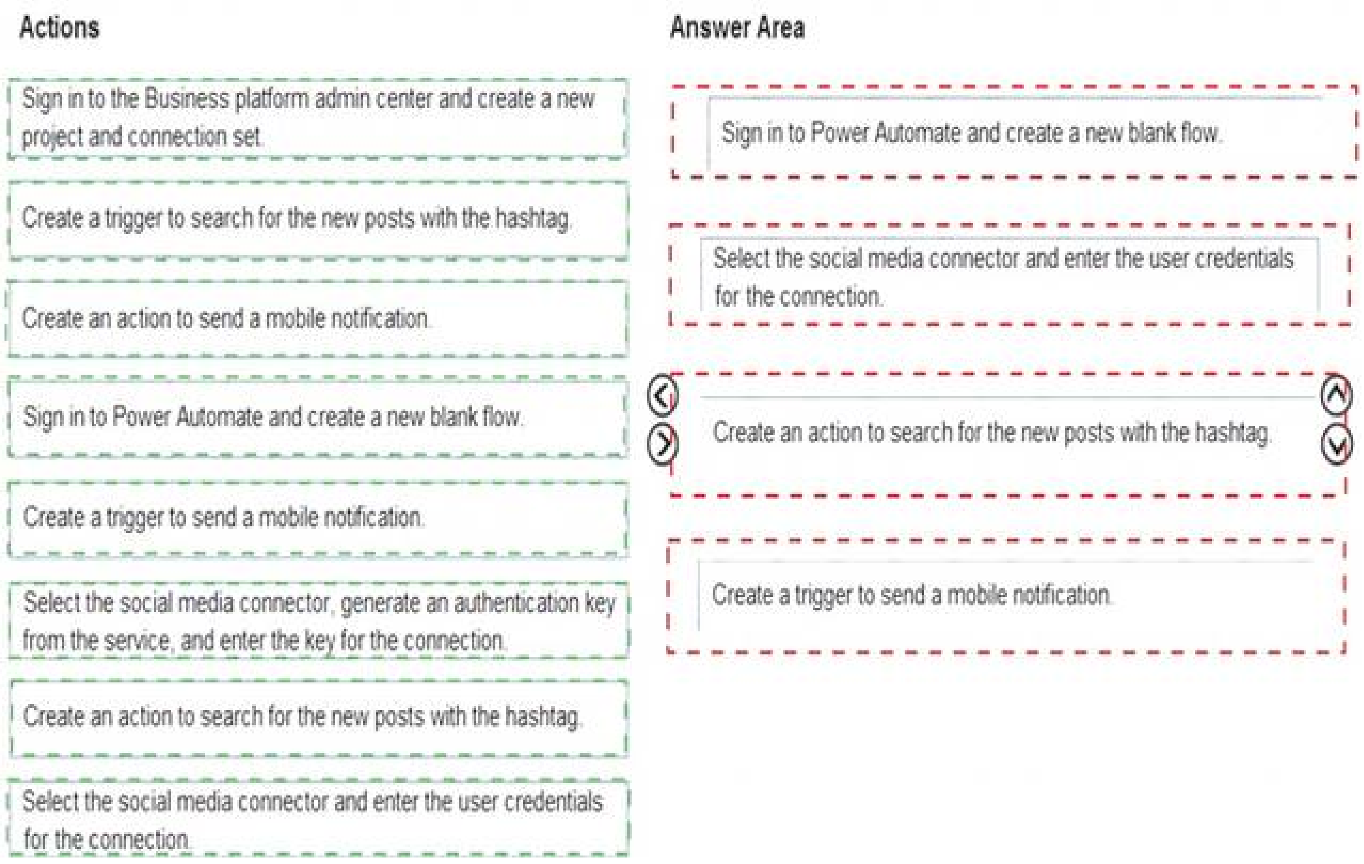
NEW QUESTION 136
- (Exam Topic 3)
You are a Dynamics 365 for Customer Service developer.
You must trigger a mobile notification whenever a specific hashtag is posted from Twitter. The notification will send email to the company's social media teams distribution list.
You need to create a connection to the Twitter service and build a solution.
Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.



A. Mastered
B. Not Mastered

Answer: A

Explanation:



NEW QUESTION 137
- (Exam Topic 3)
You plan to implement Microsoft Dataverse.
You must track changes for two columns in the Account table. You must maintain a historical log of changes for the two columns and track only what is necessary.
You configure the appropriate organization settings.
You need to configure the system to track changes for the two columns.
Which two actions should you perform? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.

A. Enable auditing for the Account table.
B. Enable auditing for the two specific columns.
C. Enable change tracking for the Account table.
D. Enable change tracking for the two specific columns.

Answer: AB

Explanation:
By setting the IsAuditEnabled property of a table's definition and the IsAuditEnabled property of each desired column's definition to true, data changes to records of those tables can be logged by the platform.
Note: There are three levels where auditing can be configured: organization, table, and column. The organization level is the highest level, followed by the table level, and finally the column level. For column auditing to take place, auditing must be enabled at the column, table, and organization levels. For table auditing to take place, auditing must be enabled at the table and organization levels.
Reference:
https://docs.microsoft.com/en-us/powerapps/developer/data-platform/configure-entities-attributes-auditing

NEW QUESTION 138
- (Exam Topic 3)
You have a canvas app that contains the following text input fields: Id, FirstName, LastName. The app also has a button named Button1.
The OnSelect property for Button1 contains the following expression: Collect(People, {Id:Id.Text, FirstName:FirstName.Text, LastName:LastName.Text})
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Statement	Yes	No
The People collection is automatically created if it does not already exist.	○	○
When Button1 is pressed, if a record with the current value of Id.Text already exists in the People collection, the values for FirstName and LastName are updated.	○	○
If you update the record in the Collection function to iclude the value from a new field named Age, it will result in an error.	○	○

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Graphical user interface, text, application, email Description automatically generated
Box 1: Yes
If the data source doesn't already exist, a collection is created. Box 2: No
Note: The Collect function adds records to a data source. The items to be added can be:
- A single value: The value is placed in the Value field of a new record. All other properties are left blank.
- A record: Each named property is placed in the corresponding property of a new record. All other properties are left blank.
- A table: Each record of the table is added as a separate record of the data source as described above. The table isn't added as a nested table to a record. To do this, wrap the table in a record first.

Box 3: No Reference:
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function-clear-collect-clearcollect

NEW QUESTION 139
- (Exam Topic 3)
On a Contact record, a user creates a Note record that contains the word running.
One week later, the user reports that they cannot find the Contact record associated with the Note record. You need to find the Note record.
Solution: Use Categorized Search to search for the word run. Does the solution meet the goal?

A. Yes
B. No

Answer: B

Explanation:
Instead use Relevance Search.
Note: Relevance Search finds matches to any word in the search term in any field in the entity. Matches may include inflectional words, like "stream," "streaming,"

or "streamed."
Reference:
https://docs.microsoft.com/en-us/power-platform/admin/configure-relevance-search-organization#what-is-releva

NEW QUESTION 144
- (Exam Topic 3)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You are creating Power Virtual Agents chatbot that captures demographic information about customers. The chatbot must determine the group a customer belongs to based on their age. The age groups are:

- 0 - 17
- 18 - 25
- 26 - 35
- 36 - 55
- 55 - 100

You need to configure the chatbot to ask a question that can be used to determine the correct age group. Solution: Use age for Identify in the question and then add branches for each group that use conditional logic.
Does this meet the goal?

A. Yes
B. No

Answer: B

Explanation:
Instead, create a custom Age group entity and synonyms for each individual age in the corresponding item. Use Age group for Identify in the question.
The prebuilt entities cover commonly used information types, but on some occasions, such as when building a bot that serves a specific purpose, you'll need to teach the bot's language understanding model some domain-specific knowledge.
To do this, you need to create a custom entity. Reference:
https://docs.microsoft.com/en-us/power-virtual-agents/advanced-entities-slot-filling

NEW QUESTION 149
- (Exam Topic 3)
You are designing a Power Virtual Agents chatbot.
You observe that the environment you plan to use does not appear as an option in the Power Virtual Agents user interface.
You need to ensure that you can create the chatbot in the environment that you want to use.
What should you do?

A. Create an environment in a supported region.
B. Convert the environment to a sandbox environment.
C. Change the region for the environment.

Answer: A

Explanation:
The environment doesn't show up in the drop-down menu of Power Virtual Agents
Your environment might not show up in the drop-down menu due to one of the following:
The environment doesn't have a database created. To resolve this issue, go to admin.powerplatform.com to create a database in your environment.
The environment is created in an unsupported region.
Reference: https://docs.microsoft.com/en-us/power-virtual-agents/environments-first-run-experience

NEW QUESTION 152
- (Exam Topic 3)
A company has a portal. Users sign into the portal by using a social media account.
The company wants to replace the existing portal with a Power Apps portal. users must sign up for access to the portal by using a Microsoft account and a unique invitation code that will be provided to the users.
You need to configure authentication for the home page.
Which values should you use? To answer, drag the appropriate values to the appropriate authentication settings. Each value may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
NO NO

NEW QUESTION 153
- (Exam Topic 3)
You are creating a new business process flow to qualify leads.
You create an action. The action is not available inside the Action Step. You need to make the action available to the Action Step.
Which two steps must you perform? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

A. Activate the action.
B. Select Run as an on-demand process
C. Add at least one step to the action.
D. Ensure that the entity for the action matches the corresponding entity for the business process flow stage.

Answer: CD

Explanation:
Reference:
https://docs.microsoft.com/en-us/business-applications-release-notes/april18/microsoft-flow/add-action-business
