

Microsoft

Exam Questions PL-600

Microsoft Power Platform Solution Architect

NEW QUESTION 1

HOTSPOT - (Topic 1)

You need to recommend solutions for the organization's technical challenges.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Solution
Provide workers a self-service option for viewing personal and skills information.	<div style="border: 1px solid gray; padding: 2px;"> <div style="border-bottom: 1px solid gray; padding: 2px;">▼</div> <div style="padding: 2px;">Power Automate</div> <div style="padding: 2px;">QnA Maker</div> <div style="padding: 2px;">Azure Cognitive Services</div> </div>
Authenticate workers who use the self-service option for updating skills information.	<div style="border: 1px solid gray; padding: 2px;"> <div style="border-bottom: 1px solid gray; padding: 2px;">▼</div> <div style="padding: 2px;">Azure Active Directory B2B</div> <div style="padding: 2px;">Azure Active Directory B2C</div> <div style="padding: 2px;">Dynamics 365 owner team</div> </div>
Plan routes for audit teams.	<div style="border: 1px solid gray; padding: 2px;"> <div style="border-bottom: 1px solid gray; padding: 2px;">▼</div> <div style="padding: 2px;">Azure traffic routing</div> <div style="padding: 2px;">Address input component</div> <div style="padding: 2px;">Dynamics 365 Field Service</div> </div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Power Automate

Self-service purchase is available for Power Platform (Power BI, Power Apps, and Power Automate), Project, and Visio.

Box 2: Azure Active Directory B2B

Scenario: First Up Consulting recruits information technology (IT) workers for temporary or permanent positions at client companies.

Azure Active Directory (Azure AD) business-to-business (B2B) collaboration is a feature within External Identities that lets you invite guest users to collaborate with your organization. With B2B collaboration, you can securely share your company's applications and services with guest users from any other organization, while maintaining control over your own corporate data. Work safely and securely with external partners, large or small, even if they don't have Azure AD or an IT department. A simple invitation and redemption process lets partners use their own credentials to access your company's resources.

Note, Scenario:

? Workers must be able to sign into a portal by using their own email address.

Workers must be required to use a secure method of authentication to be able to view their data.

? User security roles must be customized to ensure that users are able to interact

only with the specific data in which they need access. Box 3: Dynamics 365 Field Service

Dynamics 365 Field Service functionality include:

An interactive schedule board helps dispatchers assign work orders to the best resources based on location, availability, skill set, priority, and more. This is done via a manual drag- and-drop method, a semi-automated scheduling assistant, or fully automated with Resource Scheduling Optimization.

The schedule board displays each resource--whether an employee, contractor, or equipment--and their scheduled work orders. Resources and their assigned jobs are also displayed on a map along with routes and traffic patterns in real time.

NEW QUESTION 2

HOTSPOT - (Topic 1)

You need to design tables for the solution.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Data type	Technical solution
Job placement record	<input type="text"/> Custom table Activity table Virtual table
Security clearance record	<input type="text"/> Lookup (N:1) Choice Lookup (N:N)

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Virtual Table

A virtual table is a custom table in Microsoft Dataverse that has columns containing data from an external data source. Virtual tables appear in your app to users

as regular table rows, but contain data that is sourced from an external database, such as an Azure SQL Database. Rows based on virtual tables are available in all clients including custom clients developed using the Dataverse web services.

Scenario:

? First Up uses an on-premises system to manage current and historical patient data including medications and medical visits.

? The company plans to reference historical data in the existing system. The records held in these systems will not be migrated to the new solution except for medication information.

? The solution must provide a worker appointment booking system that can access worker historical job placement data.

? First Up staff members must be able to view and update worker records. They must be able to see current and historical job placement data on the same form in the new solution.

Box 2: Lookup (N:1)

Each worker can have many security clearances, so need a 1:N relationship.

Scenario: The solution must support tracking of security clearance information for a worker including the date, status, and certifying agency.

NEW QUESTION 3

HOTSPOT - (Topic 2)

You need to recommend tools for agents and management.

Which tools should you recommend? To answer, select the appropriate option in the answer area.

NOTE: Each correct selection is worth one point.

User type

Tool

Agent

	▼
Power BI	
Dashboard	
Microsoft Power Automate	
Microsoft Power Apps	

Management

	▼
Power BI	
Microsoft Power Apps	
Microsoft AppSource	
Microsoft Power Automate	

Answer:

User type	Tool
Agent	<div style="border: 1px solid black; padding: 5px;"> <div style="background-color: #f0f0f0; padding: 2px; display: flex; justify-content: space-between; align-items: center;"> ▼ </div> <ul style="list-style-type: none"> Power BI Dashboard Microsoft Power Automate Microsoft Power Apps </div>
Management	<div style="border: 1px solid black; padding: 5px;"> <div style="background-color: #f0f0f0; padding: 2px; display: flex; justify-content: space-between; align-items: center;"> ▼ </div> <ul style="list-style-type: none"> Power BI Microsoft Power Apps Microsoft AppSource Microsoft Power Automate </div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Dashboard
 Agents need dashboards to show a current count of all reservations on the entity.
 Box 2: Power BI
 Management requires paginated reports for stakeholders.

NEW QUESTION 4

- (Topic 2)
 You need to recommend a solution for agents when working with customers to make reservations.
 What should you recommend?

- A. task flows
- B. Business Process Flows
- C. workflows
- D. Power Automate

Answer: B

Explanation:

Business process flows provide a guide for people to get work done. They provide a streamlined user experience that leads people through the processes their organization has defined for interactions that need to be advanced to a conclusion of some kind.

Use business process flows to define a set of steps for people to follow to take them to a desired outcome.

With business processes flows available as an entity, you can now use advanced finds, views, charts, and dashboards sourced from business process flow data for a given entity, such as a lead or opportunity.

Scenario:

- ? Agents need a solution to replace paper reservation checklists.
- ? Agents need dashboards to show a current count of all reservations on the entity.
- ? Agents need a way to track reservation issues.
- ? Agents need a visual indicator in the interface to determine the reservation step to provide a seamless customer experience.

NEW QUESTION 5

HOTSPOT - (Topic 2)

You need to recommend a collaboration tool for each group.

Which tool should you use? To answer, select the appropriate tool in the answer area.

NOTE: Each correct selection is worth one point.

Group	Tool
Maintenance supervisors	<div style="border: 1px solid black; padding: 2px;"> <div style="background-color: #f0f0f0; padding: 2px; display: flex; justify-content: space-between; align-items: center;"> ▼ </div> <div style="padding: 2px;"> <p>Microsoft Teams</p> <p>Notes</p> <p>Power Apps portal</p> <p>Posts</p> </div> </div>
Aircraft maintenance vendors	<div style="border: 1px solid black; padding: 2px;"> <div style="background-color: #f0f0f0; padding: 2px; display: flex; justify-content: space-between; align-items: center;"> ▼ </div> <div style="padding: 2px;"> <p>Dynamics 365 Workspace</p> <p>Notes</p> <p>Power Apps portal</p> <p>Posts</p> </div> </div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Microsoft Teams

Maintenance supervisors must not have access to Dynamics 365 Customer Service. The supervisors must be able to communicate with the contracts team about contracts.

Box 2: Dynamics 365 Workspace

Aircraft maintenance vendors must have only view and upload privileges to their invoices and receipts.

The Expense management mobile workspace lets users capture and upload a receipt, so that they can attach it to an expense report later.

NEW QUESTION 6

HOTSPOT - (Topic 3)

You need to recommend solutions to meet the inspection requirements.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Solution
View, assign, and resolve inspection bottlenecks.	<div style="border: 1px solid black; padding: 2px;"> <div style="background-color: #f0f0f0; padding: 2px; display: flex; justify-content: space-between; align-items: center;"> ▼ </div> <div style="padding: 2px;"> <p>Booking rules</p> <p>Schedule board</p> <p>Proficiency models</p> </div> </div>
Automatically input measurement readings from inspection gauges	<div style="border: 1px solid black; padding: 2px;"> <div style="background-color: #f0f0f0; padding: 2px; display: flex; justify-content: space-between; align-items: center;"> ▼ </div> <div style="padding: 2px;"> <p>Custom connector</p> <p>Azure IoT Hub connector</p> <p>Azure IoT Central connector</p> <p>Microsoft Dataverse connector</p> </div> </div>

Answer:

Requirement

Solution

View, assign, and resolve inspection bottlenecks.

Automatically input measurement readings from inspection gauges

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Schedule board

The Dynamics 365 Field Service schedule board provides an overview of resource availability and bookings you can make.

Box 2: Azure IoT Central connector

Information about each machine produced must be transferred to Dynamics 365 Field Service.

The difference between IoT hub and IoT central is that IoT is an application platform that simplifies the creation of Internet of Things solutions. IoT central helps to reduce the challenges of implementing IoT development, operations, and management. IoT Central is a fully managed Software as a Service solution.

Note: There are three ways you can use to connect IoT-enabled devices into the Field Service solution:

- ? Connected Field Service for Azure IoT Central
- ? Connected Field Service for Azure IoT Hub
- ? Connected Field Service for non-Azure IoT providers using the extensible IoT provider framework

NEW QUESTION 7

HOTSPOT - (Topic 4)

You are implementing a Microsoft Power Platform solution for a customer to include data migration from multiple legacy systems. The data includes lead and contact data. The environment includes an assigned security group.

The following issues have occurred during a go-live deployment attempt:

- Lookup values are not populated when data migration is complete.
- Data is being added to the contacts table that is not part of the data migration.
- Various users do not appear in the list of users available for record assignment. You need to resolve the go-live deployment issues.

How should you resolve the issue? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Issue	Solution
Lookup values are not populated when data migration is complete.	<ul style="list-style-type: none"> Split the import data into smaller import batches. Import the data by using an application user. Split the import data into smaller import batches. Disable all Power Automate flows, plug-ins, and workflows. Run data migration in a specific order.
Data is being added to the contacts table that is not part of the data migration.	<ul style="list-style-type: none"> Disable all Power Automate flows, plug-ins, and workflows. Disable auditing. Import the data by using an application user. Disable all Power Automate flows, plug-ins, and workflows. Split the import data into smaller import batches.
Various users do not appear in the list of users available for record assignment.	<ul style="list-style-type: none"> Add to a security group. Add to a security group. Add a security role. Add a Microsoft 365 role. Add a field security profile.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 8

- (Topic 4)

You are designing a self-service portal for a company. The portal must meet the following requirements:

- ? Customers must be able to submit and review cases.
- ? Customers must be able to chat with service representatives in near real time.
- ? Allow service representatives to select cases from queues and use knowledge articles to resolve customer concerns.

You need to recommend solutions for the company that do not require custom development.
 Which three apps or services should you recommend? Each correct answer presents part of the solution.
 NOTE: Each correct selection is worth one point.

- A. Dynamics 365 Field Service
- B. Dynamics 365 Customer Service
- C. Omnichannel for Customer Service
- D. Customer Insights
- E. Customer self-service portal

Answer: BCE

Explanation:

Reference:
<https://docs.microsoft.com/en-us/powerapps/maker/portals/portal-templates>
<https://docs.microsoft.com/en-us/dynamics365/customer-service/embed-chat-widget-portal>

NEW QUESTION 9

- (Topic 4)
 You are designing a database table for a client. You have the following requirements:
 ? Maintain a comprehensive list of colors and their corresponding RGB values and hexadecimal values.
 ? Prevent the addition of duplicate colors based on the hexadecimal value for the color.
 You need to recommend a design for the table.
 Which two actions should the client perform after the table is created? Each correct answer presents part of the solution.
 NOTE: Each correct selection is worth one point.

- A. Mark the hex value column as business required.
- B. Configure and schedule a recurring bulk record deletion job.
- C. Create alternate keys for the table.
- D. Mark the RGB value column as business required.

Answer: CD

Explanation:

B: Setting a column to Business Required means that the default behavior of a model- driven or canvas app will enforce this requirement in the app.
 C: With alternate keys you can now define a column in a Dataverse table to correspond to a unique identifier (or unique combination of columns) used by the external data store. This alternate key can be used to uniquely identify a record in Dataverse in place of the primary key. You must be able to define which columns represent a unique identity for your records. Once you identify the columns that are unique to the table, you can declare them as alternate keys through the customization user interface (UI) or in the code.
 Reference:
<https://docs.microsoft.com/en-us/powerapps/maker/data-platform/create-edit-field-portal>
<https://docs.microsoft.com/en-us/powerapps/developer/data-platform/define-alternate-keys- entity>

NEW QUESTION 10

HOTSPOT - (Topic 4)
 A food distribution terminal uses Microsoft Dynamics 365 Field Service and Microsoft Dynamics 365 Supply Chain Management to manage inventory and fulfill customer orders. Customers place custom orders through a Power Pages customer portal. Customers can enter different receiving times and dates on fresh produce order lines.
 The terminal needs to expose fresh produce order details from Dynamics 365 to its customers in the portal. Customers can control how much detail they see in the portal.
 You need to design a solution that meets the requirements. Which mechanism should you use for each requirement?
 To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Requirement	Mechanism
Retrieve data representing fresh produce details.	<ul style="list-style-type: none"> Custom connector Basic form Data gateway Advanced form Custom connector
Expose the fresh produce details.	<ul style="list-style-type: none"> Portal Management app Portal Management app Customer Service Insights Microsoft Power Platform admin center Microsoft 365 Apps admin center

Answer:

Answer Area

Requirement	Mechanism
Retrieve data representing fresh produce details.	<ul style="list-style-type: none"> Custom connector Basic form Data gateway Advanced form Custom connector
Expose the fresh produce details.	<ul style="list-style-type: none"> Portal Management app Portal Management app Customer Service Insights Microsoft Power Platform admin center Microsoft 365 Apps admin center

- A. Mastered
- B. Not Mastered

Answer: A

NEW QUESTION 10

- (Topic 4)

You are designing a Power Platform solution.

The company wants its development team to adopt the construction of repeatable components for its implementation team to reuse on different entities and forms.

You need to recommend a technology that meets these requirements. Which technology would you recommend the developers adopt to assist the implementation team?

- A. JavaScript
- B. Power Apps Component Framework control
- C. Web resource
- D. Canvas app

Answer: B

Explanation:

Power Apps component framework empowers professional developers and app makers to create code components for model-driven and canvas apps (public preview) to provide enhanced user experience for the users to work with data on forms, views, and dashboards.

Reference:

<https://docs.microsoft.com/en-us/powerapps/developer/component-framework/overview>

NEW QUESTION 12

- (Topic 4)

You are a Microsoft Power Platform solution architect working on a project. API calls are being sent between external applications and a Microsoft Power Platform solution.

The number of requests per user within a given time frame varies. Some users may be exceeding the service protection API limits.

You need to ensure that the API conforms to service protection limits.

Which three metrics should you review? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. The number of requests that a user can make each day.
- B. The total number of requests that can be processed each day.
- C. The number of concurrent requests that a user can make.
- D. The total execution time for requests by all users.
- E. The combined execution time required to process requests from a user.

Answer: ACE

Explanation:

Three types of service protection API limit errors that can be returned:

? Number of requests This limit counts the total number of requests during the preceding 300 second period.

? Execution time This limit tracks the combined execution time of incoming requests during the preceding 300 second period.

? Concurrent requests This limit tracks the number of concurrent requests. Reference:

<https://docs.microsoft.com/en-us/powerapps/developer/data-platform/api-limits>

NEW QUESTION 14

DRAG DROP - (Topic 4)

A company has a call center that manages customer-related issues.

The company has the following customer experience improvement requirements:

- Simulate a human conversation with a customer by providing a chat interface.
- Ensure the initial conversation is passed to a live agent upon escalation. You need to recommend a solution for each requirement.

Which solutions should you recommend? To answer, drag the appropriate solutions to the correct requirements. Each solution may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Solutions

- Power Virtual Agents
- Dynamics 365 Remote Assist
- Dynamics 365 Customer Service
- Omnichannel for Customer Service

Requirement

- Provide an automated chat interface.
- Pass conversation to a live agent upon escalation.

Solution

- Power Virtual Agents
- Omnichannel for Customer Service

Answer:

Solutions

- Power Virtual Agents
- Dynamics 365 Remote Assist
- Dynamics 365 Customer Service
- Omnichannel for Customer Service

Requirement

- Provide an automated chat interface.
- Pass conversation to a live agent upon escalation.

Solution

- Power Virtual Agents
- Omnichannel for Customer Service

- A. Mastered
- B. Not Mastered

Answer: A

NEW QUESTION 17

- (Topic 4)

A company is implementing Dynamics 365 Sales.

The company has turned off out-of-the-box quote calculations in order to implement its own custom calculations.

When users update a line item on a quote, they expect to see an updated total for the quote in real time. Users are reporting inconsistent behavior, with some aggregations taking up to two hours.

You review the system design and notice many asynchronous workflows. You need to recommend a solution to enable the calculation in real time.

Which two options should you recommend? Each answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. Consolidate asynchronous workflow into a single real-time workflow.
- B. Consolidate multiple asynchronous workflows into a single asynchronous workflow.
- C. Implement a business process flow to replace the existing workflows.
- D. Convert the asynchronous workflows to a synchronous plug-in.

Answer: AB

Explanation:

NEW QUESTION 19

- (Topic 4)

You are designing a Microsoft Power Platform solution for a company that has multiple Microsoft Dataverse environments.

You need to prevent specific users from accessing specific environments. What should you do?

- A. Remove all security roles from the users of the specific environments.
- B. Remove the user from the business unit.
- C. Remove the user from all security groups.
- D. Remove the user from all teams.

Answer: A

Explanation:

Microsoft Dataverse uses a role-based security model to help secure access to the database. Security roles can be used to configure environment-wide access to all resources in the environment.

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/database-security>

NEW QUESTION 24

DRAG DROP - (Topic 4)

A new customer asks you to design a solution for a Power Apps app that uses Microsoft Dataverse.

The customer wants to keep the service process simple and save on both licensing and development time.

You need to recommend solutions for the customer.

What should you recommend? To answer, drag the appropriate setting to the correct drop targets. Each source may be used once, more than once, or not at all.

You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Solutions	Answer Area	Solution
Canvas app	Scenario	
	Show the app in Microsoft Outlook.	Solution
Model-driven app	Use Universal Resource Scheduling.	Solution
Dynamics 365 Customer Service	Take notes on a mobile phone and record GPS coordinates automatically.	Solution

Answer:

Solutions	Answer Area	Solution
Canvas app	Scenario	
	Show the app in Microsoft Outlook.	Model-driven app
Model-driven app	Use Universal Resource Scheduling.	Dynamics 365 Customer Service
Dynamics 365 Customer Service	Take notes on a mobile phone and record GPS coordinates automatically.	Canvas app

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Model-drive app

Integration with Microsoft Outlook requires a Model-driven app.

Box 2: Dynamics 365 Customer Service

Schedule anything in Dynamics 365 using Universal Resource Scheduling. You can enable scheduling for any entity in Dynamics 365 Sales, Field Service, Customer Service, and Project Service Automation, including custom entities.

Box 3: Canvas app

NEW QUESTION 25

HOTSPOT - (Topic 4)

An animal welfare organization wants to track the movement of wolf packs in a region. Cameras at specific locations capture images when motion is detected within the camera sensor range. Staff upload the images manually to a shared drive and then analyze the images.

The organization wants to automate image capture and analysis. The organization has the following requirements:

- ? Save captured images in an appropriate location.
- ? Analyze saved images by using an image recognition process.
- ? Display data in real-time dashboards.

You need to recommend the correct technology for the requirements.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Technology option
Save captured images in an appropriate location.	<div style="border: 1px solid gray; padding: 5px;"> <div style="background-color: #f0f0f0; padding: 2px; display: flex; justify-content: space-between; align-items: center;"> ▼ </div> <ul style="list-style-type: none"> Business process flow Desktop flow Instant cloud flow Automated cloud flow </div>
Analyze saved images by using an image recognition process.	<div style="border: 1px solid gray; padding: 5px;"> <div style="background-color: #f0f0f0; padding: 2px; display: flex; justify-content: space-between; align-items: center;"> ▼ </div> <ul style="list-style-type: none"> Instant cloud flow and AI Builder Automated cloud flow and AI Builder Desktop flow and AI Builder </div>
Display data in real-time dashboards.	<div style="border: 1px solid gray; padding: 5px;"> <div style="background-color: #f0f0f0; padding: 2px; display: flex; justify-content: space-between; align-items: center;"> ▼ </div> <ul style="list-style-type: none"> Dynamics 365 interactive experience dashboard Model-driven app dashboard with native graphs Model-driven app dashboard with Power BI </div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Automated cloud flow.

Create a cloud flow when you want your automation to be triggered either automatically, instantly, or via a schedule.

Automated flows: Create an automation that is triggered by an event such as arrival of an email from a specific person, or a mention of your company in social media.

Box 2: Desktop flow and AI Builder

Desktop flows are used to automate tasks on the Web or the desktop. Using Power Automate Desktop you can automate tasks on the desktop as well as the Web.

Box 3: Model-driven app dashboard with Power BI

The Power BI cloud service works with Microsoft Dataverse apps to provide a self-service analytics solution. Power BI automatically refreshes the app's data displayed.

NEW QUESTION 29

- (Topic 4)

A company sells antique books. The company stores data about book locations in an existing system by using the following database fields: Room, Shelf.

The company must import the data from the existing system into a Power Platform solution. Existing data into must be modified to match the design of the new solution.

You need to recommend a solution to combine the room and shelf fields into a single column during the import process.

Which tool should you recommend?

- A. Power Platform dataflows
- B. Data Import Wizard
- C. import from CSV
- D. Microsoft Excel Online

Answer: B

Explanation:

Dataverse includes a web application tool called Import Data Wizard. You use this tool to import data records from one or more comma-separated values (.csv), XML Spreadsheet 2003 (.xml), or text files.

Use transformation mapping to modify data before importing it. For example, split a full name that is contained in the source file into a first name and a last name to match the target columns for a table.

Note:

? To implement data import, you typically do the following:

- ? Create a comma-separated values (CSV), XML Spreadsheet 2003 (XMLSS), or text source file.
- ? Create a data map or use an existing data map.
- ? Create a comma-separated values (CSV), XML Spreadsheet 2003 (XMLSS), or text source file.
- ? Create a data map or use an existing data map.
- ? Associate an import file with a data map.
- ? Upload the content from a source file to the associated import file.
- ? Parse the import file.
- ? Transform the parsed data.
- ? Upload the transformed data into the target Dataverse server.

Reference:

<https://docs.microsoft.com/en-us/powerapps/developer/data-platform/import-data>

<https://docs.microsoft.com/en-us/powerapps/developer/data-platform/add-transformation-mappings-import>

NEW QUESTION 31

HOTSPOT - (Topic 4)

You are designing a model-driven app for a hospital. The app will be used to track teams at the hospital including:

Team	Comments
Cleaning	There are three predetermined cleaning teams. Tasks are assigned to a team. Anyone on the team can complete an assigned task.
Emergency room	These teams are formed as needed based on patient needs and staff availability.
Billing	These teams are assigned to specific hospital departments. Team members must only see data for the hospital department to which they are assigned.

You need to recommend the team types to use.

Which team types should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Team type
Cleaning teams	<div style="border: 1px solid gray; padding: 2px;"> <div style="background-color: #ccc; height: 20px; display: flex; justify-content: flex-end; align-items: center; padding-right: 5px;">▼</div> <div style="border: 1px solid gray; padding: 2px;"> <p>Access</p> <p>Owner</p> </div> </div>
Emergency room teams	<div style="border: 1px solid gray; padding: 2px;"> <div style="background-color: #ccc; height: 20px; display: flex; justify-content: flex-end; align-items: center; padding-right: 5px;">▼</div> <div style="border: 1px solid gray; padding: 2px;"> <p>Access</p> <p>Owner</p> </div> </div>
Billing teams	<div style="border: 1px solid gray; padding: 2px;"> <div style="background-color: #ccc; height: 20px; display: flex; justify-content: flex-end; align-items: center; padding-right: 5px;">▼</div> <div style="border: 1px solid gray; padding: 2px;"> <p>Access</p> <p>Owner</p> </div> </div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Owner team

Owner team: An owner team owns records and has security roles assigned to the team. A user's privileges can come from their individual security roles, those of the teams that they're part of or the ones they inherit. A team has full access rights on the records that the team owns. Team members are added manually to the owner team.

Box 2: Access team

Access team: An access team doesn't own records and doesn't have security roles assigned to the team. The team members have privileges defined by their individual security roles and by roles from the teams they're members of. These members share records with an access team, and the team is granted access rights to the records. Access rights include Read, Write, and Append.

Box 3: Owner team

NEW QUESTION 36

HOTSPOT - (Topic 4)

A company plans to create a Microsoft Power Platform solution that integrates with Dynamics 365 Sales. The solution must meet the following requirements:

- Connect directly with a Microsoft Azure SQL database as an external data source at run time where specific data is available in the Dynamics 365 Sales solution without the need for data replication.
- An external system needs to send data to the company's Dynamics 365 Sales solution. You need to recommend the most suitable solution to integrate Dynamics 365 Sales with both systems.

What should you recommend? To answer, select the appropriate option in the answer area.

Answer Area

Integration requirement	Solutions
Have read-only visibility of data from an external Azure SQL database.	<input type="checkbox"/> Use virtual tables. <input type="checkbox"/> Use a custom plug-in. <input type="checkbox"/> Use Dynamics 365 Web API. <input type="checkbox"/> Use a web resource to display data.
External system sends data to Dynamics 365 Sales.	<input type="checkbox"/> Use a custom plug-in. <input type="checkbox"/> Use Dynamics 365 Web API. <input type="checkbox"/> Use a web resource to display data.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Integration requirement	Solutions
Have read-only visibility of data from an external Azure SQL database.	<input type="checkbox"/> Use virtual tables. <input checked="" type="checkbox"/> Use a custom plug-in. <input type="checkbox"/> Use Dynamics 365 Web API. <input type="checkbox"/> Use a web resource to display data.
External system sends data to Dynamics 365 Sales.	<input checked="" type="checkbox"/> Use a custom plug-in. <input checked="" type="checkbox"/> Use Dynamics 365 Web API. <input type="checkbox"/> Use a web resource to display data.

NEW QUESTION 40

- (Topic 4)

A company is struggling to gather insights from won and lost opportunities.

Users must be able to access the company's solution from mobile and desktop devices. The solution must meet the following requirements:

? context of other related data.

? Display data to users as charts and tables and provide drill-through capabilities.

You need to recommend a Power Platform tool to help the client visualize the data.

Which two technologies should you recommend? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Power BI
- B. Power Automate
- C. Power Virtual Agents
- D. Power Apps

Answer: AD

Explanation:

A: Power BI is a business analytics service by Microsoft. It aims to provide interactive visualizations and business intelligence capabilities with an interface simple enough for end users to create their own reports and dashboards. It is part of the Microsoft Power Platform.

D: Power BI Apps are an easy way for designers to share different types of content at one time. App designers create the dashboards and reports and bundle them together into an app. The designers then share or publish the app to a location where you, the business user, can access it. Because related dashboards and reports are bundled together, it's easier for you to find and install in both the Power BI service (<https://powerbi.com>) and on your mobile device. After you install an app, you don't have to remember the names of a lot of different dashboards or reports because they're all together in one app, in your browser or on your mobile device.

Reference:

<https://docs.microsoft.com/en-us/power-bi/consumer/end-user-apps>

NEW QUESTION 42

HOTSPOT - (Topic 4)

You are designing a model-driven app that provides marketing, sales, and service operations to a company.

The app must integrate with the following systems and data sources:

- A third-party marketing system for lead generation and website submissions.
- A Microsoft Excel Online file that contains manufacturing data on relevant products.
- A separate Microsoft Dataverse environment.

You need to recommend Power Automate connectors for the app.

Which connections should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Custom connector

While Azure Logic Apps, Microsoft Power Automate, and Microsoft Power Apps offer over 325+ connectors to connect to Microsoft and non-Microsoft services, you may want to communicate with services that aren't available as prebuilt connectors.

Box 2: Microsoft Dataverse

The Microsoft Dataverse connector provides several triggers to start your flows and many actions that you can use to create or update data in Dataverse while your flows run. You can use Dataverse actions even if your flows don't use a trigger from the Dataverse connector.

Use the Microsoft Dataverse connector to create cloud flows that start when data changes in Dataverse tables and custom messages.

NEW QUESTION 44

DRAG DROP - (Topic 4)

You are a Microsoft Power Platform architect. You have identified several project risks.

You need to categorize potential risks that are specific to your customer.

How should you categorize the risks? To answer, drag the appropriate categories to the correct risks. Each category may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Categories	Answer Area	Risk	Category
Resource risk	<ul style="list-style-type: none"> ○ ○ ○ ○ 	The project requires integration to custom-built on-premises systems that store business-sensitive data.	<input type="text"/>
Business risk		The organization is currently making significant go-to-market strategy adjustments.	<input type="text"/>
External risk		The customer has a limited budget in relation to the project requirements.	<input type="text"/>
Security risk			

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Categories	Answer Area	Risk	Category
Resource risk	<ul style="list-style-type: none"> ○ ○ ○ ○ 	The project requires integration to custom-built on-premises systems that store business-sensitive data.	Security risk
Business risk		The organization is currently making significant go-to-market strategy adjustments.	Business risk
External risk		The customer has a limited budget in relation to the project requirements.	Resource risk
Security risk			

NEW QUESTION 46

HOTSPOT - (Topic 4)

You are evaluating a solution design. You need to test the following scenarios: Mimic a user using an app.

- Obtain formal approval that an app meets customer-provided criteria.
- Confirmation that an app can manage expected peak loads.

Which test types should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Scenario	Test type
Mimic a user using an app.	<ul style="list-style-type: none"> Acceptance testing UI testing Acceptance testing Performance testing Load testing
Obtain formal approval that an app meets customer-provided criteria.	<ul style="list-style-type: none"> Acceptance testing Migration testing Acceptance testing Performance testing UI testing
Confirmation that an app can manage expected peak loads.	<ul style="list-style-type: none"> Performance testing Unit testing Acceptance testing Performance testing Integration testing

Answer:

Answer Area

Scenario	Test type
Mimic a user using an app.	<ul style="list-style-type: none"> Acceptance testing UI testing Acceptance testing Performance testing Load testing
Obtain formal approval that an app meets customer-provided criteria.	<ul style="list-style-type: none"> Acceptance testing Migration testing Acceptance testing Performance testing UI testing
Confirmation that an app can manage expected peak loads.	<ul style="list-style-type: none"> Performance testing Unit testing Acceptance testing Performance testing Integration testing

- A. Mastered
- B. Not Mastered

Answer: A

NEW QUESTION 48

HOTSPOT - (Topic 4)

A company plans to use a combination of model-driven and canvas apps for data interaction and Power BI for data reporting. The company has the following requirements:

- Share a canvas app with the auditor team.
- Ensure account balance values in Power BI are only viewable by the investment team.
- Streamline user administration and role assignment.

You need to recommend a security component to use for each requirement.

Which security components should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Requirement	Security component
Share a canvas app.	<ul style="list-style-type: none"> Microsoft Entra ID security group Security roles Column-level security Manager hierarchy model Microsoft Entra ID security group
Control account balance visibility.	<ul style="list-style-type: none"> Report access Report access Column-level security Microsoft Entra ID security group
Streamline user administration and role assignment.	<ul style="list-style-type: none"> Manager hierarchy model Security roles Column-level security Manager hierarchy model Microsoft Entra ID security group

Answer:

Answer Area

Requirement	Security component
Share a canvas app.	<ul style="list-style-type: none"> Microsoft Entra ID security group Security roles Column-level security Manager hierarchy model Microsoft Entra ID security group
Control account balance visibility.	<ul style="list-style-type: none"> Report access Report access Column-level security Microsoft Entra ID security group
Streamline user administration and role assignment.	<ul style="list-style-type: none"> Manager hierarchy model Security roles Column-level security Manager hierarchy model Microsoft Entra ID security group

- A. Mastered
- B. Not Mastered

Answer: A

NEW QUESTION 49

- (Topic 4)

A company wants to add an interactive checklist to a Power Platform solution to ensure that salespeople are following the same steps when qualifying leads. You need to recommend a solution that will incorporate this checklist. What should you recommend?

- A. Mastered
- B. Not Mastered

Answer: A

NEW QUESTION 51

- (Topic 4)

A company uses two separate unlinked apps to manage sales leads: a Power Apps app and a third-party application.

The client has the following requirements:

- ? Manage all leads by using the Power Apps app.
- ? Create a lead in the Power Apps app when a user creates a lead in the third-party application.
- ? Update leads in the Power Apps app when a user updates a lead in the third-party application.
- ? Connect to the third-party application by using an API.

You need to recommend strategies to integrate the Power Apps app and the third-party application.

Which three options can you use to achieve the goal? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Dual-write
- B. Custom connector
- C. Dataflow
- D. Power Automate cloud flow
- E. DataService connector

Answer: ADE

Explanation:

A: Customers should be able to adopt business applications from Microsoft and expect they speak the same language and seamlessly work together. Dual Write allows our customers to not think about these apps as different systems to write to independently; rather, the underlying infrastructure makes it seamless for these apps to write simultaneously.

D: Use Custom APIs to create your own APIs in Dataverse. With a Custom API you can consolidate a group of operations into an API that you and other developers can call in their code. The Common Data Service (current environment) connector enables calling Custom APIs actions in Power Automate.

E: Common Data Service provides access to the environment database on the Microsoft Common Data Service. It is available for Logic Apps, Power Automate, and Power Apps. Reference:
<https://docs.microsoft.com/en-us/business-applications-release-notes/april19/cdm-data-integration/dual-writelink-common-data-service-apps>

<https://docs.microsoft.com/en-us/connectors/commondataservice/> <https://docs.microsoft.com/en-us/powerapps/developer/data-platform/custom-api>

NEW QUESTION 52

HOTSPOT - (Topic 4)

A company offers continuing education courses for medical professionals. Each time a course is offered, the company tracks that the session has taken place in an Excel workbook.

The company maintains a list of required qualifications for an educator to teach a course. Educator qualifications range from languages spoken to advanced degrees.

The company needs the following custom table relationships defined:

- ? Associate educators with a list of their professional qualifications.
- ? Assign a primary educator to each course that is held.
- ? Collect information about every course that is held.

You need to determine the type of relationship that best fits the requirement.

Which type of table relationship should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Relationship
Educators must be associated with their qualifications.	<div style="border: 1px solid black; padding: 2px;"> <div style="background-color: #f0f0f0; padding: 2px; text-align: right;">▼</div> <div style="padding: 2px;"> Many-to-many relationship that uses a system generated table Many-to-many relationship that uses a custom table One-to-many relationship </div> </div>
When a course is held there must be a primary educator assigned.	<div style="border: 1px solid black; padding: 2px;"> <div style="background-color: #f0f0f0; padding: 2px; text-align: right;">▼</div> <div style="padding: 2px;"> Many-to-many relationship that uses a system generated table Many-to-many relationship that uses a custom table One-to-many relationship </div> </div>
When a course is held, the company needs to collect information on that session.	<div style="border: 1px solid black; padding: 2px;"> <div style="background-color: #f0f0f0; padding: 2px; text-align: right;">▼</div> <div style="padding: 2px;"> Many-to-many relationship that uses a system generated table Many-to-many relationship that uses a custom table One-to-many relationship </div> </div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Requirement	Relationship
Educators must be associated with their qualifications.	<div style="border: 1px solid black; padding: 2px;"> <div style="background-color: #f0f0f0; padding: 2px; text-align: right;">▼</div> <div style="padding: 2px;"> Many-to-many relationship that uses a system generated table Many-to-many relationship that uses a custom table One-to-many relationship </div> </div>
When a course is held there must be a primary educator assigned.	<div style="border: 1px solid black; padding: 2px;"> <div style="background-color: #f0f0f0; padding: 2px; text-align: right;">▼</div> <div style="padding: 2px;"> Many-to-many relationship that uses a system generated table Many-to-many relationship that uses a custom table One-to-many relationship </div> </div>
When a course is held, the company needs to collect information on that session.	<div style="border: 1px solid black; padding: 2px;"> <div style="background-color: #f0f0f0; padding: 2px; text-align: right;">▼</div> <div style="padding: 2px;"> Many-to-many relationship that uses a system generated table Many-to-many relationship that uses a custom table One-to-many relationship </div> </div>

NEW QUESTION 57

HOTSPOT - (Topic 4)

You are supporting the go-live process for a company. The company is responsible for migrating data to the Microsoft Power Platform by using a custom solution. The company reports the following issues:

- Migration processes fail due to operation timeouts.
- Records that include lookup columns often fail to load. You need to recommend a solution.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Issue	Solution
Migration processes fail due to operation timeouts.	<div style="border: 1px solid black; padding: 2px;"> <div style="background-color: #f0f0f0; padding: 2px; text-align: right;">▼</div> <div style="padding: 2px;"> Increase multithreading and/or batch size settings. Increase multithreading and/or batch size settings. Decrease multithreading and/or batch size settings. Ensure you are loading data into all tables at the same time. Ensure you are loading data into tables in a particular order. </div> </div>
Records that include lookup columns often fail to load.	<div style="border: 1px solid black; padding: 2px;"> <div style="background-color: #f0f0f0; padding: 2px; text-align: right;">▼</div> <div style="padding: 2px;"> Ensure you are loading data into tables in a specific order. Increase multithreading and/or batch size settings. Decrease multithreading and/or batch size settings. Ensure you are loading data into all tables at the same time. Ensure you are loading data into tables in a specific order. </div> </div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Issue	Solution
Migration processes fail due to operation timeouts.	<ul style="list-style-type: none"> Increase multithreading and/or batch size settings. Decrease multithreading and/or batch size settings. Ensure you are loading data into all tables at the same time. Ensure you are loading data into tables in a particular order.
Records that include lookup columns often fail to load.	<ul style="list-style-type: none"> Ensure you are loading data into tables in a specific order. Increase multithreading and/or batch size settings. Decrease multithreading and/or batch size settings. Ensure you are loading data into all tables at the same time. Ensure you are loading data into tables in a specific order.

NEW QUESTION 60

- (Topic 4)

A company has a model-driven app. The app has forms with both Business Rules and JavaScript added to handle the business logic on the form. The form contains logic that is enforced by using business rules. The company wants to apply the business rules to all forms in the app. You need to recommend a simplified form setup so the form can be maintained moving forward. What should you recommend?

- A. Manage the business logic with a Power Apps Component Framework (PCF) control.
- B. Evaluate whether complex parts of the logic can be solved by using Power Apps Component Framework (PCF) controls.
- C. Use Business Rules for the remaining functionality.
- D. Remove the Business Rules and use only JavaScript.
- E. Update logic to ensure Business Rules are optimized.
- F. Use JavaScript for the remaining functionality.

Answer: B

Explanation:

PCF controls are reusable. Reference:
<https://docs.microsoft.com/en-us/powerapps/developer/component-framework/overview>

NEW QUESTION 63

- (Topic 4)

You are evaluating a solution design for a model-driven app that will have a large number of complex forms.

Many of the forms take up to 10 seconds to load.

You need to recommend a solution to speed up loading times for the forms.

Which two solutions should you recommend? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Consolidate and reduce scripts.
- B. Use synchronous JavaScript requests.
- C. Move scripts into the OnLoad event.
- D. Remove unnecessary fields.

Answer: AD

Explanation:

Controls that require extra data beyond the primary record produce the most strain on form responsiveness and loading speed. These controls fetch data over the network and often involve a waiting period (seen as progress indicators) because it can take time to transmit the data.

Keep only the most frequently used of these controls on the default tab.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/model-driven-apps/design-performant-forms>

NEW QUESTION 65

DRAG DROP - (Topic 4)

You are designing a Microsoft Power Platform solution that will be deployed to two separate companies in the same Microsoft Office 365 tenant: Contoso, Ltd. and Contoso Pharmaceuticals.

The solution must meet the following security requirements:

- Restrict Contoso, Ltd. users from seeing the Contoso Pharmaceuticals company.
- Restrict access to specific forms.
- Restrict access to specific tables.

What should you recommend? To answer, drag the appropriate security types to the correct restrictions. Each security type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Security objects	Answer Area	Restriction	Security object
Security role	<div style="display: flex; align-items: center;"> <div style="border: 1px solid gray; width: 10px; height: 10px; margin-right: 5px;"></div> <div style="border: 1px solid gray; width: 10px; height: 10px; margin-right: 5px;"></div> <div style="border: 1px solid gray; width: 10px; height: 10px; margin-right: 5px;"></div> <div style="border: 1px solid gray; width: 10px; height: 10px; margin-right: 5px;"></div> </div>	Restrict Contoso, Ltd. users from seeing the Contoso Pharmaceuticals company.	<input type="text"/>
Team		Restrict access to specific forms.	<input type="text"/>
Security group		Restrict access to specific tables.	<input type="text"/>
User profile			

Answer:

Security objects	Answer Area	Security object
Security role	<p>Restriction</p> <p>Restrict Contoso, Ltd. users from seeing the Contoso Pharmaceuticals company.</p> <p>Restrict access to specific forms.</p> <p>Restrict access to specific tables.</p>	Team
Team		Security group
Security group		Security role
User profile		

- A. Mastered
- B. Not Mastered

Answer: A

NEW QUESTION 67

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company plans to automate the expense approval process.

Users currently enter data into an on-premises SQL Server database. You need to allow users to submit expenses from mobile devices.

Solution: Create a canvas app for expense data entry. Install an on-premises gateway. Create a cloud flow for approval and to add data to the SQL Server database.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: A

NEW QUESTION 68

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company plans to automate the expense approval process.

Users currently enter data into an on-premises SQL Server database. You need to allow users to submit expenses from mobile devices.

Solution: Create a canvas app for expense data entry. Create a desktop flow. Create a cloud flow for approval and trigger the desktop flow to add data to the SQL Server database.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 69

- (Topic 4)

You are a Microsoft Power Platform architect supporting the go-live phase of a canvas app. The canvas app accesses data on-premises and in the cloud.

Users are reporting the app is very slow to respond, especially upon initial launch. You need to optimize the performance of the app.

Which three actions should you complete? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Move data calls from the OnStart event to the Onload event.
- B. Reduce data row limits.
- C. Increase data row limits.
- D. Move data calls from the Onload event to the OnStart event.
- E. Review the settings of the data gateway for on-premises data sources.

Answer: ABE

NEW QUESTION 71

- (Topic 4)

You are designing forms for a Microsoft Power Platform solution. Each person must see only the columns required for their department.

Department	Requirements
Inside sales	<ul style="list-style-type: none"> • Use only a browser-based app. • Include fields for contact name, phone number, product, order date, and total amount owed.
Fulfillment	<ul style="list-style-type: none"> • Use either a mobile or browser-based app. • Include fields for contact name, product, and order date.
Field sales	<ul style="list-style-type: none"> • Use only a mobile app. • Include fields for contact name, address, phone number, and product.

You need to ensure that the forms open correctly, display only the fields needed, and that data can be entered quickly. How should you design the form?

- A. Create one form for each department Add only columns needed on the form for each departmen
- B. Assign the appropriate security role to each form.
- C. Create a shared form for all department
- D. Add all the column
- E. Add column-level security to columns not needed for each department
- F. Create one form for each departmen
- G. Add all columns needed for all department
- H. Use business rules to hide columns.
- I. Add new columns to an existing for
- J. Grant all departments security roles for that form.

Answer: A

NEW QUESTION 76

HOTSPOT - (Topic 4)

A company plans to deploy multiple Microsoft Dataverse environments. You are supporting the go-live process.

The company reports the following access issues:

- Users can access account records but cannot read a column m the table.
 A licensed user receives an insufficient permission error when opening leads.
 - A licensed user does not appear in the list of users available for security assignment. You need to resolve the issues.
- What should you do? To answer, select the appropriate options in the answer area NOTE: Each correct selection is worth one point.

Answer Area

Issue	Action
Users can access account records but cannot read a column in the table.	<input type="checkbox"/> Security role <input type="checkbox"/> Security group <input type="checkbox"/> Field security profile
A licensed user receives an insufficient permission error when opening leads.	<input type="checkbox"/> Security role <input type="checkbox"/> Security group <input type="checkbox"/> Field security profile
A licensed user does not appear in the list of users available for security assignment.	<input type="checkbox"/> Security role <input type="checkbox"/> Security group <input type="checkbox"/> Field security profile

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/powerapps/developer/data-platform/field-security-entities>
