About Exambible

Your Partner of IT Exam

Found in 1998

Exambible is a company specialized on providing high quality IT exam practice study materials, especially Cisco CCNA, CCDA, CCNP, CCIE, Checkpoint CCSE, CompTIA A+, Network+ certification practice exams and so on. We guarantee that the candidates will not only pass any IT exam at the first attempt but also get profound understanding about the certificates they have got. There are so many alike companies in this industry, however, Exambible has its unique advantages that other companies could not achieve.

Our Advances

* 99.9% Uptime

All examinations will be up to date.

* 24/7 Quality Support

We will provide service round the clock.

* 100% Pass Rate

Our guarantee that you will pass the exam.

* Unique Gurantee

If you do not pass the exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

NEW QUESTION 1

Ned is the project manager of the HNN project for your company. Ned has asked you to help him complete some probability distributions for his project. What portion of the project will you most likely use for probability distributions?

- A. Bias towards risk in new resources
- B. Risk probability and impact matrixes
- C. Risk identification
- D. Uncertainty in values such as duration of schedule activities

Answer: D

NEW QUESTION 2

Nancy is the project manager of a project with 78 stakeholders. This is a high-profile project and she needs to express to her project team and to the management the importance of communication in this project. She would like to show the number of stakeholder communication channels in the project. Based on this information how many communication channels exist within this project?

- A. 156
- B. 3,003
- C. 78
- D. 6,084

Answer: B

NEW QUESTION 3

Ben is the project manager of the YHT Project for his company. Alice, one of his team members, is confused about when project risks will happen in the project. Which one of the following statements is the most accurate about when project risk happens?

- A. Project risk can happen at any moment.
- B. Project risk happens throughout the project execution.
- C. Project risk is always in the future.
- D. Project risk is uncertain, so no one can predict when the event will happen.

Answer: C

NEW QUESTION 4

Jeff works as a project manager for BlueWell Inc. He is determining which risks can affect the project. Which of the following are the inputs to the identify risks process that Jeff will use to accomplish the task? Each correct answer represents a complete solution. Choose all that apply.

- A. Scope baseline
- B. Activity cost estimates
- C. Risk register
- D. Risk management plan

Answer: ABD

NEW QUESTION 5

You are the project manager of a large project that will last four years. In this project, you would like to model the risk based on its distribution, impact, and other factors. There are three modeling techniques that a project manager can use to include both event-oriented and project-oriented analysis. Which modeling technique does NOT provide event-oriented and project-oriented analysis for identified risks?

- A. Sensitivity analysis
- B. Jo-Hari Window
- C. Expected monetary value
- D. Modeling and simulation

Answer: B

NEW QUESTION 6

You are the project manager of the GHE Project. You have identified the following risks with the characteristics as shown in the following figure: How much capital should the project set aside for the risk contingency reserve?

- A. \$142,000
- B. \$41,750
- C. \$23,750
- D. \$232,000

Answer: C

NEW QUESTION 7

Stephen is the project manager of the GBB project. He has worked with two subject matter experts and his project team to complete the risk assessment technique. There are approximately 47 risks that have a low probability and a low impact on the project. Which of the following answers best describes what Stephen should do with these risk events?

- A. The low probability and low impact risks should be added to a watchlist for future monitoring.
- B. Because they are low probability and low impact, the risks can be dismissed.

- C. The low probability and low impact risks should be added to the risk register.
- D. Because they are low probability and low impact, Stephen should accept the risks.

Answer: A

NEW QUESTION 8

Diana is the project manager of the QPS project for her company. In this project Diana and the project team have identified a pure risk. Diana and the project team decided, along with the key stakeholders, to remove the pure risk from the project by changing the project plan altogether. What is a pure risk?

- A. It is a risk event that is generated due to errors or omission in the project work.
- B. It is a risk event that is created by a risk response.
- C. It is a risk event that only has a negative side, such as loss of life or limb.
- D. It is a risk event that cannot be avoided because of the order of the work.

Answer: C

NEW QUESTION 9

You are the project manager of the GHG project for your company. You have identified the project risks, completed qualitative and quantitative analysis, and created risk responses. You also need to document how and when risk audits will be performed in the project. Where will you define the frequency of risk audits?

- A. Risk response plan
- B. Quality management plan
- C. Risk management plan
- D. Schedule management plan

Answer: C

NEW QUESTION 10

In what portion of a project are risk and opportunities greatest and require intense planning and anticipation of risk events?

- A. Closing
- B. Planning
- C. Initiating
- D. Executing

Answer: C

NEW QUESTION 10

You work as a project manager for BlueWell Inc. Management has asked you to work with the key project stakeholder to analyze the risk events you have identified in the project. They would like you to analyze the project risks with a goal of improving the project's performance as a whole. What approach can you use to achieve the goal of improving the project's performance through risk analysis with your project stakeholders?

- A. Focus on the high-priority risks through qualitative risk analysis
- B. Involve the stakeholders for risk identification only in the phases where the project directly affects them
- C. Involve subject matter experts in the risk analysis activities
- D. Use qualitative risk analysis to quickly assess the probability and impact of risk events

Answer: A

NEW QUESTION 13

You are the project manager of the BJA Project for your company. Management is worried about one of the identified risks in your project. The risk event has a probability of 90 percent and a cost impact of \$85,000. Management and you discuss possible solutions to address the risk. You share with them that for \$75,000 you can reduce the probability of the risk event to 15 percent and the impact to \$25,000. This solution will add three weeks to the project schedule. Management thinks this is a good idea and they would like you to add the time and cost additions to your project plan. What type of risk response is used?

- A. Avoidance
- B. Acceptance
- C. Exploit
- D. Mitigation

Answer: D

NEW QUESTION 18

You are the project manager for your organization and you are working with Thomas, a project team member. You and Thomas have been working on a specific risk response for a probable risk event in the project. Thomas is empowered with a risk response and will control all aspects of the identified risk response in which a particular risk event will happen within the project. What title, in regard to risk, is bestowed on Thomas?

- A. Risk expeditor
- B. Risk owner
- C. Risk team leader
- D. Risk coordinator

Answer: B

NEW QUESTION 19

Linda is the project manager of the NAB Project. One of the risks her project team has identified is too dangerous for the project team to manage internally so she has hired a vendor to complete this portion of the project and to manage the identified risk. What risk response has Linda used in this instance?

- A. Transference
- B. Avoidance
- C. Contractual
- D. Mitigation

Answer: A

NEW QUESTION 21

Which of the following components ensures that risks are examined for all new proposed change requests in the change control system?

- A. Risk monitoring and control
- B. Scope change control
- C. Integrated change control
- D. Configuration management

Answer: C

NEW QUESTION 26

During qualitative risk analysis you want to define the risk urgency assessment. All of the following are indicators of risk priority except for which one?

- A. Cost of the project
- B. Risk rating
- C. Warning signs
- D. Symptoms

Answer: A

NEW QUESTION 27

Mike is the project manager of the NNP Project for his organization. He is working with his project team to plan the risk responses for the NNP Project. Mike would like the project team to work together on establishing risk thresholds in the project. What is the purpose of a risk threshold?

- A. It helps to identify those risks for which specific responses are needed.
- B. It is a limit of the funds that can be assigned to risk events.
- C. It is a warning sign that a risk event is going to happen.
- D. It is a study of the organization's risk tolerance.

Answer: A

NEW QUESTION 30

You work as a project manager for BlueWell Inc. Your project is running late and you must respond to the risk. Which risk response can you choose that will also cause you to update the human resource management plan?

- A. Teaming agreements
- B. Transference
- C. Crashing the project
- D. Fast tracking the project

Answer: C

NEW QUESTION 34

Mark works as a project manager of the NNH project. In this project, he has created a contingency response that the cost performance index should be less than 0.91. The NNH project has a budget at completion of \$950,000 and is 43 percent complete - though the project should be 50 percent complete. The project has spent \$470,897 to reach the 43 percent complete milestone. What is the project's cost performance index?

- A. 0.95
- B. 0.80
- C. 0.87
- D. 0.91

Answer: C

NEW QUESTION 37

You are the project manager of the GHY project. In your organization you must follow certain enterprise environmental factors that establish the rules for risk management. One of the policies your project must adhere to requires periodic rapid analysis of risks within the project. These rapid, cost-effective sessions must be documented and performed monthly. What type of analysis are you required to perform according to your enterprise environmental factors?

- A. Brainstorming
- B. Qualitative analysis
- C. Delphi Technique
- D. Quantitative analysis

Answer: B

NEW QUESTION 38

You are the project manager of the GHY project for your organization. You are about to start the qualitative risk analysis process for the project and you need to determine the roles and responsibilities for conducting risk management. Where can you find this information?

- A. Enterprise environmental factors
- B. Risk register
- C. Risk management plan
- D. Staffing management plan

Answer: C

NEW QUESTION 41

Fred is the project manager of the CPS project. He is working with his project team to prioritize the identified risks within the CPS project. He and the team are prioritizing risks for further analysis or action by assessing and combining the risks probability of occurrence and impact. What process is Fred completing?

- A. Risk identification
- B. Perform qualitative analysis
- C. Perform quantitative analysis
- D. Risk Breakdown Structure creation

Answer: B

NEW QUESTION 42

The risk transference is referred to the transfer of risks to a third party, usually for a fee, it creates a contractual-relationship for the third party to manage the risk on behalf of the performing organization. Which one of the following is NOT an example of the transference risk response?

- A. Use of insurance
- B. Warranties
- C. Life cycle costing
- D. Performance bonds

Answer: C

NEW QUESTION 43

David is the project manager of HGF project for his company. David, the project team, and several key stakeholders have completed risk identification and are ready to move into qualitative risk analysis. Tracy, a project team member, does not understand why they need to complete qualitative risk analysis. Which one of the following is the best explanation for completing qualitative risk analysis?

- A. It is a cost-effective means of establishing probability and impact for the project risks.
- B. Qualitative risk analysis helps segment the project risks, create a risk breakdown structure, and create fast and accurate risk responses.
- C. All risks must pass through quantitative risk analysis before qualitative risk analysis.
- D. It is a rapid and cost-effective means of establishing priorities for the plan risk responses and lays the foundation for quantitative analysis.

Answer: D

NEW QUESTION 46

Fill in the blank with an appropriate phrase.

_____ are activities that are dangerous to complete and manage such as construction, electrical work, or manufacturing.

- A. Pure risks

Answer: A

NEW QUESTION 51

Holly is the project manager of the NHQ project for her company. Her project sponsor, Tracy, has requested that Thomas, the department manager, from the Risk Management Department, will work with Holly to determine the effectiveness of the risk responses. Tracy and Thomas are concerned that some of the risks within Holly's project may not be addressed to depth they would like. In this scenario, who is responsible for ensuring that risk audits are performed at an appropriate frequency throughout the project?

- A. Thomas
- B. Tracy
- C. The project team
- D. Holly

Answer: D

NEW QUESTION 56

The Identify Risk process determines the risks that affect the project and document their characteristics. Why should the project team members be involved in the Identify Risk process?

- A. They are the individuals that will need a sense of ownership and responsibility for the risk events.
- B. They are the individuals that will have the best responses for identified risks events within the project.
- C. They are the individuals that are most affected by the risk events.
- D. They are the individuals that will most likely cause and respond to the risk events.

Answer: A

NEW QUESTION 60

Which of the following processes is described in the statement below? "This is the process of numerically analyzing the effect of identified risks on overall project objectives."

- A. Identify Risks
- B. Perform Quantitative Risk Analysis
- C. Monitor and Control Risks
- D. Perform Qualitative Risk Analysis

Answer: B

NEW QUESTION 64

You are the project manager for your organization. You are working with your project team to complete the qualitative risk analysis process. The first tool and technique you are using requires that you assess the probability and what other characteristic of each identified risk in the project?

- A. Impact
- B. Risk owner
- C. Cost
- D. Risk category

Answer: A

NEW QUESTION 67

You work as a project manager for BlueWell Inc. You are preparing to plan risk responses for your project with your team. How many risk response types are available for a negative risk event in the project?

- A. Four
- B. One
- C. Three
- D. Seven

Answer: A

NEW QUESTION 69

Melody is the project manager for her organization. She has created a risk response to conduct more tests on the software her project is creating. The identified risk that prompted this response was that the software is mission-critical and must be flawless before it can be put into product. What type of a risk response has Melody used in this scenario?

- A. Mitigation
- B. Enhance
- C. Transference
- D. Avoidance

Answer: A

NEW QUESTION 70

In addition to monitoring and controlling the project risks for their status and information the risk monitoring and controlling process accomplishes four key things for a project. Which one of the following is NOT a determination that is made by the risk monitoring and controlling process?

- A. Determines if the project assumptions are still valid
- B. Determines if the risk management policies and procedures are being followed
- C. Determines if the risk contingency reserves should be modified to be in alignment with the current risk assessment
- D. Determines if the project constraints are still valid

Answer: D

NEW QUESTION 75

Fred is the project manager of a large project in his organization. Fred needs to begin planning the risk management plan with the project team and key stakeholders. Which plan risk management process tool and technique should Fred use to plan risk management?

- A. Variance and trend analysis
- B. Information gathering techniques
- C. Planning meetings and analysis
- D. Data gathering and representation techniques

Answer: C

NEW QUESTION 79

There are seven risk responses, a project manager can use to address risk events. Which one of the following is a risk response that is appropriate for positive or negative risk events depending on the scenario in the project?

- A. Avoidance
- B. Acceptance
- C. Sharing

D. Transference

Answer: B

NEW QUESTION 84

Rex is the project manager of the BDF Project. This project will last for two years and has a budget of \$2,345,000. Management has instructed Rex that the project must not go over budget as funds are very tight in the organization. During the project planning Rex and the project team discover a positive risk event to save \$75,000. Rex wants to make certain that this risk event happens so which risk response method is most appropriate?

- A. Share
- B. Mitigation
- C. Exploit
- D. Enhance

Answer: C

NEW QUESTION 86

You and your project team have identified the project risks and now are analyzing the probability and impact of the risks. What type of analysis of the risks provides a quick and high-level review of each identified risk event?

- A. A risk probability-impact matrix
- B. Quantitative risk analysis
- C. Seven risk responses
- D. Qualitative risk analysis

Answer: D

NEW QUESTION 89

Which types of project tends to have more well-understood risks?

- A. Operational work projects
- B. First-of-its kind technology projects
- C. Recurrent projects
- D. State-of-art technology projects

Answer: C

NEW QUESTION 90

You are project manager for ABD project. You, with your team, are working on the following activities:

Probabilistic analysis of a project.

Probability of achieving cost and time objectives. Trends in Qualitative Risk Analysis results.

On which of the following processes are you working on?

- A. Plan Risk Management
- B. Perform Quantitative Risk Analysis
- C. Perform Qualitative Risk Analysis
- D. Identify Risks

Answer: B

NEW QUESTION 91

You are the project manager of the HJK Project for your organization. You and the project team have created risk responses for many of the risk events in the project. Where should you document the proposed responses and the current status of all identified risks?

- A. Stakeholder management strategy
- B. Risk management plan
- C. Risk register
- D. Lessons learned documentation

Answer: C

NEW QUESTION 92

You are the project manager of the GGG project. You have completed the risk identification process for the initial phases of your project. As you begin to document the risk events in the risk register what additional information can you associate with the identified risk events?

- A. Risk potential responses
- B. Risk schedule
- C. Risk owner
- D. Risk cost

Answer: A

NEW QUESTION 94

You are preparing to complete the quantitative risk analysis process with your project team and several subject matter experts. You gather the necessary inputs including the project's cost management plan. Why is it necessary to include the project's cost management plan in the preparation for the quantitative risk analysis

process?

- A. The project's cost management plan can help you to determine what the total cost of the project is allowed to be.
- B. The project's cost management plan provides direction on how costs may be changed due to identified risks.
- C. The project's cost management plan provides control that may help determine the structure for quantitative analysis of the budget.
- D. The project's cost management plan is not an input to the quantitative risk analysis process.

Answer: C

NEW QUESTION 98

Lisa is the project manager of the SQL project for her company. She has completed the risk response planning with her project team and is now ready to update the risk register to reflect the risk response. Which of the following statements best describes the level of detail Lisa should include with the risk responses she has created?

- A. The level of detail is set by historical information.
- B. The level of detail should correspond with the priority ranking.
- C. The level of detail must define exactly the risk response for each identified risk.
- D. The level of detail is set of project risk governance.

Answer: B

NEW QUESTION 99

You work as a project manager for SoftTech Inc. You are working with the project stakeholders to begin the qualitative risk analysis process. You will need all of the following as inputs to the qualitative risk analysis process except for which one?

- A. Stakeholder register
- B. Project scope statement
- C. Risk management plan
- D. Risk register

Answer: A

NEW QUESTION 102

Thomas is a key stakeholder in your project. Thomas has requested several changes to the project scope for the project you are managing. Upon review of the proposed changes, you have discovered that these new requirements are laden with risks and you recommend to the change control board that the changes be excluded from the project scope. The change control board agrees with you. What component of the change control system communicates the approval or denial of a proposed change request?

- A. Configuration management system
- B. Scope change control system
- C. Integrated change control
- D. Change log

Answer: C

NEW QUESTION 103

Which of the following are parts of SWOT Analysis? Each correct answer represents a complete solution. Choose all that apply.

- A. Opportunities
- B. Tools
- C. Weaknesses
- D. Threats
- E. Strengths
- F. Optimism

Answer: ACDE

NEW QUESTION 106

You work as a project manager for TechSoft Inc. You are preparing to plan risk responses for your project with your project team. How many risk responses are available for a positive risk event in the project?

- A. Three
- B. Four
- C. Seven
- D. One

Answer: B

NEW QUESTION 109

You are working with the project stakeholders to analyze and prioritize their requirements for the project. One of the project requirements is to achieve a high-level of customer satisfaction for the project deliverable. What is the danger in this project requirement?

- A. Achieving customer satisfaction is an assumption and should be documented in the project scope.
- B. Achieving customer satisfaction is a subjective requirement and entails a high level of risk of being successfully accomplished.
- C. Achieving customer satisfaction is a risk as the project manager cannot control how satisfied the customer will be with the project deliverables.
- D. Achieving customer satisfaction should always map to the quality requirements for the project.

Answer: B

NEW QUESTION 114

Which of the following processes involves choosing the alternative strategies, executing a contingency or fallback plan, taking corrective action, and modifying the project management plan?

- A. Monitor and Control risk
- B. Configuration Management
- C. Integrated Change control
- D. Scope Change control

Answer: A

NEW QUESTION 119

You work as a project manager for BlueWell Inc. You are currently working with the project stakeholders to identify risks in your project. You understand that the qualitative risk assessment and analysis can reflect the attitude of the project team and other stakeholders to risk. Effective assessment of risk requires management of the risk attitudes of the participants. What should you, the project manager, do with assessment of identified risks in consideration of the attitude and bias of the participants towards the project risk?

- A. Evaluate and document the bias towards the risk events
- B. Evaluate the bias through SWOT for true analysis of the risk events
- C. Document the bias for the risk events and communicate the bias with management
- D. Evaluate the bias towards the risk events and correct the assessment accordingly

Answer: D

NEW QUESTION 124

Harry is the project manager of the MMQ Construction Project. In this project, Harry has identified a supplier who can create stained glass windows for 1,000 window units in the construction project. The supplier is an artist who works by himself, but creates windows for several companies throughout the United States. Management reviews the proposal to use this supplier and while they agree that the supplier is talented, they do not think the artist can fulfill the 1,000 window units in time for the project's deadline. Management asked Harry to find a supplier who can fulfill the completion of the windows by the needed date in the schedule. What risk response has management asked Harry to implement?

- A. Mitigation
- B. Acceptance
- C. Avoidance
- D. Transference

Answer: A

NEW QUESTION 128

Gary is the project manager of the MMQ project for his company. He is working with his project team to plan the risk responses for his project. Sarah, a project team member, does not understand the process that Gary is using to plan the risk responses. Which approach is the preferred method to address project risks and the risk responses?

- A. Risks in the project should be addressed by their probability for creating risk responses.
- B. Risks in the project should be addressed by the organization's risk tolerance for creating risk responses.
- C. Risks in the project should be addressed by their impact for creating risk responses.
- D. Risks in the project should be addressed by their priority for creating risk responses.

Answer: D

NEW QUESTION 132

Shelly is the project manager of the BUF project for her company. In this project Shelly needs to establish some rules to reduce the influence of risk bias during the qualitative risk analysis process. What method can Shelly take to best reduce the influence of risk bias?

- A. Group stakeholders according to positive and negative stakeholders and then complete the risk analysis
- B. Determine the risk root cause rather than the person identifying the risk events
- C. Establish risk boundaries
- D. Establish definitions of the level of probability and impact of risk event

Answer: D

NEW QUESTION 134

Jenny is the project manager of the NHJ Project for her company. She has identified several positive risk events within the project and she thinks these events can save the project time and money. You, a new team member wants to know that how many risk responses are available for a positive risk event. What will Jenny reply to you?

- A. Four
- B. Three
- C. Seven
- D. Acceptance is the only risk response for positive risk events.

Answer: A

NEW QUESTION 136

Harry works as a project manager for BlueWell Inc. He is determining how to conduct the risk management activities for a project. According to the PMBOK, there are six inputs to the plan risk management process. Which one of the following is NOT an input to this process?

- A. Project scope statement
- B. Risk management plan
- C. Schedule management plan
- D. Cost management plan

Answer: B

NEW QUESTION 140

You are the program manager for your organization. Management is considering a new program but they are worried about the program risks that may affect the program success. You know that there are three positive risks responses and three negative risk responses that each risk can have. Management asks you which risk response would be most appropriate for a large risk event if they wanted to hire a third-party to own the risk event for the program. What risk event is most appropriate?

- A. Avoidance
- B. Sharing
- C. Transference
- D. Mitigation

Answer: C

NEW QUESTION 142

You are the project manager for TTP project. You are in the Identify Risks process. You have to create the risk register. Which of the following are included in the risk register? Each correct answer represents a complete solution. Choose two.

- A. List of mitigation techniques
- B. List of key stakeholders
- C. List of identified risks
- D. List of potential responses

Answer: CD

NEW QUESTION 144

Holly is the project manager of the NSS Project for her company. She is discussing some of the project risks and the issues that have happened in the project. Holly has faxed the status report to her project client for their review. Based on the standard communication model, which component in this scenario is the decoder?

- A. Project customer
- B. Telephone wire
- C. Holly
- D. Project customer's fax machine

Answer: D

NEW QUESTION 147

There are four inputs to the Monitoring and Controlling Project Risks process. Which one of the following will NOT help you, the project manager, to prepare for risk monitoring and controlling?

- A. Work Performance Information
- B. Project management plan
- C. Risk register
- D. Change requests

Answer: D

NEW QUESTION 150

Which of the following diagrams displays sensitivity analysis data?

- A. Fishbone
- B. Influence
- C. Tornado
- D. Cause and effect

Answer: C

NEW QUESTION 154

Wendy is the project manager of the NNJ project for her company. As part of the variance and trend analysis tool and technique for risk governance she is using earned value management. In this approach, Wendy wants to track and compare the cost and schedule variances. What is the point of this tool and technique in regard to risk?

- A. Wendy can determine a true project completion date.
- B. Wendy can track the cost and schedule variances.
- C. Wendy can review quality performance on baselines.
- D. Wendy can forecast deviation of the project cost and schedule for completion targets.

Answer: D

NEW QUESTION 156

You are the project manager of the HJK project for your organization. You and the project team have created risk responses for many of the risk events in the project. A teaming agreement is an example of what risk response?

- A. Transference
- B. Acceptance
- C. Mitigation
- D. Sharing

Answer: D

NEW QUESTION 158

A high-profile, high-priority project within your organization is being created. Management wants you to pay special attention to the project risks and do all that you can to ensure that all of the risks are identified early in the project. Management has to ensure that this project succeeds. Management's risk aversion in this project is associated with what term?

- A. Quantitative risk analysis
- B. Risk conscience
- C. Risk mitigation
- D. Utility function

Answer: D

NEW QUESTION 161

You are the project manager of the NNQ Project for your company and are working with your project team to define contingency plans for the risks within your project. Mary, one of your project team members, asks what a contingency plan is. Which of the following statements best defines what a contingency response is?

- A. Some responses are designed for use only if certain events occur.
- B. Some responses have a cost and a time factor to consider for each risk event.
- C. Some responses must counteract pending risk events.
- D. Quantified risks should always have contingency responses.

Answer: A

NEW QUESTION 162

Your project is an agricultural-based project that deals with plant irrigation systems. You have discovered a byproduct in your project that your organization could use to make a profit. If your organization seizes this opportunity it would be an example of what risk response?

- A. Enhancing
- B. Opportunistic
- C. Positive
- D. Exploiting

Answer: D

NEW QUESTION 163

You work as a project manager for BlueWell Inc. There has been a delay in your project work that is adversely affecting the project schedule. You decided, with your stakeholders' approval, to fast track the project work to get the project done faster. When you fast track the project which of the following are likely to increase?

- A. Costs
- B. Quality control concerns
- C. Human resource needs
- D. Risks

Answer: D

NEW QUESTION 167

Don has hired Jerry, a contractor, to complete a portion of his project work. The contract used was a cost-plus contract. If Don were to perform a risk audit, who would carry the risk in this scenario?

- A. Don would because he is the project manager.
- B. Jerry would because of the contract type.
- C. Don would because of the contract type.
- D. Jerry would because he is the hired contractor.

Answer: C

NEW QUESTION 171

Frank is the project manager of the NHH Project. He is working with the project team to create a plan to document the procedures to manage risks throughout the project. This document will define how risks will be identified and quantified. It will also define how contingency plans will be implemented by the project team. What document is Frank and the NHH Project team creating in this scenario?

- A. Resource management plan
- B. Project plan
- C. Project management plan
- D. Risk management plan

Answer: D

NEW QUESTION 173

You are the project manager of QSL project for your organization. You are working with your project team and several key stakeholders to create a diagram that shows how various elements of a system interrelate and the mechanism of causation within the system. What diagramming technique are you using as a part of the risk identification process?

- A. Predecessor and successor diagramming
- B. System or process flowcharts
- C. Cause and effect diagrams
- D. Influence diagrams

Answer: B

NEW QUESTION 178

Frances is the project manager of a project in her organization. This project has a budget of \$567,000 and is schedule to last for three years. Frances wants to examine the risk events to determine which risk events have the most potential impact on the project. Which modeling technique can help Frances to accomplish this goal?

- A. Expected monetary value
- B. Sensitivity analysis
- C. Quantitative risk analysis
- D. Modeling and simulation

Answer: B

NEW QUESTION 183

You are the project manager for your organization. You have determined that an activity is too dangerous to complete internally so you hire licensed contractor to complete the work.

The contractor, however, may not complete the assigned work on time which could cause delays in subsequent work beginning. This is an example of what type of risk event?

- A. Internal
- B. Secondary risk
- C. Pure risk
- D. Transference

Answer: B

NEW QUESTION 187

There are seven risks responses that a project manager can choose from. Which risk response is appropriate for both positive and negative risk events?

- A. Acceptance
- B. Sharing
- C. Transference
- D. Mitigation

Answer: A

NEW QUESTION 188

You are working with your project stakeholders to identify risks within the JKP Project. You want to use an approach to engage the stakeholders to increase the breadth of the identified risks by including internally generated risk. Which risk identification approach is most suited for this goal?

- A. Delphi Technique
- B. SWOT analysis
- C. Assumptions analysis
- D. Brainstorming

Answer: B

NEW QUESTION 190

Which of the following processes looks at the complex web of actors, rules, conventions, processes, and mechanisms concerned with how relevant risk information is collected, analyzed and communicated, and how management decisions are taken?

- A. Risk Communication
- B. IRGC
- C. Risk Response Planning
- D. Risk Governance

Answer: D

NEW QUESTION 194

You are the project manager of a large, high-profile project in your organization. You have realized that politics within your company may affect the true identification of risk events within the project. You decide that you'd like to use a method to identify risk events through an anonymous process. Which one of the following risk events will allow you to collect and distribute risk information without the stakeholders knowing what other stakeholders are communicating about the project risk events?

- A. Surveys
- B. Monte Carlo Technique
- C. Checklist analysis
- D. Delphi Technique

Answer: D

NEW QUESTION 195

You are the project manager for the ABC organization. Your current project has 75 internal stakeholders and 245 external stakeholders. Many of the risks within your project will only affect the internal stakeholders, but several of the identified risk events will affect the external stakeholders. Management would like to know the total number of communication channels in the project. How many communication channels exist in this project?

- A. 245
- B. 51,040
- C. 102,080
- D. 320

Answer: B

NEW QUESTION 198

You work as the project manager for Bluewell Inc. Your project has several risks that will affect several stakeholder requirements. Which project management plan will define who will be available to share information on the project risks?

- A. Risk Management Plan
- B. Stakeholder management strategy
- C. Resource Management Plan
- D. Communications Management Plan

Answer: D

NEW QUESTION 199

You are the project manager of the AMD project for your organization. In this project, you are currently performing quantitative risk analysis. The tool and technique you are using is simulation where the project model is computed many times with the input values chosen at random for each iteration. The goal is to create a probability distribution from the iterations for the project schedule. What technique will you use with this simulation?

- A. Pareto modeling
- B. Expected Monetary Value
- C. Analogous modeling
- D. Monte Carlo Technique

Answer: D

NEW QUESTION 200

Sensitivity analysis is a technique for systematically changing parameters in a model to determine the effects of such changes and is useful for computer modelers for a range of purposes. Which of the following purposes does the sensitivity analysis include? Each correct answer represents a complete solution. Choose all that apply.

- A. Increased understanding or quantification of the system
- B. Estimating the average outcome
- C. Model development
- D. Decision making or the development of recommendations for decision makers

Answer: ACD

NEW QUESTION 201

Nancy is the project manager of the NHH project. She and the project team have identified a significant risk in the project during the qualitative risk analysis process. Bob is familiar with the technology that the risk is affecting and proposes to Nancy a solution to the risk event. Nancy tells Bob that she has noted his response, but the risk really needs to pass through the quantitative risk analysis process before creating responses. Bob disagrees and ensures Nancy that his response is most appropriate for the identified risk. Who is correct in this scenario?

- A. Bob is correct
- B. Bob is familiar with the technology and the risk event so his response should be implemented.
- C. Bob is correct
- D. Not all risk events have to pass the quantitative risk analysis process to develop effective risk responses.
- E. Nancy is correct
- F. All risks of significant probability and impact should pass the quantitative risk analysis process before risk responses are created.
- G. Nancy is correct
- H. Because Nancy is the project manager she can determine the correct procedures for risk analysis and risk response
- I. In addition, she has noted the risk response that Bob recommends.

Answer: B

NEW QUESTION 202

Mary is the project manager of the HGH Project for her company. She and her project team have agreed that if the vendor is late by more than ten days they will cancel the order and hire the NGB Company to fulfill the order. The NGB Company can guarantee orders within three days, but the costs of their products are significantly more expensive than the current vendor. What type of a response strategy is this?

- A. Internal risk management strategy
- B. Contingent response strategy
- C. External risk response
- D. Expert judgment

Answer: B

NEW QUESTION 204

You are the project manager of the NHQ Project for your company. You have completed qualitative and quantitative analysis of your identified project risks and you would now like to find an approach to increase project opportunities and to reduce threats within the project. What project management process would best help you?

- A. Monitor and control project risks
- B. Create a risk governance approach
- C. Create the project risk register
- D. Plan risk responses

Answer: D

NEW QUESTION 207

You are the project manager of the NNH Project. In this project you have created a contingency response that the schedule performance index should be less than 0.93. The NNH Project has a budget at completion of \$945,000 and is 45 percent complete though the project should be 49 percent complete. The project has spent \$455,897 to reach the 45 percent complete milestone. What is the project's schedule performance index?

- A. -\$37,800
- B. 0.93
- C. 0.92
- D. 1.06

Answer: C

NEW QUESTION 208

You are the project manager of a large construction project. This project will last for 18 months and will cost \$750,000 to complete. You are working with your project team, experts, and stakeholders to identify risks within the project before the project work begins. Management wants to know why you have scheduled so many risk identification meetings throughout the project rather than just initially during the project planning. What is the best reason for the duplicate risk identification sessions?

- A. The iterative meetings allow the project manager and the risk identification participants to identify newly discovered risk events throughout the project.
- B. The iterative meetings allow all stakeholders to participate in the risk identification processes throughout the project phases.
- C. The iterative meetings allow the project manager to discuss the risk events which have passed the project and which did not happen.
- D. The iterative meetings allow the project manager to communicate pending risks events during project execution.

Answer: A

NEW QUESTION 211

Ted is the project manager of the HRR project for his company. Management has asked that Ted periodically reviews the contingency reserve as risk events happen, pass, or are still pending. What is the purpose of reviewing the contingency reserve?

- A. It helps to evaluate if the remaining reserve is adequate for the risk exposure.
- B. It helps to determine how much more funds will need to be invested in the project.
- C. It helps to evaluate secondary and residual risks related to the risk responses and their costs.
- D. It helps to determine the probability and impact of project risks.

Answer: A

NEW QUESTION 213

You are the project manager of a large construction project. Part of the project involves the wiring of the electricity in the building your project is creating. You and the project team determine the electrical work is too dangerous to perform yourself so you hire an electrician to perform the work for the project. This is an example of what type of risk response?

- A. Acceptance
- B. Mitigation
- C. Transference
- D. Avoidance

Answer: C

NEW QUESTION 218

Mary is a project manager in her organization. On her current project she is working with her project team and other key stakeholders to identify the risks within the project. She is currently aiming to create a comprehensive list of project risks so she is using a facilitator to help generate ideas about project risks. What risk identification method is Mary likely using?

- A. Brainstorming
- B. Delphi Techniques
- C. Checklist analysis
- D. Expert judgment

Answer: A

NEW QUESTION 221

John is the project manager of the NHQ Project for his company. His project has 75 stakeholders, some of which are external to the organization. John needs to make certain that he communicates about risk in the most appropriate method for the external stakeholders. Which project management plan will be the best guide for John to communicate to the external stakeholders?

- A. Risk Response Plan
- B. Risk Management Plan
- C. Communications Management Plan
- D. Project Management Plan

Answer: C

NEW QUESTION 224

Pete works as a project manager for BlueWell Inc. The Management has told him that he must implement an agreed-upon contingency response if the cost performance index in his project is less than 0.90. Consider that Pete's project has a budget at completion of \$275,000. His project is 65 percent complete and he has spent \$175,000 to date. However, Pete is scheduled to be 78 percent complete. What is the cost performance index for this project to determine if the contingency response should happen?

- A. 1.02
- B. 0.96
- C. 0.90
- D. 0.89

Answer: A

NEW QUESTION 227

Gary is the project manager for his project. He and the project team have completed the qualitative risk analysis process and are about to enter the quantitative risk analysis process when Mary, the project sponsor, wants to know what quantitative risk analysis will review. Which of the following statements best defines what quantitative risk analysis will review?

- A. The quantitative risk analysis process will review risk events for their probability and impact on the project objectives.
- B. The quantitative risk analysis seeks to determine the true cost of each identified risk event and the probability of each risk event to determine the risk exposure.
- C. The quantitative risk analysis process will analyze the effect of risk events that may substantially impact the project's competing demands.
- D. The quantitative risk analysis reviews the results of risk identification and prepares the project for risk response management.

Answer: C

NEW QUESTION 229

As a part of monitoring and controlling the project, the project manager should update the risk register. The project manager should update the risk register with information on risk reassessment, risk audits, and periodic risk reviews. What other information should the project manager update the risk register with?

- A. Actual costs and schedule delays of risk events.
- B. Actual outcomes of risk management duties by the project team.
- C. Actual cost of risk events.
- D. Actual outcomes of the project's risks and of the risk responses.

Answer: D

NEW QUESTION 233

Marsha is the project manager of the NHQ Project. There's a risk that her project team has identified, which could cause the project to be late by more than a month. Marsha does not want this risk event to happen so she devises extra project activities to ensure that the risk event will not happen. The extra steps, however, will cost the project an additional \$10,000. What type of risk response is this approach?

- A. Enhancing
- B. Exploiting
- C. Mitigation
- D. Transference

Answer: C

NEW QUESTION 238

Bill is the project manager for a project that will last six months and has a budget of \$580,000. In this project a high-risk has been identified with the new materials the project will be using. Bill would like to assign one person, Beth, to be responsible to monitor this risk. Bill assigns Beth the authority to respond to the risk event if it appears in the risk events that is likely to happen. In addition, Bill hires a consultant to work with Beth on this area of the project. In this instance, who is the risk response owner?

- A. Bill, because he is the project manager
- B. Beth, because she has the authority to respond to the risk event
- C. Beth and the consultant are the risk owners
- D. The consultant working with Beth, because this is transference

Answer: B

NEW QUESTION 241

Amy is the project manager for her company. In her current project the organization has a very low tolerance for risk events that will affect the project schedule. Management has asked Amy to consider the affect of all the risks on the project schedule. What approach can Amy take to create a bias against risks that will affect the schedule of the project?

- A. She can create an overall project rating scheme to reflect the bias towards risks that affect the project schedule.
- B. She can filter all risks based on their affect on schedule versus other project objectives.
- C. She can have the project team pad their time estimates to alleviate delays in the project schedule.
- D. She can shift risk-laden activities that affect the project schedule from the critical path as much as possible.

Answer: A

NEW QUESTION 242

There are five inputs to the quantitative risk analysis process. Which one of the following is NOT an input to the perform quantitative risk analysis process?

- A. Risk register
- B. Risk management plan
- C. Cost management plan
- D. Enterprise environmental factors

Answer: D

NEW QUESTION 244

Ben is the project manager of the CMH Project for his organization. He has identified a risk that has a low probability of happening, but the impact of the risk event could save the project and the organization with a significant amount of capital. Ben assigns Laura to the risk event and instructs her to research the time, cost, and method to improve the probability of the positive risk event. Ben then communicates the risk event and response to management. What risk response has been used here?

- A. Sharing
- B. Transference
- C. Enhance
- D. Exploit

Answer: C

NEW QUESTION 248

Tom works as a project manager for BlueWell Inc. He is determining which risks can affect the project. Which of the following inputs of the identify risks process is useful in identifying risks, and provides a quantitative assessment of the likely cost to complete the scheduled activities?

- A. Activity cost estimates
- B. Cost management plan
- C. Activity duration estimates
- D. Risk management plan

Answer: A

NEW QUESTION 253

You are the project manager of the NJJ project. Your enterprise environmental factors require that you establish certain risk management rules regarding low risks within your project. What is the best policy for risks with low probability and low impact in the project management?

- A. These risks should be accepted.
- B. These risks should be placed on a watchlist for future monitoring.
- C. These risks should be identified, but dismissed.
- D. These risks should be placed in the risk register.

Answer: B

NEW QUESTION 255

There are seven risk responses for any project. Which one of the following is a valid risk response for a negative risk event?

- A. Enhance
- B. Exploit
- C. Acceptance
- D. Share

Answer: C

NEW QUESTION 259

Joan is the project manager of the KYU project for her company. She is working with management on defining a contingency reserve for her project. Currently the project is scheduled to last 18 months and it has a cost budget of \$2.5 million. What two areas of the project can the contingency reserve address in regard to risk management?

- A. Quality and costs

- B. Cost and resource management
- C. Risk and project planning
- D. Costs and schedule

Answer: D

NEW QUESTION 262

You work as the project manager for Bluewell Inc. There has been a delay in your project work that is adversely affecting the project schedule. You decide, with your stakeholders' approval, to fast track the project work to get the project done faster. When you fast track the project, what is likely to increase?

- A. Risks
- B. Costs
- C. Quality control concerns
- D. Human resource needs

Answer: A

NEW QUESTION 266

You are the project manager of the CUL project in your organization. You and the project team are assessing the risk events and creating a probability and impact matrix for the identified risks. Which one of the following statements best describes the requirements for the data type used in qualitative risk analysis?

- A. A qualitative risk analysis requires fast and simple data to complete the analysis.
- B. A qualitative risk analysis requires accurate and unbiased data if it is to be credible.
- C. A qualitative risk analysis encourages biased data to reveal risk tolerances.
- D. A qualitative risk analysis required unbiased stakeholders with biased risk tolerances.

Answer: B

NEW QUESTION 270

You work as a project manager for TechSoft Inc. You are working with the project stakeholders on the qualitative risk analysis process in your project. You have used all the tools to the qualitative risk analysis process in your project. Which of the following techniques is NOT used as a tool in qualitative risk analysis process?

- A. Risk Urgency Assessment
- B. Risk Categorization
- C. Risk Reassessment
- D. Risk Data Quality Assessment

Answer: C

NEW QUESTION 271

You are the project manager of the NKJ Project for your company. The project's success or failure will have a significant impact on your organization's profitability for the coming year. Management has asked you to identify the risk events and communicate the event's probability and impact as early as possible in the project. Management wants to avoid risk events and needs to analyze the cost-benefits of each risk event in this project. What term is assigned to the low-level of stakeholder tolerance in this project?

- A. Mitigation-ready project management
- B. Risk utility function
- C. Risk avoidance
- D. Risk-reward mentality

Answer: B

NEW QUESTION 275

You are the project manager for a construction project. The project involves casting of a column in a very narrow space. Because of lack of space, casting it is highly dangerous. High technical skill will be required for casting that column. You decide to hire a local expert team for casting that column. Which of the following types of risk response are you following?

- A. Acceptance
- B. Avoidance
- C. Mitigation
- D. Transference

Answer: D

NEW QUESTION 276

Adrian is a project manager for a new project using a technology that has recently been released and there's relatively little information about the technology. Initial testing of the technology makes the use of it look promising, but there's still uncertainty as to the longevity and reliability of the technology. Adrian wants to consider the technology factors a risk for her project. Where should she document the risks associated with this technology so she can track the risk status and responses?

- A. Project scope statement
- B. Risk register
- C. Project charter
- D. Risk low-level watch list

Answer: B

NEW QUESTION 277

You are the project manager for the NHQ Project. This project requires that you install 140 copies of design software onto your department's computers. The vendor offers you a twenty percent discount on the software if your company will purchase 150 or more copies of the software. You communicate this offer with other departments in your firm to see if anyone else would need 10 copies of the software to save your project a significant amount of funds. What is this risk response called?

- A. Exploiting
- B. Avoidance
- C. Sharing
- D. Transference

Answer: C

NEW QUESTION 279

Della works as a project manager for SoftTech Inc. She is working with the project stakeholders to begin the quantitative risk analysis process. Which of the following inputs will be needed for the quantitative risk analysis process in her project? Each correct answer represents a complete solution. Choose all that apply.

- A. Risk management plan
- B. Project scope statement
- C. Risk register
- D. Cost management plan

Answer: ACD

NEW QUESTION 280

Donna is the project manager of the QSD Project and she believes Risk Event D in the following figure is likely to happen. If this event does happen, how much will Donna have left in the risk contingency reserve if none of the other risk events have happened?

- A. \$35,000
- B. \$41,700
- C. \$14,000
- D. \$6,700

Answer: D

NEW QUESTION 282

Fred is the project manager of the PKL project. He is working with his project team to complete the quantitative risk analysis process as a part of risk management planning. Fred understands that once the quantitative risk analysis process is complete, the process will need to be completed again in at least two other times in the project. When will the quantitative risk analysis process need to be repeated?

- A. Quantitative risk analysis process will be completed again after the cost management planning and as a part of monitoring and controlling.
- B. Quantitative risk analysis process will be completed again after new risks are identified and as part of monitoring and controlling.
- C. Quantitative risk analysis process will be completed again after the risk response planning and as a part of monitoring and controlling.
- D. Quantitative risk analysis process will be completed again after the plan risk response planning and as part of procurement.

Answer: C

NEW QUESTION 287

You are the project manager for BlueWell Inc. Your current project is a high priority and high profile project within your organization. You want to identify the project stakeholders that will have the most power in relation to their interest on your project. This will help you plan for project risks, stakeholder management, and ongoing communication with the key stakeholders in your project. In this process of stakeholder analysis, what type of a grid or model should you create based on these conditions?

- A. Stakeholder power/interest grid
- B. Influence/impact grid
- C. Salience model
- D. Stakeholder register

Answer: A

NEW QUESTION 289

Todd is the project manager of the EST project for his company. His organization has established certain rules in the enterprise environmental factors which affect the approach that Todd takes in managing his project. One of the rules requires Todd to consider the risk attitude of the stakeholders participating in risk analysis. Why must risk attitude be considered as a part of risk analysis?

- A. Risk attitude can affect the measurement of probability and impact.
- B. Risk attitude can establish a stakeholder's influence over project decisions.
- C. Risk attitude identifies stakeholders that are hygiene seekers or motivation seekers.
- D. Risk attitude establishes stakeholders as positive or negative stakeholders.

Answer: A

NEW QUESTION 291

Billy is the project manager of the HAR Project and is in month six of the project. The project is scheduled to last for 18 months. Management asks Billy how often the project team is participating in risk reassessment in this project. What should Billy tell management if he's following the best practices for risk management?

- A. Project risk management is scheduled for every month in the 18-month project.
- B. Project risk management has been concluded with the project planning.
- C. At every status meeting the project team project risk management is an agenda item.
- D. Project risk management happens at every milestone.

Answer: C

NEW QUESTION 294

You are the project manager of the GHQ project for your company. You are working with your project team to prepare for the qualitative risk analysis process. Mary, a project team member, does not understand why you need to complete qualitative risks analysis. You explain to Mary that qualitative risks analysis helps you determine which risks needs additional analysis. There are also some other benefits that qualitative risks analysis can do for the project. Which one of the following is NOT an accomplishment of the qualitative risk analysis process?

- A. Corresponding impact on project objectives
- B. Time frame for a risk response
- C. Prioritization of identified risk events based on probability and impact
- D. Cost of the risk impact if the risk event occurs

Answer: D

NEW QUESTION 299

Jane is the project manager of the GBB project for her company. In the current project a vendor has offered the project a ten percent discount based if they will order 100 units for the project. It is possible that the GBB Project may need the 100 units, but the cost of the units is not a top priority for the project. Jane documents the offer and tells the vendor that they will keep the offer in mind and continue with the project as planned. What risk response has been given in this project?

- A. Acceptance
- B. Enhance
- C. Exploiting
- D. Sharing

Answer: A

NEW QUESTION 300

You are the project manager for a construction project. The project includes a work that involves very high financial risks. You decide to insure processes so that any ill happening can be compensated. Which type of strategies have you used to deal with the risks involved with that particular work?

- A. Mitigate
- B. Avoid
- C. Accept
- D. Transfer

Answer: D

NEW QUESTION 304

Gary is the project manager for his organization. He is working with the project stakeholders on the project requirements and how risks may affect their project. One of the stakeholders is confused about what constitutes risks in the project. Which of the following is the most accurate definition of a project risk?

- A. It is an uncertain event that can affect the project costs.
- B. It is an uncertain event or condition within the project execution.
- C. It is an uncertain event that can affect at least one project objective.
- D. It is an unknown event that can affect the project scope.

Answer: C

NEW QUESTION 306

You are the project manager of the AFD project for your company. You are working with the project team to reassess existing risk events and to identify risk events that have not happened and whose relevancy to the project has passed. What should you do with these events that have not happened and would not happen now in the project?

- A. Add the risks to the risk register
- B. Add the risks to a low-priority watchlist
- C. Close the outdated risks
- D. Add the risk to the issues log

Answer: C

NEW QUESTION 308

You are the project manager for BlueWell Inc. You are reviewing the risk register for your project. The risk register provides much information to you, the project manager and to the project team during the risk response planning. All of the following are included in the risk register except for which item?

- A. Network diagram analysis of critical path activities
- B. Symptoms and warning signs of risks
- C. List of potential risk responses
- D. Trends in qualitative risk analysis results

Answer: A

NEW QUESTION 313

You are the project manager of the NHH project for your company. You and the project team have completed the quantitative risk analysis for your project. During this process you create a contingency reserve based on the risk probability-impact matrix as seen in the figure below. Based on the information in the figure above, what amount would you need to include in your risk contingency fund?

- A. -\$465,000
- B. \$171,500
- C. -\$258,500
- D. \$258,500

Answer: D

NEW QUESTION 314

You are the project manager of the NGH project for your organization. You want to create a cause-and-effect diagram to help discover the root causes of the risks within the project. Harold, the CIO, recommends that you create an Ishikawa diagram instead. What is an Ishikawa diagram?

- A. It is a graphical representation of situations showing causal influences.
- B. It is the same thing as a root cause diagram.
- C. It shows how various elements of a system interrelate.
- D. It diagrams the risks according to the work breakdown structure including resources.

Answer: B

NEW QUESTION 316

A project team member has just identified a new project risk. The risk event is determined to have significant impact but a low probability in the project. Should the risk event happen it'll cause the project to be delayed by three weeks, which will cause new risk in the project. What should the project manager do with the risk event?

- A. Add the identified risk to a quality control management control chart.
- B. Add the identified risk to the issues log.
- C. Add the identified risk to the risk register.
- D. Add the identified risk to the low-level risk watchlist.

Answer: C

NEW QUESTION 319

Which of the following is a risk response planning technique associated with threats that seeks to reduce the probability of occurrence or impact of a risk to below an acceptable threshold?

- A. Avoidance
- B. Exploit
- C. Transference
- D. Mitigation

Answer: D

NEW QUESTION 320

You are the project manager of the BlueStar project in your company. Your company is structured as a functional organization and you report to the functional manager that you are ready to move onto the qualitative risk analysis process. What will you need as inputs for the qualitative risk analysis of the project in this scenario?

- A. Qualitative risk analysis does not happen through the project manager in a functional structure.
- B. You will need the risk register, risk management plan, project scope statement, and any relevant organizational process assets.
- C. You will need the risk register, risk management plan, outputs of qualitative risk analysis, and any relevant organizational process assets.
- D. You will need the risk register, risk management plan, permission from the functional manager, and any relevant organizational process assets.

Answer: B

NEW QUESTION 323

Tom is the project manager for his organization. In his project he has recently finished the risk response planning. He tells his manager that he will now need to update the cost and schedule baselines. Why would the risk response planning cause Tom the need to update the cost and schedule baselines?

- A. New or omitted work as part of a risk response can cause changes to the cost and/or schedule baseline.
- B. Risk responses protect the time and investment of the project.
- C. Risk responses may take time and money to implement.
- D. Baselines should not be updated, but refined through versions.

Answer: A

NEW QUESTION 326

Neil works as a project manager for SoftTech Inc. He is working with Tom, the COO of his company, on several risks within the project. Tom understands that through qualitative analysis Neil has identified many risks in the project. Tom's concern, however, is that the priority list of these risk events are sorted in "high-risk," "moderate-risk," and "low-risk" as conditions apply within the project. Tom wants to know that is there any other objective on which Neil can make the priority list for project risks. What will be Neil's reply to Tom?

- A. Risks may be listed by the additional analysis and response

- B. Risk may be listed by the responses in the near-term
- C. Risks may be listed by priority separately for schedule, cost, and performance
- D. Risks may be listed by categories

Answer: C

NEW QUESTION 331

Kelly is the project manager of the BHH project for her organization. She is completing the risk identification process for this portion of her project. Which one of the following is the only thing that the risk identification process will create for Kelly?

- A. Risk register
- B. Risk register updates
- C. Change requests
- D. Project document updates

Answer: A

NEW QUESTION 332

You work as a project manager for BlueWell Inc. You are working with your team members on the risk responses in the project. Which risk response will likely cause a project to use the procurement processes?

- A. Exploiting
- B. Mitigation
- C. Sharing
- D. Acceptance

Answer: C

NEW QUESTION 334

Mary is the project manager for the BLB project. She has instructed the project team to assemble, to review the risks. She has included the schedule management plan as an input for the quantitative risk analysis process. Why is the schedule management plan needed for quantitative risk analysis?

- A. Mary will schedule when the identified risks are likely to happen and affect the project schedule.
- B. Mary will utilize the schedule controls and the nature of the schedule for the quantitative analysis of the schedule.
- C. Mary will use the schedule management plan to schedule the risk identification meetings throughout the remaining project.
- D. Mary will utilize the schedule controls to determine how risks may be allowed to change the project schedule.

Answer: B

NEW QUESTION 337

You are the project manager of the NHQ project for your company. You are working with your project team to complete a risk audit. A recent issue that your project team responded to, and management approved, was to increase the project schedule because there was risk surrounding the installation time of a new material. Your logic was that with the expanded schedule there would be time to complete the installation without affecting downstream project activities. What type of risk response is being audited in this scenario?

- A. Parkinson's Law
- B. Mitigation
- C. Avoidance
- D. Lag Time

Answer: C

NEW QUESTION 340

John works as a project manager for BlueWell Inc. He is determining which risks can affect the project. NEW QUESTION 353

You are the project manager of the GGK project for your company. The GGK project has a budget of \$1,265,100 and is currently 40 percent complete. In this project, you elected to add labor to the project to increase the likelihood of completing the project early as the project was only scheduled to be 35 percent complete at this time. This positive risk response, while keeping the project ahead of schedule, has added significant costs to the project. You have already spent \$575,000 to reach this point in the project. Management would like to know what your cost performance index and the schedule performance index is for this project. What are these values?

- A. The CPI is -\$68,960 and the SPI is \$63,255.
- B. The CPI is .88 and the SPI is zero.
- C. The CPI is .88 and the SPI is 1.14.
- D. The CPI is 1.14 and the SPI is .88.

Answer: C

NEW QUESTION 357

What approach can a project manager use to improve the project's performance during qualitative risk analysis?

- A. Focus on near-term risks first.
- B. Create a risk breakdown structure and delegate the risk analysis to the appropriate project team members.
- C. Focus on high-priority risks.
- D. Analyze as many risks as possible regardless of who initiated the risk event.

Answer: C
