NEW QUESTION 1

Meraki Dashboard is used for ease of management of Meraki devices. Which other devices are integrated with the Meraki dashboard?

- A. Smart Assistants
- B. HVAC Sensors
- C. Catalyst devices
- D. WebEx Boards

Answer: C

Explanation:

The Meraki Dashboard is designed to provide a centralized management platform for various Cisco devices, including Meraki and Catalyst devices. The integration of Catalyst devices with the Meraki Dashboard allows for simplified management and monitoring, offering a unified view of the network. This integration enables IT administrators to oversee their network infrastructure, including switches and wireless access points, through the Meraki Dashboard's intuitive interface¹².

NEW QUESTION 2

What is the primary purpose of Umbrella's Secure Web Gateway?

- A. exposes shadow IT by providing the ability to detect and report on cloud applications across organizations
- B. analyzes sensitive data in-line to provide visibility and control over sensitive data
- C. isolates web traffic from the user device to prevent the possibility of malware infections
- D. logs and inspects web traffic for full visibility, URL and application controls, and protection against malware

Answer: D

Explanation:

The primary purpose of Umbrella's Secure Web Gateway (SWG) is to provide a comprehensive security solution that logs and inspects web traffic. This allows for full visibility into the web activities within an organization, enabling URL and application controls, and offering advanced threat protection against malware. SWG acts as a checkpoint between users and the internet, filtering and monitoring web traffic to ensure safe internet access while blocking potentially harmful content. It is designed to enforce security policies, prevent data leakage, and protect against web-based threats by inspecting URLs, detecting threats, and decrypting select encrypted traffic for inspection.

NEW QUESTION 3

Which technology is now in the middle of the same type of transformation that revolutionized telephones 20 years ago?

- A. cloud security
- B. network security
- C. application security
- D. video surveillance

Answer: D

Explanation:

Video surveillance technology is currently undergoing a transformation similar to the one that revolutionized telephones 20 years ago. The shift from analog to digital, the integration of Internet Protocol (IP) technology, and the use of artificial intelligence for facial recognition and behavior analysis are all part of this transformation. This evolution mirrors the transition telephones experienced with the advent of mobile technology and smart devices, which turned simple voice transmission tools into multifunctional devices with capabilities far beyond making calls.

NEW QUESTION 4

What do SMBs need to be truly smart?

- A. visibility for each process at each location separately
- B. optimized customer and employee experiences by providing an environment that meets modern expectations
- C. individually managed technology stacks
- D. separate dashboards to provide intelligent monitoring with actionable insight and device manageability

Answer: B

Explanation:

To be truly smart, SMBs need to optimize customer and employee experiences by providing an environment that meets modern expectations. This involves leveraging technology to create a seamless, efficient, and responsive experience for both customers and employees. A smart SMB utilizes integrated solutions that enhance collaboration, productivity, and security, enabling the business to adapt quickly to market changes and customer needs. By focusing on the user experience, SMBs can drive innovation and growth, ensuring they remain competitive in a rapidly evolving business landscape¹. References :=

NEW QUESTION 5

How is Cisco leveling the playing field between virtual and in-person workers?

- A. device cloud management
- B. inclusive collaboration suite
- C. cloud securityD smart cameras

Answer: B

Explanation:

Cisco is leveling the playing field between virtual and in-person workers by providing an inclusive collaboration suite. This suite includes technologies and tools that support work from anywhere, which is essential for a hybrid workforce. The suite enables employees to participate fully, regardless of their location, language preference, personality type, or familiarity with technology. By focusing on inclusivity and connectedness, Cisco ensures that all employees, whether remote or in-person, have equal opportunities to engage and contribute to their teams¹. NEW QUESTION 6

How does Cisco help SMBs with security?

- A. only check internal emails for phishing
- B. only priority applications should have zero trust-based access with multifactor authentication
- C. endpoint security with threat hunting and vulnerability management
- D. decentralized security policy

Answer: C

Explanation:

Cisco assists SMBs in enhancing their security posture through endpoint security that includes threat hunting and vulnerability management. This approach provides a robust defense against a wide range of cyber threats by actively seeking out potential security issues and managing vulnerabilities before they can be exploited. Cisco's endpoint security solutions are designed to protect against advanced threats at every endpoint, regardless of where users connect to the network¹. This proactive stance on security helps SMBs safeguard their assets and maintain business continuity in the face of evolving cyber threats. References :=

NEW QUESTION 7

Which Cisco product ensures that the right devices are connecting to the right application by the right person?

- A. Duo
- B. Webex
- C. Meraki
- D. Umbrella

Answer: A

Explanation:

The Cisco product that ensures the right devices are connecting to the right application by the right person is Duo. Duo is a multi-factor authentication (MFA) solution that verifies the identity of users and the health of their devices before they connect to the apps they use. This security measure helps prevent unauthorized access and potential breaches. Duo's MFA requires two or more verification factors, which significantly increases security because even if one factor (like a password) is compromised, unauthorized users would still need the second factor to gain access¹.

NEW QUESTION 8

Which fact is driving technology to be more important now than ever?

- A. It is less powerful.
- B. It is less complex.
- C. It helps drive better outcomes and experiences.
- D. It is cheaper.

Answer: C

NEW QUESTION 9

Which resource is used to learn about Cisco APIs and connect with other developers in Cisco communities?

- A. DevNet
- B. DevCad
- C. WebCad
- D. Black Belt

Answer: A

NEW QUESTION 10

Which Meraki product is used on Remote SMB work from anywhere?

- A. Meraki MT
- B. Meraki Systems Manager
- C. Meraki MS
- D. Meraki MR

Answer: B
