Exam Questions HPE2-W11

Selling HPE Aruba Networking Solutions

NEW QUESTION 1

What common customer desire is addressed by HPE Aruba Networking Central network management?

- A. eliminating the need for network admins and letting server admins maintain the network
- B. deploying the network and then letting it run without the need for further management and monitoring
- C. managing each network silo with tools specialized for that silo's needs
- D. managing the network without having to install and maintain on-prem management tools

Answer: D

Explanation:

HPE Aruba Networking Central is a cloud-based network management solution that simplifies IT operations, improves agility, and reduces costs by unifying management of all network infrastructure. It eliminates the need for customers to invest in, deploy, and maintain on-premises management tools, and provides a single pane of glass for managing campus, branch, remote, data center, and IoT networks from one dashboard.

References:

- Selling HPE Aruba Networking Solutions, Rev.23.11, page 13: "Aruba Central is the cloud- native, single pane of glass for managing Aruba ESP. It provides a simple, secure, and cost-effective way to manage and monitor Aruba wired, wireless, and SD-WAN infrastructure, as well as Aruba security and location services."
- Aruba Central for Cloud-managed networking | HPE Aruba Networking: "Built on a cloud- native, microservices architecture, Central is an AI-powered solution that simplifies IT operations, improves agility, and reduces costs by unifying management of all network infrastructure."
- HPE Aruba Central | HPE United Kingdom - Hewlett Packard Enterprise: "Simplify how you provision, configure, and maintain networks by orchestrating all operations from a cloud-native dashboard. Aruba Central is your single point of visibility and control to oversee every aspect of wired and wireless LANs, WANs, and VPNs across campus, branch, remote, and data center locations."

NEW QUESTION 2

What is one way that HPE Aruba Networking ESP (Edge Services Platform) helps customers reduce operational costs?

- A. Customers can use HPE Aruba Networking NetEdit to manage multiple wired and wireless devices from a single console.
- B. HPE Aruba Networking ESP offloads all network management to common third-party solutions that customers likely already use.
- C. AI embedded in HPE Aruba Networking Central helps IT to troubleshoot more quickly and solve issues before they cause larger problems
- D. HPE Aruba Networking ESP solutions are plug-and-play and do not require any ongoing management.

Answer: C

Explanation:

HPE Aruba Networking ESP is a cloud-native platform that unifies infrastructure, security, policies, and AI-powered management across all your edges¹. One of the ways that it helps customers reduce operational costs is by embedding AI in HPE Aruba Networking Central, which is a cloud-based network management solution. HPE Aruba Networking Central with AIOps uses data-driven analytics, root cause analysis, and proactive remediation to help IT troubleshoot issues faster, optimize network performance, and improve user experience^{2,3}.

NEW QUESTION 3

What is one of the advantages of selling HPE GreenLake for Aruba NaaS Service Packs?

- A. They are the only HPE GreenLake for Aruba solutions that include Customer Experience Management at no extra cost.
- B. They enable you to add HPE Aruba Networking Intelligent Operations at discounted rate.
- C. They simplify the process of designing and selling network-as-a-service solutions to customers.
- D. They enable you to customize network as-a-service solutions as needed to meet customer requirements.

Answer: C

Explanation:

HPE GreenLake for Aruba NaaS Service Packs are pre-defined bundles of HPE Aruba Networking solutions that can be consumed as a service with HPE GreenLake for Networking. They simplify the process of designing and selling network-as-a-service solutions to customers by providing a standardized and easy-to-quote solution for common use cases, such as hybrid work, connected retail, and hybrid learning^{1,2}.

References: 1: Network as a Service (NaaS) solutions from HPE Aruba Networking | HPE Aruba Networking²: HPE GreenLake for Aruba networking – NaaS Service Packs - PSNow

NEW QUESTION 4

Which characteristic indicates a good opportunity for an HPE GreenLake for Aruba solution?

- A. Preferring to use network equipment beyond typical refresh cycles
- B. Being focused on budget and price-per-unit
- C. Preferring in-house support and maintenance
- D. Being under pressure to prove regulatory compliance

Answer: D

Explanation:

HPE GreenLake for Aruba is a network-as-a-service (NaaS) solution that enables customers to consume HPE Aruba Networking solutions as a service with HPE GreenLake for Networking. It provides customers with the flexibility, scalability, and security of a cloud- like experience, while reducing capital expenditures and operational costs¹. One of the characteristics that indicates a good opportunity for this solution is being under pressure to prove regulatory compliance, as HPE GreenLake for Aruba helps customers meet compliance requirements such as SOC 2 Type 2, PCI DSS, HIPAA, and GDPR by providing secure and auditable network services^{2,3}.

NEW QUESTION 5

You have recently upgraded a customer's campus network with HPE Aruba Networking CX switches. How might you pursue an additional opportunity?

- A. Discuss whether the customer is interested in enhancing users' experience with the location-based services embedded in HPE Aruba Networking CX switches.
- B. Discuss whether the customer is deploying new, more demanding applications, which might mean that it is time to upgrade the new switches again.
- C. Investigate opportunities for selling additional CX Advanced licenses or Advanced Central subscriptions to unlock advanced switching features.
- D. Investigate whether the customer needs an upgrade to their data center network, explaining that HPE Aruba Networking offers the same switching OS and operating model for the data center.

Answer: D

Explanation:

HPE Aruba Networking CX switches are designed to deliver a consistent and simplified operating experience across the campus and data center networks, using the same cloud-native operating system (AOS-CX), management platform (Aruba Central), and automation tools (NetEdit and Fabric Composer)¹². This can help the customer to reduce complexity, improve efficiency, and ensure high availability in their data center network. HPE Aruba Networking CX switches also support advanced features such as EVPN, VXLAN, and MLAG for data center fabrics³.

NEW QUESTION 6

What approach does Aruba Edge Service Platform (ESP) take towards IT operations?

- A. It applies machine learning to large data sets to identify issues and recommend fixes or optimizations automatically.
- B. It simplifies management by taking a one-size-fits-all approach in which most settings are non-customizable.
- C. It relies on expert IT admins who work in specialized teams to manage their segment of the Aruba network.
- D. It uses a distributed analytics approach in which operators gain visibility into local issues.

Answer: A

Explanation:

Aruba ESP (Edge Services Platform) is a cloud-native platform that leverages artificial intelligence for IT operations (AIOps) to simplify and improve network operations across all edges. It uses machine learning to analyze data from various sources, such as network devices, users, applications, and security events, to provide insights, recommendations, and automation for network optimization and troubleshooting.

References:

•Selling HPE Aruba Networking Solutions, Rev.23.11, page 15: "Aruba Central with AIOps provides AI-powered full-stack insights for enhanced root cause analysis (RCA), impact assessment, and recommendations. It helps IT teams simplify network operations and improve productivity by reducing manual tasks and proactively identifying and resolving network issues before they affect users and business applications."

•Introducing Aruba ESP: "Aruba ESP (Edge Services Platform) is the industry's first cloud-native platform designed to automate, unify, and secure the Edge — using AI to spot and fix problems before they impact your business."

•What is Aruba Edge Services Platform (ESP)? - Comport: "How Does Aruba ESP Work? Aruba ESP has the capability to analyze unstructured data that users, devices and applications provide across all of a network's domains. This data is then used to curate contextual information about identity, location, applications in use and security posture to become hyper-aware of a network's operations."

NEW QUESTION 7

Which customer need does HPE Aruba Networking EdgeConnect Mobile address?

- A. Enabling users to run demanding video conferencing applications over wireless connections at the corporate main office
- B. Enabling employees to connect to the corporate network from mobile devices and work from anywhere, including public locations
- C. Enabling secure connectivity between small branches and both the Internet and the corporate data center
- D. Enabling Zero Trust Security for wireless users accessing cloud applications from mid-sized branches

Answer: B

Explanation:

HPE Aruba Networking EdgeConnect Mobile is a secure SD-WAN solution that extends the benefits of HPE Aruba Networking EdgeConnect to mobile users and devices. It enables employees to connect to the corporate network from their smartphones, tablets, or laptops, and work from anywhere, including public locations such as airports, hotels, or coffee shops¹. It also provides consistent security, performance, and quality of experience for cloud and SaaS applications².

NEW QUESTION 8

An organization has adopted a hybrid work model and is concerned about security. Which distinguishing value of HPE Aruba Networking ESP should you emphasize?

- A. HPE Aruba Networking ESP relays all user traffic through the HPE Aruba Networking cloud to filter and secure the traffic.
- B. HPE Aruba Networking ESP makes it easy to enforce consistent role-based policies whether users connect from home, while traveling, or at an office.
- C. HPE Aruba Networking ESP takes an Internet perimeter-focused approach to security, which is ideal for organizations with remote workers
- D. HPE Aruba Networking ESP empowers admins to define manual security policies based on criteria such as switch port and SSID.

Answer: B

Explanation:

HPE Aruba Networking ESP is a cloud-native platform that unifies infrastructure, security, policies, and AI-powered management across all your edges¹. One of its distinguishing values is that it enables Zero Trust security, which applies consistent role-based policies to users and devices regardless of where they connect from². This ensures that only authorized and authenticated users and devices can access the network and its resources. NEW QUESTION 9

How does selling HPE GreenLake for Aruba solutions benefit Channel selling partners?

- A. They can offer their customers a significantly lower price per unit cost than a traditional networking purchase.
- B. They can sell HPE Aruba Networking ESP solutions not available as traditional purchases.
- C. They can convert their existing customers to lease agreements to extend the customer engagement.
- D. They can add another source of income by increasing their annual recurring revenue.

Answer: D

Explanation:

HPE GreenLake for Aruba is a network-as-a-service (NaaS) solution that enables customers to consume HPE Aruba Networking solutions as a service with HPE GreenLake for Networking. It provides customers with the flexibility, scalability, and security of a cloud-like experience, while reducing capital expenditures and operational costs¹. For channel selling partners, HPE GreenLake for Aruba benefits them by providing them with a new source of income by increasing their annual recurring revenue, as well as unlocking new revenue and margin opportunities by offering value-added services to their customers^{2,3}. References: 1: Network as a Service (NaaS) solutions from HPE Aruba Networking²: HPE GreenLake for Aruba partner benefits³: Hewlett Packard Enterprise introduces channel programs and new HPE GreenLake cloud services to help partners deliver the cloud experience everywhere

NEW QUESTION 10

You want to determine if a business decision-maker might be interested in HPE Aruba Networking Central with AIOps. What is a good topic to discuss?

- A. The cost to the business when network issues interfere with user productivity
- B. The benefits of better aligning the data center IT operations team with the development team
- C. The security benefits of applying intelligent access policies that follow users and devices
- D. The difference between machine learning and other forms of artificial intelligence (AI)

Answer: A

Explanation:

HPE Aruba Networking Central with AIOps is a cloud-native network management platform that leverages artificial intelligence to provide insights, automation, and security for wired, wireless, and SD-WAN networks¹. A good topic to discuss with a business decision-maker is how HPE Aruba Networking Central with AIOps can help reduce the cost of network downtime, improve user experience, and optimize network performance². References: 1: HPE Aruba Central | HPE Aruba Networking²: AIOps for IT efficiency | HPE Aruba Networking

NEW QUESTION 10

Which customer requirement would HPE Aruba Networking Central with AIOps address?

- A. The customer needs to implement role-based security across the wired and wireless networks.
- B. The customer wants to develop sophisticated maps for location-based services.
- C. The customer's IT team is understaffed or underqualified to troubleshoot and optimize the network.
- D. The customer wants to allow users to access applications remotely.

Answer: C

Explanation:

HPE Aruba Networking Central with AIOps is a cloud-based networking solution that empowers IT with AI-powered insights, intuitive visualizations, workflow automation, and edge-to-cloud security to manage campus, branch, remote, data center, and IoT networks from one dashboard¹. It can address the customer requirement of having an efficient and effective IT team by simplifying network operations, reducing manual tasks, providing proactive remediation, and optimizing network performance².

References: 1: Aruba Central for Cloud-managed networking | HPE Aruba Networking²: AIOps for IT efficiency | HPE Aruba Networking

NEW QUESTION 11

Which approach does HPE Aruba Networking ESP (Edge Services Platform) take toward network management?

- A. Providing many separate management tools, each specialized for a different customer requirement.
- B. Avoiding integration with third-party solutions so that customers receive a simpler, edge-to-edge solution.
- C. Prioritizing on-prem management, as it is the only way for customers to manage their network assets securely.
- D. Providing a unified platform from which the customer can manage all wired and wireless devices across multiple sites.

Answer: D

Explanation:

HPE Aruba Networking ESP (Edge Services Platform) is a cloud-native architecture that unifies infrastructure, security, policies, and AI-powered management across all your edges¹. It enables customers to manage their network assets securely and efficiently from a single dashboard, whether they are on-premises, in the cloud, or at the edge². It also integrates with third-party solutions to provide a comprehensive and flexible network management solution³.
